## IV. Reports of the Board of Directors

### (I) Management Discussion and Analysis

This year, facing to complex and volatile business environment, the company has still finished major operations tasks well this year by implementing the development strategy unswervingly, implementing the integration measures actively, and strengthening operational management.

On June 13, 2014, the proposal of non-public offering of A shares was passed through the seventh twenty-second board meeting. This proposal got an approval in the 2014 first temporary shareholders' meeting on July 2, 2014. The company received <The approval of Shanghai Jin Jiang International Hotels Development Co., Ltd. on non-public offering " by China Securities Regulatory Commission (SFC license [2014] No. 1129) on October 19, 2014, approved the company's non-public offering of 201,277,000 new shares. The completion of registration and custody procedures of this issuance of new shares was made at the China Securities Depository and Clearing Corporation Limited Shanghai Branch on December 3, 2014. Detailed matters of non-public offering of A shares, please refer to <Shanghai Jin Jiang International Hotels Development Co., Ltd. non-public offering of A shares plans>, <"Shanghai Jin Jiang International Hotels Development Co., Ltd. non-public offering of stock issuance Report >.

The company's non-public offering of A shares, will help accelerate the company's limited-service hotel business development goals. In late 2017 the company plans to achieve a limited-service hotel to reach the scale of 2,000 hotels.

During the reporting period, the fluctuation of the critical accounting data up and main factors are as follows:

In the year 2014, the company achieved consolidated revenue of RMB 2,913.10 million, increased by 8.52% compared to the previous year. The company achieved operating profit of RMB 634.1million, increased by 35% compared to the previous year. The company achieved RMB 487.17million net profit attributed to shareholders, increased by 29.06% compared to the previous year. The consolidated revenue increased mainly because the steady grow of limited service hotel business and catering business. First, the acquisition of Smartel in June 2013 won RMB 205.24 million operating income in the year 2014, increased by RMB 115.86 million compared to the previous year. Second, the initial fee and the central reservation system sales channels revenue achieved RMB 287.05 million in 2014, increased by RMB 36.73 million. Third, the catering service revenue of Jinjiang Food was RMB 114.36 million, increased by RMB 29.67million. The net profit increased mainly due to five factors: First, the company received pre-tax RMB 423.94 million by selling available for sale financial assets, increased by RMB 248.55 million. Second, the investment income under cost method from KFC Suzhou, Wuxi KFC and Hangzhou KFC was decreased by RMB 24.51 million. Third, New Asia Hotel, Metropole Hotel, Huating Guest hotels and

Jinshajiang Hotel had a temporary loss of 53.61 million in the year 2014, an increase loss of RMB 19.44 million. The first three hotels were under construction according to the brand standards of "Jin Jiang Metropolo" during 2014. Jinshajiang hotel is expected to implement in 2015 in accordance with the "Jin Jiang Metropolo" brand standards. Fourth, the company incurred RMB 66.46 million interest expenses in 2014, increased by RMB 27.25 million. Fifth, the company incurred RMB 39.80 million agency fee for the acquisition of Louvre Group (GDL).

In the year 2014, the company generated RMB 559.23 million net cash flow from operating activities, which decreased by 12.50 % comparing to the previous year. It is mainly due to increased payment of business income tax and commodity turnover tax, as well as the growth of payment on rental and labor costs of limited-service hotel business.

On December 31, 2014, the company's total assets are RMB 11,362.51 million, increased by 60.42% compared to last year; the total liabilities are RMB 2,634.91million, decreased by 2.49% compared to last year; the net assets attributed to shareholders are RMB 8,698.8 million, increased by 100.27% compared to last year. The increase of total assets was mainly due to the completion of non-public offering of A shares in this period and the raise in fair value of available for sale financial assets. The decline in total liabilities was mainly due to the repayment of bank loans after the completion of non-public offering of A shares. The main reason for increase in shareholders' equity is the completion of non-public offering of A shares in this period and the raise in fair value of available for sale financial assets.

### **Business of Limited Service Business Hotels operation**

In 2014, the limited service business hotels operated well, and brought operating revenue amounting to RMB 2.64 billion, increasing 9.39% as compared with the same period of previous year. The net profit belonging to the segment of limited service business hotels was amounting to RMB 231.49million, increasing 0.43% as compared with the same period of previous year. The earnings before interest, taxes, depreciation and amortization, (EBITDA) were RMB 723.49 million, increasing 8.73% as compared with the same period of previous year.

Income from initial franchising fee amounting to RMB 63.56 million, decreasing 1.49% as compared with the same period of previous year; ongoing franchising fee amounting to RMB 172.64 million, increasing 17.81% as compared with the same period of previous year; Reservation channel fee amounting to RMB 50.85 million, increasing 29.52% compared with the same period of previous year. The Company accepted the reservation through Center Reservation System (including Reservation Center, Websites, etc.) and charged the related channel fee calculated by the stay time of the client and certain standards since 1st April, 2011.

Is a Shanghai jinjiang international hotel investment management co., LTD., this year's new and hold 100% stake in the subsidiary.

One affiliated company decreased, whose name was Shanghai Jinchu Catering management Co., Ltd., of which Shanghai Jin Jiang Inn Co., Ltd.. held 100% equity interest. On January 23,2014, jin hutch the formalities for cancellation of industry and commerce has been completed.

In the year 2014, the company consolidated operating income RMB 2,913,104,838.78, increasing RMB 228,693,920.59and 8.52% over the same period last year. Among them, the limited service hotel operations and management income RMB 2,636,196,379.24, increasing over the previous year RMB 226,309,600.27and

9.39%. Food and catering revenue is RMB 276,681,694.19, increasing over the previous year RMB 2,437,636.95 and 0.89%. The growth of operating income reporting period consolidated, mainly driven from the company's main operation.

**(2) Facts of major sales customers**

**In 2014, the revenue from major clients were amounted to RMB 37,170,449.87, 1.28% of total operating income compared 1.14% last year.**

Details of major clients are as follows:

Top 5	Operating revenue	Ratio
No. 1	8,525,112.61	0.29%
No. 2	8,103,771.16	0.28%
No. 3	7,102,248.40	0.24%
No. 4	7,016,871.60	0.24%
No. 5	6,422,446.10	0.22%
Total	37,170,449.87	1.28%

**3. Operating cost**

**(1). Analysis of main factors of operating cost**

Unit: Yuan

By industries						
By industries	Items	2014	Ratio	2013	Ratio	Flux
Business of Limited service hotels	Food and restaurant	106,853,198.13	34.65	114,963,550.22	38.22	-7.05
	Commodity sales	25,485,016.04	8.26	30,493,389.39	10.14	-16.42
	Others	37,393,111.62	12.12	24,589,993.98	8.18	52.07
	Subtotal	169,731,325.79	55.03	170,046,933.59	56.54	-0.19
Business of food and restaurant	Chain restaurant	75,185,481.76	24.38	77,264,523.67	25.69	-2.69
	Sales of food	8,980,218.91	2.91	12,053,473.37	4.01	-25.50
	Group meal	53,029,313.41	17.20	38,069,543.96	12.66	39.30
	Others	1,484,397.07	0.48	3,321,133.55	1.10	-55.30
	Subtotal	138,679,411.15	44.97	130,708,674.55	43.46	6.10
Total		308,410,736.94	100	300,755,608.14	100	2.55

As stated previously, the Company is mainly involved in business of limited service hotels operation and business of food and restaurant. Operating costs are mainly cost of raw material and selling cost of commodity sales. In 2014, the costs of business of economy hotels operation and business of food and restaurant accounted for 55.03% and 44.97% respectively of total operating costs. Increased by 1.51% over the previous year and a decrease of 1.51%, no significant fluctuation occurred as compared with the same period of previous year.

In 2014, the operating costs of the Company were amounted to RMB 308,410,736.94, increasing RMB 7,655,128.80 by 2.55% as compared with the same period of previous year, including costs brought by business of limited service hotels operation amounting to RMB 169,731,325.79, declining RMB 315,607.80 by 0.19%. And the revenue brought by business of food and restaurant operation amounting to RMB 138,679,411.15, increasing RMB 7,970,736.60 by 6.10% as compared with the same period of previous year. The rise of operating costs during the reporting period was mainly led by (1)the increase of group meal cost RMB 14,959,769.45 due to the increase of revenue growth; (2)the decline of food sale cost RMB 3,073,254.46 due to the decline of mooncake sales from New Asia Food.

## (2) Analysis of major suppliers

In 2014, the amount of procurement from Top 5 suppliers added up to RMB 33,814,196.18, equal to 9.36% of the company's total procurement, compared with 5.92% last year. The main reason is the increase of procurement due to the increase of revenue from Jinjiang Food, and the Jinya Catering's change of suppliers.

### Amount of procurement of top five suppliers and comparison

Top 5 suppliers	Amount	Ratio (%)	Major items
No. 1	14,358,767.39	3.97	Meat
No. 2	8,167,343.04	2.26	Aquatic Product
No. 3	4,206,789.06	1.16	Fruit
No. 4	3,875,581.95	1.07	Vegetable
No. 5	3,205,714.74	0.89	Non-staple food
Total	33,814,196.18	9.36	

## (4) Expenditures

Items	2014	2013	Flux (%)
Selling and distribution expenses	1,536,665,713.06	1,392,779,718.82	10.33
Administrative expenses	676,727,893.36	580,945,258.02	16.49
Financial expenses	69,623,797.85	45,849,095.18	51.85
Reversals of impairment losses in respect of assets	3,187.97	1,069,444.66	-99.70

Investment income	462,321,266.21	246,716,376.88	87.39
Non-operating income	35,478,681.48	29,191,683.88	21.54
Non-operating expenses	3,977,859.89	2,251,453.65	76.68
Losses from disposal of non-current assets	3,031,805.01	1,203,571.22	151.90
Income tax expenses	175,421,493.42	114,497,613.96	53.21
Profit or loss attributable to minority interests	3,008,293.26	4,677,019.05	-35.68

The reasons of fluctuations are analyzed as follows:

1) Selling and distribution expenses

Selling and distribution expenses for current period and previous period are approximately RMB 1,536,665,713.06 and RMB 1,392,779,718.82 respectively, increasing by 10.33% which was mainly due to the newly increase entrusted management (or lease) hotels selling expenses.

2) Administrative expenses

Administrative expenses for current period and previous period are approximately RMB 676,727,893.36 and RMB 580,945,258.02 respectively, which was mainly due to the newly increase entrusted management(or lease) Groupe du Louvre selling expenses.

3) Financial expenses

Financial expenses for current period and previous period are approximately RMB 69,623,797.85 and RMB 45,849,095.18 respectively, increasing by 51.85% which was mainly due to the increased entrusted loans from Jin Jiang international, loans from Jin Jiang finance and other banks.

4) Reversals of impairment losses in respect of assets

Reversals of impairment losses in respect of assets are approximately RMB 3,187.97 and RMB 1,069,444.66 respectively, depressing by 99.70% which was mainly due to received accounts receivable from Holland New Shanghai City last year.

5) Investment income

Investment income assets are approximately RMB 462,321,266.21 and RMB 246,716,376.88 respectively, increasing by 87.39% which was mainly due to the increase of returns of disposal of Changjiang Securities' stock, the decline of dividend from Suzhou KFC, Wuxi KFC and Hangzhou KFC, as well as the revenue from settlement of Yuecai Trust.

6) Non-operating income

Non-operating income is approximately RMB 35,478,681.48 and RMB 29,191,683.88 respectively, increasing

by 21.54% which was mainly due to the increase of government subsidy this year.

7) Non-operating expenses

Non-operating expenses are approximately RMB 3,977,859.89 and RMB 2,251,453.65 respectively, increasing by 76.68% which was mainly due to some stores of New Asia Café de Coral closed this year.

8) Losses from disposal of non-current assets.

Losses from disposal of non-current assets are approximately RMB 3,031,805.01 and RMB 1,203,571.22 respectively, increasing by 151.90% which was mainly due to some stores of New Asia Café de Coral closed this year.

9) Income tax expenses

Income tax expenses for current period and previous period are approximately RMB 175,421,493.42 and RMB 114,497,613.96 respectively, increasing by 53.21% which was mainly due to pre-tax revenue from the disposal of Changjiang Securities stock, etc.

10) Profit or loss attributable to minority interests

Profit or losses attributable to minority interest are approximately RMB 3,008,293.26 and RMB 4,677,019.05 respectively, decreasing by 35.68%, which was mainly due to the profit decline of Jin Jiang Tung Lok and Hotels Investment.

## **(5) Cash flows**

Remarks and reasons of fluctuations on cash flow statement's items during the reporting period

1) Net cash flows from operating activities for the reporting period

Net cash flows from operating activities for current period and previous period are approximately RMB 559,229,653.67 and RMB 639,137,604.27 respectively, declined by 12.50%, which is mainly due to the increase of corporate income tax and circulation tax, as well as the increase of rent and labor cost from Jin Jiang Inn and Hotels Investment.

2) Net cash flows from investing activities for the reporting period

Net cash flows from investing activities for current period and previous period are approximately RMB 112,727,944.37 and -1,088,629,395.57 respectively, having a net increase of RMB 1,201,357,339.94, which was mainly due to our company's payment of transferee Smartel equity price and construction price, and the current disposal of available-for-sale financial assets for cash increased comparing to last year effects in the current period.

3) Net cash flows from financing activities for the reporting period

Net cash flows from financing activities for current period and previous period are RMB 2,200,849,499.64 and RMB 376,553,349.79 respectively, having a net increase of RMB 1,824,296,149.85 which was mainly due to the Non-public issue of stocks and repayment of the borrowings from bank.

**(6) Others**

**1) Details on significant changes of profits sources**

As mentioned above, the Company is mainly engaged in business of limited service hotels operation and management, and the business of food and restaurant. Meanwhile, the Company holds a certain amount of available-for-sale financial assets. The profits of the Company are mainly composed of the three parts.

In 2014, the amount of the Limited service hotels Operation and management business profits approximately accounted for 48% of total net profits, decreasing about 13 percentages as compared with previous year. Mainly due to available-for-sale financial assets increased by more than the Limited service hotels Operation and management business profit growth during the reporting period.

In 2014, the amount of the profits from business of food and restaurant approximately accounted for 7% of total net profits, decreasing about 11 percentages as compared with previous year. Mainly due to Shanghai Kentucky Fried Chicken was affected to the chicken problems; business performance had a big drop compared to previous year.

In 2014, the amount of the investment income from available-for-sale financial assets from available-for-sale financial assets and other investment accounted for 97% of total net profits, increasing 44% as compared with previous year. Among them, the income before tax of selling stock of Changjiang Securities was approximately RMB 372.42 million, increasing RMB 197.03 million as compared with previous year, and cash dividends of Changjiang Securities was RMB 20.78 million, decreasing RMB 2.75 million as compared with previous year. After Yuecai's trust contract of Changjiang equity incentive plan- equity collection finished, the company received RMB 51.52 million before tax after clearing

**2) Development strategy and Operating plan progress analysis**

In 2014, the revenue is RMB 2,913,100 thousand, increasing RMB 116,900 thousand and accomplished 96.14% of the plan. 140 limited service hotels were newly opened in net (opened 162, closed 19, suspension for fitment 3). Operating plan for 2014 is 142 new openings. Reason for closing is mainly contract expiration. 155 limited service hotels were newly contracted in net, 45 less than operating plan, accomplished 77.50% of the plan. Mainly because not meet the brand standard, termination of contracts in advance or market competition.

**(ii) Main operation and performance**

(1) Main operation analysis by industries or by products

In the year 2014, the company's main operation continues to maintain a high gross margin level. The following table shows the gross profit margin for the situation of the industry:

Unit: Yuan Currency: RMB

Main operation analysis by industries						
By industry	Revenue from	By industry	Revenue from	By industry	Revenue from	By industry

Minority interests	28,798,007.19	0.25	37,169,297.01	0.52	-22.52

The reasons of fluctuations are analyzed as follows:

(1) Currency funds

The ending and beginning balances of currency funds were approximately RMB 3,551,614,901.31 and RMB 678,807,803.63 respectively, increasing by 423.21% which was mainly due to non-public issue of stock A shares.

(2) Account receivable

The ending and beginning balances of account receivable were approximately RMB 88,420,644.15 and RMB 69,224,584.94 respectively, increasing by 27.73% which was mainly due to the increase income of company's limited service hotel, food and catering business.

(3) Interest receivable

The ending and beginning balances of interest receivable were approximately RMB 1,272,464.17 and RMB 610,879.88 respectively, increasing by 108.30 % which was mainly due to the increase of bank savings after the non-public issue of stock A shares.

(4) Dividend receivable

The ending and beginning balances of dividend receivable were approximately RMB 2,042,209.70 and RMB 5,256,833.65 respectively, decreasing by 61.15 % which was mainly due to the Company recognized the dividends receivable from Wuxi KFC and Suzhou KFC last year.

(5) Other receivable

The ending and beginning balances of dividend receivable were approximately RMB 62,368,314.79 and RMB 47,797,514.34 respectively, increasing by 30.48 % which was mainly due Shenzhen Overseas Chinese Town Co.Ltd became a subsidiary of the Company and consolidated financial statements.

(6) Other current assets

The ending and beginning balances of other current assets were approximately RMB 2,711,183.83 and RMB 3,742,834.43 respectively, decreasing by 27.56 % which was mainly due to the increase of amortization of Smartel.

(7) Financial assets available for sale

The ending and beginning balances of financial assets available for sale were approximately RMB 2,389,181,673.99 and RMB 1,049,208,796.40 respectively, increasing by 127.71 % which was mainly due to the change in fair value of available-for-sale financial assets including Changjiang Securities and Shenyin & Wanguo.

(8) Short-term loans

The ending and beginning balances of short-term loans were approximately RMB 800,000,000.00 and RMB 1,330,000,000.00 respectively, decreasing by 39.85% which was mainly due to the decrease of loans from banks.

(9) Payroll payable

The ending and beginning balances of fixed assets were approximately RMB 86,160,486.77 and RMB 121,204,401.33 respectively, decreasing by 28.91% which was mainly due to policy's fluctuations of Year-end Bonus.

(10) Tax payable

The ending and beginning balances of tax payable were approximately RMB 181,478,947.60 and RMB 125,139,174.82 respectively, increasing by 45.02% which was mainly due to the combined effect of Company

disposal of available-for-sale financial assets.

(11) Interest payable

The ending and beginning balances of Interest payable were approximately RMB 559,618.64 and RMB 2,022,500.00, decreasing by 72.33% which was mainly due to the decrease of interest of loans banks.

(12) Non-current liabilities within 1 years

The ending and beginning balances of other Non-current liabilities within 1 year were approximately RMB 4,964,076.58 and RMB 485,829.13 respectively, which was mainly due to the amortization of asset-related subsidy from the government, and the financial leasing of equipment from Minhang Hotel and Dahua Hotel after reopening.

(13) Long-term loans

The ending and beginning balances of Long-term loans were approximately RMB 4,500,000.00 and RMB 0 respectively, which was mainly due to the loans from Shenyang Jinfu Hotels' Minority.

(14) Deferred income tax liabilities

The ending and beginning balances of deferred income tax liabilities were approximately RMB 654,616,988.13 and RMB 301,787,817.47 respectively, increasing by 116.91% which was mainly due to increasing of the fair value of financial assets available for sale.

(15) Deferred income

The ending and beginning balances deferred income were approximately RMB 27,174,141.58 and RMB 20,630,197.62, increasing by 31.72% which was mainly due to Metropole Hotel received of government subsidy.

(16) Share capital

The ending and beginning balances of Share capital were approximately RMB 804,517,740.00 and RMB 603,240,740.00 respectively, increasing by 33.37% which was mainly due to non-public issue of stock A shares.

(17) Capital reserve

The ending and beginning balances of Capital reserve were approximately RMB 4,482,097,548.95 and RMB 1,659,484,077.87 respectively, increasing by 170.09% which was mainly due to non-public issue of stock A shares.

(18) Other comprehensive income

The ending and beginning balances of other comprehensive income were approximately RMB 1,639,273,900.26 and RMB 565,936,911.73 respectively, increasing by 189.66% which was mainly due to increasing of the fair value of financial assets available for sale.

(19) Minority interests

The ending and beginning balances of Minority interests were approximately RMB 28,798,007.19 and RMB 37,169,297.01 respectively, decreasing by 22.52% which was mainly due to distribution of dividends of Hotels Investment's some subsidiaries.

**(IV) Analysis of core-competitiveness**

The Company has been making great efforts for about 20 years and has been achieving core-competitiveness. In accordance with the overall goals of development strategy, the Company will make further efforts to enhance the advantages in management, brand, network and talent, and to build and consolidate the leading position in limited service hotel market.

After a long time planning for developing limited service business hotels and careful deliberation, the "Jinjiang metropolo" is chosen to be the flagship of limited service business hotel unit. The company will take full advantage of Jinjiang Hotels Group's experience of managing high star-level hotels to ensure higher quality of service and management, to speed up brand building and expand its influence, setting a solid foundation for the long-term development in the future.

In the early days of developing Jinjiang Metropolo, the company will manage some 3-star hotels of Jinjiang Hotels Group by leasing or entrusted operating, and meanwhile, finding some compatible potential projects to seize market share.

During reporting period, in order to improve self-core-competiveness, the company has major actions as below:

On June 13rd, 2014 The company signed < Conditional agreement of subscribe for shares> with Hony capital and Jin Jiang hotels group, the company intended to issue total 201.277 million shares of A share to Hony capital and Jin Jiang hotels group. This issue has been approved through the first 2014 occasional shareholder's meeting which hosted on July 2<sup>nd</sup>, 2014. ## **(II) Discussion and analysis about development of the future of the board of directors**

### **(i) Industry competition configuration and development trend**

#### **(1)Industry competition pattern**

The market of limited service hotels develops quickly in China now, and some advantage companies have appeared. Though, according to room size, top 10 economy hotel chains group have a large share of the market, the market of economy hotels still has huge space for development, and still existing few advantage companies and a large number of new companies will have large-scale expansion in next few years. According

to "Hostelcn", the number of economy hotel in china has increased from 23 to 12,227, and guest room number has increased from 3236 to 1,235,833 from 2000 to 2013. At the same time, the second national economic census leading group office of the state council and the national bureau of statistics jointly issued on December 16, 2014 as of December 31, 2013 the second national economic census data bulletin (No.3) shows, the national accommodation units are total of 73000 as a legal person, including 24000 hotels and 42000 general hotels. According to this calculation, the economy hotel number currently only accounts for the lodging of company legal person units about 17.4% of the total and 30.3% of normal ones.

The number of national chain stores catering enterprises 20,554 in late 2013, an increase of more than 2,401 points at the end of 2012. Restaurant chain's turnover for the year 2013 to achieve 1,319.62 billion, an increase of 2.8 % compared to 2012 (Source: National Bureau of Statistics); expects the number of its chain of stores catering business turnover will continue to maintain a certain level of growth..

## (2) Industry development trend

It's is comprehensive construction well-off society and realize the third strategic target the critical period of socialist modernization construction in current and the future, also the golden development and transformation and upgrading of tourism industry period in our country. Along with quick development of the industrialization, informationization, urbanization, marketization and internationalization, tourism development of our country faces new opportunities.

"The state council about accelerate the development of tourism opinion "put forward requirements clearly: With the transformation and upgrading, quality and efficiency as the main line, to promote the conversion of tourism products to sightseeing, leisure, vacation pay equal attention to meet the diversified, multi-level tourism consumption demand; promote the tourism development to intensive change, pay more attention to energy and resources conservation and ecological environment protection, pay more attention to the cultural heritage of innovation, to achieve sustainable development; to promote the transformation of tourism service to quality service, realize the organic unity of standardization and individuation service. By 2020, domestic traveling reached 5.5 billion, citizens travelling 4.5 times annually, tourism industry added value accounted for the proportion of gross domestic product more than 5%.

According to the general rules of the development of tourism in the world, when GDP per capita being nearly \$5000, tourism will become the basic content of urban residents living and consumption demand, and tourism will enter the explosive growth stage. At present, the national per capita GDP has reached more than 6,700 dollars, that is the level of middle-income countries. With the development of traffic, city construction, tourism infrastructure, it will make the tourism accessibility and convenience to significantly enhance. These are for the sustained and rapid development of tourism industry has laid a solid foundation.

After comprehensive analysis of all the factors which impact the 2014 tourism, we believe that in 2015 China's tourism industry will maintain steady and rapid growth. National Tourism Bureau information shows the development of China's tourism industry related target is that in 2015 the number of domestic tourists will

reach to 3,95 billion, with growth of 10%; domestic tourism revenue of 3,300 billion, with growth of 12%; international tourism income of \$58 billion, increase of 3%; total tourism income of 3,660 billion, with growth of 11%.

**(ii) Development strategy of the Company**

The Company emphasizes on the development of limited service hotels and restaurants, striving to establish the benchmark of Jin Jiang Inn in the domestic limited service hotels industry and improve the JinJiang Metropolo brand. The company actively explores the independent brand fast food chain business model and strives to improve the catering business investment benefit. Further ascension in the "management, brand, network, talent" and other aspects of the core competitive ability, the global layout, transnational management, realize the maximization of corporate value.

**(iii) Annual operation plan for the coming year**

The Company has the perspective of the 2015 total domestic revenue as RMB 3.15 billion increasing by 8.13% as compared with previous year and its new year's operation plans are as follows:

**(1) Business of limited service hotels operation and management**

To continue to accelerate the development of limited service hotels, the company plans to open 150 new hotels in 2015 and amount to 1,118 hotels at the end of 2015; newly contracted hotels 250 and amount to 1,465 contracted hotels at the end of 2015. The measures will be explained as follows.

Firstly, we should speed up our development and continue to promote the coordinated development of multi brand. Through analyzing the current brand system, further clarify the orientation and connotation of the brand. Besides, we should optimize the investment model, financial model formulation and optimization of each brand competitive. We should also strengthen budget execution and management, improve operational efficiency.

Secondly, we should promote the Internet thought as the guidance, make the innovation of marketing tools. To speed up the application of new technology, make the mobile intelligent terminal and hotel service combined deeply in order to improve the response speed of user reputation and marketing. We should also increase the area of electronic commerce business investment, adapt to market changes, making integration, intelligent travel experience, in order to offer better services and attract consumers.

Thirdly, we should continue to deepen the enterprise transformation, strong management platform. Learn from mature international hotel group practices and experience in order to build a multi-brand, internationalization management platform. Make full use of the information platform, through the existing business and process, we can combine and share service platform to adapt to multi brand and

internationalization development. We should further expand the share business category, play system and platform effect, greatly enhance the sharing platform of control and support efficiency.

Fourthly, we should strengthen the quality of hotel construction. Combine the cutting edge hotel together, provide cost-effective services to consumers. Meet the cultural needs and aesthetic taste of the target population. We should set the industry benchmark. At the same time we should improve the standard construction of the brand, clear positioning and characteristics of each brand, unity and seriousness to maintain brand standards.

Fifthly, we should strengthen the construction of franchise management. Optimize franchise systems and processes, improve service support level, build a win to win system of the company and joined the business, we should pay attention to the interests and demands of the franchise business, help to improve business performance. Strengthen the franchisee classification management, with a new perspective, new strength and new attitude will join the management work to a new point of view, to enhance the company's service platform support services for the franchise ability.

Sixthly is to promote the international development strategy. Promote the Louvre international acquisition effect, promote the company internationalization development strategy, through the "Introduction" and "going out", and further improve the company hotel brand series; at the same time the company should introduce and draw on advanced international management experience, integrate domestic and foreign resources in order to realize the regional advantages, give full play to the synergy effect, promote the company of hotel assets value, expand the scale of business and enhance the market share.

## (2)Business of Food and Restaurants

Firstly, The Company will make plan for the transformation of New Asia Café de Coral. Based on the existing products comb adjustment, optimization shop battalion movement line and improve the quality of the products. The company can have the formation of a new business mode, so as to effectively control the cost of artificial, energy, food. At the same time, the establishment of fast food chain operation system and standard can promote the formation of the core competitive capacity; adjustment of the location of shops around the market development planning, values, consumer hot spot out of accord with demand, strategic transformation plan of the new shop, enhance brand awareness, improve customer experience, sustainable income to achieve the company's future growth.

Secondly is the steady development of catering business. To improve the system construction, and management efficiency; vigorously develop the group meal business, through output management, cooperative development and other business models, and actively promote the business development; the establishment of backup talents management mechanism, through the establishment of group meal training center, while retaining talent, planned, step by step to speed up and strengthen the reserve talents training, and constantly improve the ability of sustainable development of group meal.

Thirdly is to enhance the food production capacity. By means of production function and the upgrading of

production capacity, on the premise of ensuring product quality, continue to explore effective ways to reduce production costs and improve profitability.

**(iv) Fund demand to maintain current business and perform investment in construction projects**

The Company estimates that RMB 900 million will be input in renovating and newly establishing some limited service hotels and restaurants in 2015. All the funds will be financed by self-owned capital, financing and other financial tools.

**(v) The potential risks in the future**

(1) Uncertainty from macro-conditions' changes:

Limited service hotel industry and chain catering industry are closely related to the domestic macro-conditions. Although our GDP has been keeping increasing for years, short-term shake or periodical plug-in are still very likely to happen. When meeting the decline in macroeconomic growth, people will hardly expect income increase. And correspondently, less will be spent on eating out and excursion. Moreover, less business trip budget from small and medium-size enterprises will also result to unpleasant performance in economy hotels financial reports and operation performance.

(2) Risks from soaring cost

Among the operating costs of limited service hotels like "Jinjiang Metropolo" and "Jin Jiang Inn" and chain restaurants, fixed assets depreciation and lease cost are of high percentage. Operating lease payments of the Company currently are recognised on a straight-line basis over the lease term. This policy, to some extent, does help to smooth the impact on the future operating performance. However, with the increasing number of branches, the Company is prone to rising rents. Furthermore, the main branches of both economy hotels and chain restaurants are located in the downtown. Intensified competition in this kind of areas with no doubt will lead to higher lease cost.

What is more, with the on-the-rise CPI, current room RevPar can merely cover the increasing costs from new fixed assets, increasing employee benefits and energy costs. The risks mentioned above could have adverse effect on the Company's business in budget hotels and chain restaurants operation.

(3) Risks from domestic expansion

Limited service hotel industry in China is in a rapid development stage. Despite the fact that Jin Jiang Inn has obtained a competitively large market share already, the Company is also exposed to an intensified competition with other competitors in branch expansion as the markets' demand increases in second or third tier cities. Most of the competitors will increase their hotels to meet the needs of customers. In other words, customers will be not satisfied with low coverage, when the Company is not able to meet the expected expansion. Thus, in the following years, the Company will strive to open more branches in

second or third tier cities so as to keep its market share and leading position.

(4) Risk from new brand building

The Company is seeking to establish new brands in both budget hotel and chain catering field. Target customers overlapped between new brands and existing brands will prevent the Company from expected revenue increase. If the new brands cannot increase its target revenue and effectively reduce its cost, three will be negative influence on company's operation.

(5) Risks from franchise management

Franchise has been allowed in the expansion of Jin Jiang Inn and Jin Jiang Metropolo. According to the franchise agreements, the management in franchised hotels is not under total control of the Company. Once franchised hotels are not subject to operation agreement or official property certificates cannot be obtained and must transfer a place, the Company is likely to suffer loss in operation as the franchise hotels will lost customers and revenue. Abuse trademark “Jin Jiang Inn” and "Jin Jiang Metropolo" by franchised hotels will definitely have adverse effect on brand image and reputation. If customers are not satisfied with the service provided by franchise hotels, the company will be complained and there will be adverse effect on brand image and reputation. Then the Limited service hotels' operation will be effected.

(6) Risks from lease property ownership

According to “significant assets replacement and affiliated transactions report” disclosed, up to 31, July 2009, the number of leased-and-operated hotels is up to 86. Those related land and properties are leased under the name of Jin Jiang Inn and Hotels investment from third party. As of the balance sheet date, up to 30 leased hotels have not obtained the official property leasing certificates from lessors. Whether those lessors mentioned above are qualified to lend property out is uncertain. When facing property defect, the Company will unavoidably suspend the operation. Although the Company can receive some compensation upon the lease agreement, extra expense on relocation can be hardly covered.

The Company will take any measures to ensure the properties legally belong to lessors and valid official land and property certificates obtained. In the 12 months after CSRC approval on assets replacement, the Company plans to reduce the problematic hotel number to 20% of total leased hotels. In the 24 months and 36 months after CSRC approval, the number will be further reduced to 10% and 0% respectively.

If the issue cannot be solved out according to the schedule (reduce to 20%, 10% and 0% in 12 months, 24months and 36 months respectively.), the Company will take further measures on the hotels over the rate of schedule in 3 months after the scheduled ending date. Measures to thoroughly solve out the issues include selling out over the purchase price, breaching lease contract and relocation. In case of breaching lease contract with defect property lessors, the Company will be unavoidably involved into penalties.

However, Jin Jiang International on 1, Mar. 2010, promised to pay any penalty arising from contract violation, relocation and compensation for operation discontinuity at the price of appraisal amount issued

on 31, July 2009. In addition, the operation discontinuity loss result from property defect will be paid by Jin Jiang International under the condition that lessors are not able to offer compensation. The actual compensation amount will be the higher of total initial investment cost audited on 31, July 2009 and evaluated amount issued on 31, July 2009) Jin Jiang International will be official creditor to lessors and any compensation received from lessors belongs to Jin Jiang International. Meanwhile, Jin Jiang International will fund the closed hotels to cover the operating loss at the amounts of the last year revenue audited.

(7) Uncertainty from infectious disease breaks and food safety

In recent years, some high contagious diseases like SAR, mad cow disease, bird flu and some other infectious disease have been taking place all over the world. Worries about food safety may prevent people from choosing eating-out and outdoor activities. Thus, the main business of the Company may be impacted largely.

(8) Increasing changes of shareholders equity and return of equity

After introducing the new accounting standard, the Company has reclassified part of financial assets and determined their fair value based on market prices. The changes in financial assets fair value will have a large impact on financial data such as shareholders equity and ROE.

According to the strategy of company, economy hotel operation and management has become the mainstream of the Company. Rapid development in economy hotel business requires corresponding fund support. Meanwhile, the input and output of fund has its own period. The length of period contains some uncertainty. ROE will be diluted if net profit doesn't increase enough.

(9) Risks from reliance too much on part of key staff

Sustainable development in the Company largely depends on management teams and senior staff. A lack of experienced team and staff will definitely have an adverse influence on the operation.

#### **(IV) The proposal on profit distribution or capitalization of reserves**

##### **(i) The proposal and execution of cash dividend policy**

The general meeting of shareholders held in 2012 considered and approved on a motion to modify some provisions of the Articles of Association : When the cash dividends conditions are met, the Company's annual allocation amount of cash dividends (including the interim distribution of cash dividend) with the consolidated financial statements for the year The ratio of net profit attributable to shareholders of the Company not less than 50%, and cash bonuses when the year attributable to shareholders of listed companies net assets ratio of not less than the same period in the People's Bank of China announced a one-year term deposits as interest rates.

During the reporting period, 2013 profit distribution has been approved by the general meetings of shareholders. A cash dividend of RMB 0.38 per share (tax included) for all shareholders on the basis of the total share capital of 603,240,740 shares at the end of 2013, for which B shareholders are entitled to a cash dividend of USD. The announcement on resolutions of 2013 shareholders' meetings was published on Shanghai Securities News and Ta Kung Pao on 29 May 2014.

##### **(ii) The proposal on profit distribution or capitalization of reserves**

The profit and dividend distribution are based on the profit attributable for distribution of the parent company. The audited net profit attributable to shareholders of 2014 is 469,140,829.23, which is calculated by summing up the profit attributable for distribution at the beginning of 2013, amounting to 515,552,320.91, and subtracted dividends distributed of 2013 paid in 2014, amounting to 229,231,481.20. The profit attributable for distribution at the end of 2014 amounted to 755,461,668.94.

According to the Company Law of the People's Republic of China, Article of Association of Shanghai jin Jiang International Hotels Development Co., Ltd. and other relevant regulations, the distribution of 2014 as following:

1. Statutory surplus reserve in accordance with related laws is measured as 10 percent of after tax profit RMB 469,140,829.23 which is calculated through 2014 auditing.
2. The company didn't provide statutory surplus reserve in 2014
3. The Company plans to distribute a cash dividend of RMB 4 (tax included) to every 10 shares held by all shareholders on the basis of 804,517,740 shares in total at the end of 2014; Dividend of B shares will be paid in US dollars, converted by the middle market exchange rate of PBOC in the next working day after the distribution proposal is approved in the general meeting. The company distributed dividend RMB 321,807,096.00 in total in 2014 which occupied 66.06% of the net profit attributable to the shareholders in consolidated financial statements of the listed company in 2014 and 68.59% of the net profit attributable

to the shareholders in parent's financial statements in 2014. The ratio of cash dividends and net assets attributable to shareholders in the consolidated financial statements at the end of the year is 3.70%.

4. After the distribution, in 2014, the remaining balance of RMB 921,886,291.43 in consolidated financial statements and RMB 386,740,490.02 in parent's financial statements will be accounted for undistributed profit attributable to the shareholders of the listed company and carried forward to next year.
5. There was no plan of capitalization of reserves in 2014.

**(iii) Dividends distribution for the last 3 years**

Unit: Yuan Currency: RMB

Year for dividend distribution	Bonus issue every 10 shares	Cash dividend every 10 shares (tax included)	Shares convert every 10 shares	Amount of cash dividend (tax included)	Net profit for the year	Rate of Distribution (%)
2014	-	4.0	-	321,807,096.00	487,168,241.61	66.06
2013	-	3.80	-	229,231,481.20	377,473,299.77	60.73
2012	-	3.70	-	223,199,073.80	369,157,061.28	60.46

**(V) Fulfillment of social responsibility**

In the pursuit of maximizing shareholders' interest, the Company values the sustained profitable with great importance and places the social responsibility at the core in order to achieve a win-win situation between the corporate economic efficiency and social benefits.

Being committed to the society and human being, the Company makes all efforts to protect environment. Economy hotels such as "Jin Jiang Inn" and "Jin jiang Metropol" built by national eco-friendly standards are with brand new concepts of "green economy hotels". For example, water recycling system, like collecting the rainwater for flushing and watering, was introduced in those cities located in fresh water shortage areas. Meanwhile, a series of environment-friendly settings such as high-efficient air interchanger and insulation building materials have been used in designing hotels. The indoor construction materials used in Jin Jiang Inn were double tested by both engineering department and external authority institution to assure the materials reached national environment-friendly quality. In order to provide a safe accommodation, Jin Jiang Inn detected and strengthened the building structure to reach national aseismic standards and introduced advanced infrared security system. The green idea is fully involved in economy hotels design, equipment and materials used, service, operation and management to stress the concept of "safe, healthy, comfortable and professional" of economy hotels like "Jin Jiang Inn" and "Jin Jiang Metropol".

The Company is consistently focusing on improving salaries and benefits of employees. During the reporting period, the Company kept on devoting to raise employee's salaries and amending supplementary medical insurance project for employees. Furthermore, the Company bought the insurance of employer's responsibilities to enhance the protection of safety and life of employees, good effect was obtained.

The company temporarily does not disclose report of fulfilling its social responsibility. The company not only focuses on maximizing shareholder value, at the same time considers enterprise value as the mission for a long time. The company will value social responsibility in the enterprise strategy development, in order to achieve the enterprise economic benefit and social benefit win-win

Not Applicable

### (ii) Events on guarantee

Not Applicable

### (iii) Other significant contracts

No other significant contract

## VII Fulfillment of commitment

### (i) During reporting period or continue to reporting period, commitment items of listed company, shareholders who have over 5% of shares, controlling shareholders and substantial controller

Commitment items	Commitment	Fulfillment
Commitments regarding to the assets reorganization	<p>Agreement of Assets Replacement, it is noted that 30 inns among the transferred in and acquired assets of Jin Jiang Inn have the properties' defects problems. For the purpose of resolving the above defects problems and setting the timetables, as at 1 March 2010, Jin Jiang International (Holdings) Co., Ltd. acknowledged for below:</p> <p>1) If Jin Jiang International (Holdings) Co., Ltd. failed to solve the properties' defects problems within the scheduled timetable and quantities, that means the amount of the inns to be declined to 20% within 12</p>	<p>As at the reporting date, among all of the operating inns which have properties' defects problems, 20 inns have obtained the legal lease record proofs or confirmations issued by Bureau of Land and Resources, which means that they don't have properties' defects problems. There is no significant risk caused by not obtaining ownership's certificate, land use right certificate or having difference between the record proofs and operation.</p>

	<p>months; or to be declined to 10% within 24 months; or to be totally solved within 36 months after the approvals of CSRC, Jin Jiang International (Holdings) Co., Ltd will undertake the default penalty for the cancellation of the rental contract and should make the compensation by the evaluated amount of the assets at the base date of appraisal (31 July 2009).</p> <p>2) 2) In the future operation of the transferred in and acquired assets, the several lease inns of Jin Jiang Inn may have to relocate due to the relevant defects. In the case that the lessors couldn't fully compensate the loss, Jin Jiang International (Holdings) Co., Ltd. should fully compensate the inns for their loss as the support to relocation and reopening in accordance with the below calculation. The specific loss amount of an asset should be settled as the higher of the evaluated amount of the assets at the base date of appraisal (31 July 2009) and total original cost of fixed assets and decoration based upon the audit result of 31 July 2009. After the compensation by Jin Jiang International (Holdings) Co., Ltd, any compensation repayment from the lessors will belong to Jin Jiang International (Holdings) Co., Ltd. Meanwhile, Jin Jiang International (Holdings) Co., Ltd. should compensate the relevant inns of the fiscal year audited net profit before close to make up for the loss of business during the inn closed.</p>	<p>As at the reporting date, since the lease inns of Jin jiang Inn do not have properties' defects problems, Jin Jiang International (Holdings) Co., Ltd. does not need to implement the commitments and as also doesn't violate the commitments.</p>
	<p>The reorganization report discloses: On 22 December 2009, Jin Jiang International made a commitment to provide full guarantee for the whole balance of deposits and all of the other financial assets, which are deposited in Jin Jiang International Finance Co., Ltd. of the Company and its subsidiaries from the base date of appraisal (31 July 2009). For example, Jin Jiang International will pay the deposits and interest for Jin Jiang International Finance Co., Ltd. to the Company and its subsidiaries when Jin Jiang International Finance</p>	<p>During the reporting period, Jiang International Finance Co., Ltd. did not have payment crisis for the deposits and interest of the Company and its subsidiaries. Therefore, there was no necessary for Jin Jiang International to fulfill the commitment.</p>

	Co., Ltd. is unable to pay.	
	Jin Jiang hotels group provided < Commitment of transactions about preventing horizontal competition>,which committed Jin Jiang hotel group and controlled companies(excluded Jin Jiang international hotels development Co., Ltd and affiliated companies) would not do any business which Jin Jiang international hotels development Co., Ltd has been doing and may occurred any competition, or Jin Jiang hotel group and controlled companies would these related business transfer to Jin Jiang international hotels development C., Ltd based on equitable, fair market value.	Since this commitments has been executing, Jin Jiang hotels has committed seriously, and has not had any horizontal competition or profit conflicts with Jin Jiang international hotels development Co., Ltd

## Explanation of Effects of changes in long-term equity investment policies on consolidated financial statements

According to <Enterprise accounting policy article 2-long-term equity investment>, for long-term equity investment which has no control, joint control, significant effects, and these fair value cannot be measured reliably, the company will measure the investment based on the cost of AFS financial assets, and the investments would not be considered as long-term equity investment to be measured. In addition, the company will adjust the fair through retrospective application.

Executing above policy, Effects only has on the value amount of AFS financial assets and long-term equity investment. Not effects on the ending balance of total assets, total liabilities, net assets and net profit

Note: during reporting period, According to the China securities regulatory commission <Approval

about Shenyin&wanguo securities Co., Ltd issue shares to absorb and acquire Hongyuan securities Co., Ltd >

The permission of securities regulatory [2014] #1279. Shenyin&Wanguo securities Co.,Ltd acquired Hongyuan securities Co., Ltd through shares exchanging., After recombination, the name of company changed to Shenwan&hongyuan Group LLC. On January 26<sup>th</sup>, 2015, the company is listed in Shenzhen stock exchange ( Share abbreviation; Shenwanhongyuan code of share:000166).At the disclosure date of the report, the company possess 11,088,566 shares of Shenwan&honyuan, which takes 0.07% of total Shenwan&hongyuan shares)

## AUDITORS' REPORT

### TO THE SHAREHOLDERS OF SHANGHAI JIN JIANG INTERNATIONAL HOTELS DEVELOPMENT CO., LTD.:

We have audited the accompanying financial statements of Shanghai Jin Jiang International Hotels Development Co., Ltd. ("the Company"), which comprise the company's and consolidated balance sheets as at 31 December 2014, and the company's and consolidated income statements, the company's and consolidated statements of changes in shareholders' equity and the company's and consolidated cash flow statements for year then ended, and the notes to the financial statements.

#### 1. Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements. This responsibility includes: (1) preparing the financial statements in accordance with Accounting Standards for Business Enterprises to achieve fair presentation of the financial statements; (2) designing, implementing and maintaining internal control that is necessary to enable the financial statements that are free from material misstatement, whether due to fraud or error.

#### 2. Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Chinese Certified Public Accountants Auditing Standards. Those standards require that we comply with Code of Ethics for Chinese Certified Public Accountants and plan and perform the audit to obtain reasonable assurance as to whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the judgment of the Certified Public Accountant, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the Certified Public Accountant considers the internal control relevant to the preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### 3. Opinion

In our opinion, the financial statements of the Company have been prepared in accordance with Accounting Standards for Business Enterprise in all material respect and present fairly the company's and consolidated financial position as of 31 December 2014, and the company's and consolidated results of operations and cash flows for the 6 months period then ended.

## **I GENERAL**

Shanghai Jin Jiang International Hotels Development Co., Ltd. (the "Company") is a limited company incorporated in Shanghai, the People's Republic of China (the "PRC"), on 9 June 1993 as a joint stock limited company. The Company and its subsidiaries ("together, the Group") are principally engaged in operation and management of limited service hotels and food and cuisine.

The company holds a business license with which registration number is 310000400101473. The legal representative is Yu Minliang.

In June 1993, the Company was established by private placing with total share capital of RMB 235,641,500.

In December 1994, the Company issued 100,000,000 domestically-listed foreign shares (B shares) of RMB 1 per share at premium with the issue price of USD 0.35 per share. On 15 December 1994, these shares commenced listing in Shanghai Stock Exchange and the share capital of the Company accordingly increased to RMB 335,641,500.

In September 1996, the Company issued public offering of 19,000,000 domestically-listed RMB ordinary shares (A share) of RMB 1 per share at premium with the issue price of RMB 4.90. On October 11st 1996, these A shares, together with 6,000,000 staff owned shares, commenced listing in Shanghai Stock Exchange and the share capital of the Company accordingly increased to RMB 354,641,500.

In July 1997, the Company capitalized its capital surplus into share capital on a 10:2 proportion, resulting in the increase of share capital to RMB 425,569,800.

In July 1998, the Company prorated 2 bonus shares for every 10 shares to all shareholders and capitalized its capital surplus into share capital on a 10:1 proportion, resulting in the increase of share capital to RMB 553,240,740.

In January 2001, upon the approval of China Securities Regulatory Commission, the Company issued additional offering of 50,000,000 domestically-listed RMB ordinary shares (A shares) of RMB 1 per share at premium with the issue price of RMB 10.80. The Additional offering commenced listing in Shanghai Stock Exchange started from 19 January 2001 and the share capital of the Company accordingly increased to RMB 603,240,740.

On 23 January 2006, the share merger reform was carried out. The unlisted A share shareholders of the Company transferred to public A shareholders registered in the book as at the registration date of equity shares(19 January 2006)3.1 shares for every 10 listed shares. In accordance with the share merger reform program, 49,009,806 of non-tradable floating shares were listed on 23 January 2007, 10,065,610 of non-tradable floating shares were listed on 21 March 2007, 30,162,037 of non-tradable floating shares were listed on 23 January 2008 and 229,151,687 of non-tradable floating shares were listed on 23 January 2009. As at 23 January 2009, all shares held by the shareholders formerly holding the unlisted shares were listed, 318,389,140 of non-tradable floating shares were listed.

On 29 October 2014, in accordance with China securities regulatory commission regulatory permission to [2014] no. 1129 <on the approval of non-public share issuance of Shanghai jin jiang international hotel development co., LTD.,>, China Securities Regulatory Commission approved non-public share issuing items of the company. According to the approval, the company issued 201,277,000 (A share) non-public issuing shares which have RMB 1 per share at premium with the issue price of RMB 15.08 per share to HongYi(Shanghai) Investment fund center (Limited Partnership) ("HongYi investment fund) and Shanghai Jinjiang International Hotels (Group) CO.,LTD ("Jinjiang Hotels Group"). Total raised fund is RMB 3,035,257,160. Total raised fund deduct issuing expense RMB 7,001,277, net raised fund is RMB3,028,255,883 in which RMB 201,277,000 included in equity and RMB 2,826,978,883 included in capital reserve.

As on 31 December 2014, total share capital of the Company was RMB 804,517,740. Jin Jiang Hotels Group held 404,810,935 unrestricted tradable shares of the Company, representing 50.32% of the total share capital and was the parent of the Company. Jin Jiang International (Holdings) Co., Ltd. ("Jin Jiang International") was the parent company of Jin Jiang Hotels Group and the ultimate holding company of the Company.

## **I GENERAL – continued**

The shareholding structure of the Company is stated in note (V) 30.

On 26 March 2015, Board of Directors of the Company authorized these financial statements for issuance.

## **II: BASIS OF PREPARATION OF FINANCIAL STATEMENTS**

The group performs the ministry of finance issued enterprise accounting standard (including new and revised the accounting standard for business enterprises promulgated in 2014 promulgated) and relevant regulations. In addition, the group also prepared in accordance with <the company information disclosure rules No 15<sup>th</sup> - general provisions of the financial statements (revised in 2014) of publicly issued securities information disclosure rules> to disclose the financial information.

## **III: PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES**

### **1. Important accounting policy and measurement**

Financial statements prepared by the company meet the requirements of accounting standards for enterprises. These financial statements fully reflect the real financial condition of the company and consolidation in December 31<sup>st</sup> 2014 ,and reflect the operating results and cash flow of the company and consolidation.

### **2. Basis of accounting and principle of measurement**

The Group has adopted the accrual basis of accounting. Except for [investment properties and] certain financial instruments which are measured at fair value, the Group adopts the historical cost as the principle of measurement in the financial statements. Where assets are impaired, provisions for asset impairment are made in accordance with relevant requirements.

Where the historical cost is adopted as the measurement basis, assets are recorded at the amount of cash or cash equivalents paid or the fair value of the consideration given to acquire them at the time of their acquisition.

Liabilities are recorded at the amount of proceeds or assets received or the contractual amounts for assuming the present obligation, or, at the amounts of cash or cash equivalents expected to be paid to settle the liabilities in the normal course of business

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using valuation technique. Fair value measurement and/or disclosure in the financial statements are determined according to the above basis.

Fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

### **3. Accounting period**

The Group has adopted the calendar year as its accounting year, i.e. from 1 January to 31 December.

### **4. Business cycle**

Business cycle is defined as the period that the company starts from purchasing asset for process till receiving cash or cash equivalents. Business cycle of the company is normally identified as 12 months.

### **III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued**

#### **5. Functional currency**

Renminbi ("RMB") is the currency of the primary economic environment in which the Group operates. The functional currency of the Group is RMB. RMB is used as reporting currency to prepare the financial statements.

#### **6. Business combinations under common control and under non common control**

Business combinations are classified into business combinations involving enterprises under common control and business combinations not involving enterprises under common control.

##### 6.1 A business combination involving enterprises under common control

A business combination involving enterprises under common control is a business combination in which all of the combining enterprises are ultimately controlled by the same party or parties both before and after the combination, and that control is not transitory.

Assets and liabilities obtained are measured at their respective carrying amounts as recorded by the combining entities at the date of the combination. The difference between the carrying amount of the net assets obtained and [the carrying amount of the consideration paid for the combination / the aggregate face value of shares issued as consideration] is adjusted to the share premium in capital reserve. If the share premium is not sufficient to absorb the difference, any excess is adjusted against retained earnings.

Costs that are directly attributable to the combination are charged to profit or loss in the period in which they are incurred.

##### 6.2 A business combination not involving enterprises under common control and goodwill

A business combination not involving enterprises under common control is a business combination in which all of the combining enterprises are not ultimately controlled by the same party or parties before and after the combination.

The cost of combination is the aggregate of the fair values, at the acquisition date, of the assets given, liabilities incurred or assumed, and equity securities issued by the acquirer in exchange for control of the acquiree. [Where a business combination not involving enterprises under common control is achieved in stages that involve multiple transactions, the cost of combination is the sum of the consideration paid at the acquisition date and the fair value at the acquisition date of the acquirer's previously held interest in the acquiree.] The intermediary expenses incurred by the acquirer in respect of auditing, legal services, valuation and consultancy services, etc. and other associated administrative expenses attributable to the business combination are recognised in profit or loss when they are incurred.

The acquiree's identifiable assets, liabilities and contingent liabilities, acquired by the acquirer in a business combination, that meet the recognition criteria are measured at fair value at the acquisition date.

Where the cost of combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is treated as an asset and recognised as goodwill, which is measured at cost on initial recognition. Where the cost of combination is less than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the acquirer firstly reassesses the measurement of the fair values of the acquiree's identifiable assets, liabilities and contingent liabilities and measurement of the cost of combination. If after that reassessment, the cost of combination is still less than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the acquirer recognises the remaining difference immediately in profit or loss for the current period.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued**

**7. PREPARATION OF CONSOLIDATION FINANCIAL STATEMENTS**

The scope of consolidation in the consolidated financial statements is determined on the basis of control. Control exists when the investor has power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power over the investee to affect its returns. The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes of the above elements of the definition of control.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary.

For a subsidiary disposed of by the Group, the operating results and cash flows before the date of disposal (the date when control is lost) are included in the consolidated income statement and consolidated statement of cash flows, as appropriate.

For a subsidiary acquired through a business combination not involving enterprises under common control, the operating results and cash flows from the acquisition date (the date when control is obtained) are included in the consolidated income statement and consolidated statement of cash flows, as appropriate.

No matter when the business combination occurs in the reporting period, subsidiaries acquired through a business combination involving enterprises under common control [or the party being absorbed under merger by absorption] are included in the Group's scope of consolidation as if they had been included in the scope of consolidation from the date when they first came under the common control of the ultimate controlling party. Their operating results and cash flows from the beginning of the earliest reporting period [or from the date when they first came under the common control of the ultimate controlling party] are included in the consolidated income statement and consolidated statement of cash flows, as appropriate.

The significant accounting policies and accounting periods adopted by the subsidiaries are determined based on the uniform accounting policies and accounting periods set out by the Company.

The effects of all intra-group transactions are eliminated on consolidation.

The portion of subsidiaries' equity that is not attributable to the Company is treated as minority interests and presented as "minority interests" in the consolidated balance sheet within [owners' equity/ shareholders' equity]. The portion of net profits or losses of subsidiaries for the period attributable to minority interests is presented as "minority interests" in the consolidated income statement below the "net profit" line item.

When the amount of loss for the period attributable to the minority shareholders of a subsidiary exceeds the minority shareholders' portion of the opening balance of owners' equity of the subsidiary, the excess amount are still allocated against minority interests.

Acquisition of minority interests or disposal of interest in a subsidiary that does not result in the loss of control over the subsidiary is accounted for as equity transactions. The carrying amounts of the Company's interests and minority interests are adjusted to reflect the changes in their relative interests in the subsidiary. The difference between the amount by which the minority interests are adjusted and the fair value of the consideration paid or received is adjusted to capital reserve under owners' equity. If the capital reserve is not sufficient to absorb the difference, the excess are adjusted against retained earnings.

### **III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued**

#### **7. PREPARATION OF CONSOLIDATION FINANCIAL STATEMENTS - continued**

When the Group loses control over a subsidiary due to disposal of certain equity interest or other reasons, any retained interest is re-measured at its fair value at the date when control is lost. The difference between (i) the aggregate of the consideration received on disposal and the fair value of any retained interest and (ii) the share of the former subsidiary's net assets cumulatively calculated from the acquisition date according to the original proportion of ownership interest is recognised as investment income in the period in which control is lost, and at the same time adjusted against goodwill. Other comprehensive income associated with investment in the former subsidiary is reclassified to investment income in the period in which control is lost.

#### **8. Cash and cash equivalents**

Cash comprises cash on hand and deposits that can be readily withdrawn on demand. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

#### **9. Translation of transactions denominated in foreign currencies**

On initial recognition, foreign currency transactions are translated by applying the spot exchange rate at the dates of the transactions.

At the balance sheet date, foreign currency monetary items are translated to RMB using the spot exchange rate at that date. Exchange differences arising from the differences between the spot exchange rate prevailing at the balance sheet date and those spot rates used on initial recognition or at the previous balance sheet date are recognised in profit or loss for the current period, except for those attributable to foreign currency borrowings that have been taken out specifically for the acquisition, or construction of qualifying assets, which are capitalized as part of the cost of those assets during the capitalization period.

Foreign currency non-monetary items measured at historical cost are translated to the amounts in functional currency at the spot exchange rates on the dates of the transactions and the amounts in functional currency remain unchanged. Foreign currency non-monetary items measured at fair value are re-translated at the spot exchange rate on the date the fair value is determined. Difference between the re-translated functional currency amount and the original functional currency amount is treated as changes in fair value (including changes of exchange rate) and is recognised in profit and loss or as other comprehensive income.

#### **10. Financial instruments**

Financial assets and financial liabilities are recognised on trade date when the Group becomes a party of a financial instrument's contract. Financial assets and financial liabilities are initially measured at fair value. For those financial assets and liabilities classified as at fair value through profit or loss (FVTPL), related transaction costs are recognized directly in profit or loss; for the other kinds of financial assets and liabilities, they are initially measured at fair value, plus related transaction costs.

##### 10.1 The effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts the estimated future cash receipts (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

When calculating the effective interest rate, the Group estimates future cash flows of a financial asset or financial liability under the basis of the contractual terms (without considering the future credit losses), as well as the related cost, transaction fees and discount or premium of the charges or payments included in the effective interest rate by each party.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 10. Financial instruments - continued

##### 10.2 Classification, recognition and measurement of financial assets

On initial recognition, financial assets are classified into the following categories: financial assets ‘at fair value through profit or loss’ (FVTPL), ‘held-to-maturity’ investments, ‘loans and receivables’ and ‘available-for-sale’ (AFS) financial assets. All regular way purchase or sales of financial assets are recognised and derecognised on a settlement date basis.

Financial assets held by the Group comprise mainly receivables and available-for-sale financial assets.

##### 10.2.1. Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The accounts receivable, interest receivables, dividends receivable and other receivable are included in this category.

Loans and receivables are subsequently measured at amortised cost using the effective interest method. Gains or losses arising from derecognition, impairment or amortisation are recognized in profit or loss for the current period. The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period, using the effective interest rate.

##### 10.2.2. AFS financial assets

AFS financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified as (1) financial assets at FVTPL, (2) loans and receivables, and (3) held-to-maturity investments. Available-for-sale financial assets are included in other current assets in the balance sheet if they will be disposed within 12 months of the balance sheet date.

AFS financial assets are subsequently measured at fair value. Gain or losses arising from changes in fair value (other than impairment losses and foreign exchange gain and losses resulted from foreign currency monetary assets which are recognised in profit or loss for the current period) are recognised directly in shareholders' equity, and are reversed and recognised in profit or loss for the period when such financial assets are derecognized.

Interest received during the period in which the Group holds the AFS financial assets and cash dividends declared by the investee are recognised as investment income.

##### 10.3 Impairment of financial assets

The Group assesses at each balance sheet date the carrying amounts of financial assets other than those at fair value through profit or loss. If there is objective evidence that a financial asset is impaired, the Group determines the amount of any impairment loss. Objective evidence that a financial asset is impaired is evidence that, arising from one or more events that occurred after the initial recognition of the asset, the estimated future cash flows of the financial asset, which can be reliably measured, have been affected.

Objective evidence that a financial asset is impaired includes evidence arising from the following events:

- (1) Significant financial difficulty of the issuer or obligor;
- (2) A breach of contract, such as a default or delinquency in interest or principal payments;
- (3) The Group, for economic or legal reasons relating to the borrower's financial difficulty, granting a concession to the borrower;
- (4) It becoming probable that the borrower will enter bankruptcy or other financial reorganization;
- (5) The disappearance of an active market for that financial asset because of financial difficulties;

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 10. Financial instruments - continued

##### 10.3 Impairment of financial assets - continued

- (6) Upon an overall assessment of a group of financial assets, observable data indicates that there is a measurable decrease in the estimated future cash flows from the group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group. Such observable data includes:
- Adverse changes in the payment status of borrower in the group of assets;
  - Economic conditions in the country or region of the borrower which may lead to a failure to pay the group of assets;
- (7) Significant adverse changes in the technological, market, economic or legal environment in which the equity instrument issuer operates, indicating that the cost of the investment in the equity instrument may not be recovered by the investor;
- (8) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost;
- (9) Other objective evidence indicating there is an impairment of a financial asset.

#### - Impairment of financial assets carried at amortised cost

If financial assets carried at amortised cost are impaired, the carrying amounts of the financial assets are reduced to the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The amount of reduction is recognised as an impairment loss in profit or loss. If, subsequent to the recognition of an impairment loss on financial assets carried at amortised cost, there is objective evidence of a recovery in value of the financial assets which can be related objectively to an event occurring after the impairment is recognised, the previously recognised impairment loss is reversed. However, the reversal is made to the extent that the carrying amount of the financial asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

For a financial asset that is individually significant, the Group assesses the asset individually for impairment. For a financial asset that is not individually significant, the Group assesses the asset individually for impairment or includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset (whether significant or not), it includes the asset in a group of financial assets with similar credit risk characteristics and collectively reassesses them for impairment. Assets for which an impairment loss is individually recognised are not included in a group of financial assets with similar credit risk characteristics for collective assessment of impairment.

#### - Impairment of AFS financial assets

For AFS equity instrument investment, at balance sheet date, if the fair value of one equity instrument investment is lower than 50%(included 50%) of the cost, or lower than the initial cost of investment over 12 months (included 12 months), We consider that the fair value has serious or non-temporary decline, which means impairment accrued

When an available-for-sale financial asset is impaired, the cumulative loss arising from decline in fair value previously recognised directly in capital reserve is reclassified from the capital reserve to profit or loss. The amount of the cumulative loss that is reclassified from capital reserve to profit or loss is the difference between the acquisition cost (net of any principal repayment and amortisation) and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss.

If, subsequent to the recognition of an impairment loss on available-for-sale financial assets, there is objective evidence of a recovery in value of the financial assets which can be related objectively to an event occurring after the impairment is recognised, the previously recognised impairment loss is reversed. The amount of reversal of impairment loss on available-for-sale equity instruments is recognised as other comprehensive income, while the amount of reversal of impairment loss on available-for-sale debt instruments is recognised in profit or loss.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 10. Financial instruments - continued

##### 10.3 Impairment of financial assets - continued

- Impairment of financial assets carried at cost

If an impairment loss has been incurred on an investment in unquoted equity instrument (without a quoted price in an active market) whose fair value cannot be reliably measured, or on a derivative financial asset that is linked to and must be settled by delivery of such an unquoted equity instrument, the carrying amount of the financial asset is reduced to the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. The amount of reduction is recognised as an impairment loss in profit or loss. The impairment loss on such financial asset is not reversed once it is recognised.

##### 10.4 transfer of financial assets

The Group derecognizes a financial asset only when: (1) the contractual rights to the cash flows from the financial asset expire; or (2) it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity; or (3) it transfers the financial asset, neither transfers nor retains substantially all the risks and rewards of ownership but has not retained control over the financial assets.

If the group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, and retains its control of the financial asset, it recognizes the financial asset to the extent of its continuing involvement in the transferred financial asset and recognized an associated liability. The extent of the enterprise's continuing involvement in the transferred asset is the extent to which it is exposed to changes in the value of the transferred asset.

For a transfer of a financial asset in its entirety that satisfies the derecognition criteria, the difference between (1) the carrying amount of the financial asset transferred; and (2) the sum of the consideration received from the transfer and any cumulative gain or loss that has been recognised in other comprehensive income, is recognised in profit or loss.

##### 10.5 Classification, recognition and measurement of financial liabilities

Financial instruments issued by the Group are classified in accordance with the economic substance of the contractual arrangements instead of the legal form as well as the definitions of a financial liability and an equity instrument; on initial recognition, financial instruments or their component parts are classified as either financial liabilities or equity instruments.

On initial recognition, financial liabilities are classified as either financial liabilities at 'fair value through profit or loss' (FVTPL) or 'other financial liabilities'. Other financial liabilities are main financial liabilities of the Group

##### Other financial liabilities

For a derivative liability that is linked to and must be settled by delivery of an unquoted equity instrument (without a quoted price in an active market) whose fair value cannot be reliably measured, it is subsequently measured at cost. Other financial liabilities other than financial guarantee contract obligations are subsequently measured at amortised cost using the effective interest method, with gain or loss arising from derecognition or amortisation recognised in profit or loss.

##### 10.6 Derecognition of financial liabilities

The Group derecognizes a financial liability (or part of it) only when the underlying present obligation (or part of it) is discharged. An agreement between the Group (an existing borrower) and an existing lender to replace the original financial liability with a new financial liability with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability.

When the Group derecognises a financial liability or a part of it, it recognises the difference between the carrying amount of the financial liability (or part of the financial liability) derecognised and the consideration paid (including any non-cash assets transferred or new financial liabilities assumed) in profit or loss.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued****10. Financial instruments – continued**10.7 Offsetting financial assets and financial liabilities

When the Group has a legal right that is currently enforceable to set off the recognised financial assets and financial liabilities, and intends either to settle on a net basis, or to realise the financial asset and settle the financial liability simultaneously, financial assets and financial liabilities are offset with the net amounts presented on the balance sheet. Otherwise, financial assets and financial liabilities are separately presented on the balance sheet without offsetting.

10.8 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. Equity instruments issued (including refinanced), repurchased, sold or cancelled by the Group are treated as changes in equity. Changes in the fair value of equity instruments are not recognised. Transaction costs related to equity transactions are deducted from equity.

The Group's distribution to holders of equity instruments are treated as a distribution of profits, payment of stock dividends does not affect total [owner's equity / shareholders' equity].

**11. Accounts receivable**11.1 Individually significant receivables that are individually evaluated for impairment

Determining basis or the standard amount of individually significant receivables	The Group recognizes accounts receivable of over RMB5,000,000(included RMB5,000,000) as individually significant receivables.
Measurement of the provision for impairment of individually significant receivables that are individually evaluated for impairment	Receivables that are individually significant are subject to separate impairment assessment, if there is objective evidence that the Group will not be able to collect the full amounts according to the original terms, a provision for impairment of the receivable is established. The provision for impairment of the receivable is established at the difference between the carrying amount of the receivable and the present value of estimated future cash flow.

11.2 Receivables being grouped evaluated for impairment

Recognition of the provision for impairment of the receivable being grouped evaluated for impairment	
Account receivable of limited service business hotel on operation and management	Aging analysis

The ratios of bad debt provision being provided by aging analysis are as below:

Aging	Ratio of bad debt provision (%)
Within 3 months	-
3-6 months	0.50
6 months-1 year	25.00
After 1 year	100.00

Except for above trade receivables, other receivables' provisions for impairment are provided individually.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued****11. Accounts receivable - continued**11.3 Individually insignificant receivables that are individually evaluated for impairment

The reason of individually evaluating for impairment	Have objective evidence that the single amount is not significant, but the special impairment of receivables should be separately tested.
Single amount is not significant but the method of single provision for bad debts	Do the impairment test separately, and use the difference between fair value of future cash flow and its book value to record in the current profits and losses.

**12. Inventories**12.1 Classification of inventories

The Group's inventories include raw materials, finished goods, goods in stock and materials for override processing, and are measured at the lower of cost and net realizable value. The cost of finished goods comprises raw materials, direct labor and related production overhead expenditures based on normal operating capacity.

12.2 The measurement of inventories issued

Cost of sales is determined using the first-in; first-out ("FIFO") method and weighted average method.

12.3 Recognition of the net realizable value and measurement of provision for decline in value of inventories

At the balance sheet date, inventories are measured at the lower of cost and net realizable value. If the cost of inventories is higher than the net realizable value, a provision for decline in value of inventories is recognized. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale and relevant taxes. The Group determines the net realizable value of inventories based on solid evidence obtained and after taking into consideration the purpose for which the inventory is held, and the effect of events occurring after the balance sheet date.

For inventories, the excess of cost over the net realizable value is generally recognized as provision for decline in value of inventories on an item-by-item basis.

After provision for decline in value of inventories has been made, if the circumstances that previously caused inventories to be written down no longer exist which results in the net realizable value is higher than the carrying amount, the amount of the write-down is reversed in profit or loss for the current period; the reversal is limited to the amount originally provided for the decline in value of inventories.

12.4 The stock count system for inventories

The perpetual inventory system is adopted for stock count.

12.5 Amortization methods of low-value consumables and packaging materials

Reusable materials are materials that will transfer their values gradually through multiple usages without changing their original shapes while they are not recognized as fixed assets, including packaging materials and low-value consumables.

Low-value consumables are written off in full when issued for use. Significant amount of low value consumables used in the commencement of hotels are amortized within 12 months after issue.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 13. Long-term equity investments

##### 13.1 Basis for determining joint control and significant influence over investee

Control exists when the investor has power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power over the investee to affect its returns. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control.

Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies. When determining whether an investing enterprise is able to exercise control or significant influence over an investee, the effects of potential voting rights of the investee (for example, warrants and convertible debts) held by the investing enterprises or other parties that are currently exercisable or convertible have been considered.

##### 13.2 Determination of initial investment cost

For a long-term equity investment acquired through a business combination involving enterprises under common control, the initial investment cost of the long-term equity investment is the attributable share of the carrying amount of the [shareholders' / owners'] equity of the acquiree at the date of combination in the consolidated financial statements of the ultimate controlling party. The difference between the initial investment cost and the carrying amount of cash paid, non-cash assets transferred and liabilities assumed adjusted to capital reserve. If the balance of capital reserve is not sufficient, any excess is adjusted to retained earnings. If the consideration of the combination is satisfied by the issue of equity securities, the initial investment cost of the long-term equity investment is the attributable share of the carrying amount of the [shareholders' / owners'] equity of the acquiree in the consolidated financial statements of the ultimate controlling party. The aggregate face value of the shares issued is accounted for as share capital. The difference between the initial investment cost and the aggregate face value of the shares issued is adjusted to capital reserve. If the balance of capital reserve is not sufficient, any excess is adjusted to retained earnings.

For a long-term equity investment acquired through business combination not involving enterprises under common control, the initial investment cost of the long-term equity investment is the cost of acquisition at the date of combination.

The intermediary fees incurred by the absorbing party or acquirer such as audit legal, valuation and consulting fee, etc. and other related administrative expenses attributable to the business combination are recognised in profit or loss when they are incurred.

The long-term equity investment acquired otherwise than through a business combination is initially measured at its cost. When the entity is able to exercise significant influence or joint control (but not control) over an investee due to [additional investment], the cost of long-term equity investments is the sum of the fair value of previously-held equity investments determined in accordance with *Accounting Standard for Business Enterprises No.22–Financial Instruments; Recognition and Measurement* (CAS 22) and the additional investment cost.

##### 13.3 Subsequent measurement and recognition of profit and loss

###### 13.3.1. A long-term equity investment accounted for using the cost method

Long-term equity investments in subsidiaries are accounted for using the cost method in the Company's separate financial statements. A subsidiary is an investee that is controlled by the Group.

Under the cost method, a long-term equity investment is measured at initial investment cost. When additional investment is made or the investment is recouped, the cost of the long-term equity investment is adjusted accordingly. Investment income is recognised in the period in accordance with the attributable share of cash dividends or profit distributions declared by the investee.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 13. Long-term equity investments - continued

##### 13.3.2 A long-term equity investment accounted for using the equity method

The Group accounts for investment in associates and joint ventures using the equity method. An associate is an entity over which the Group has significant influence; a joint venture is a joint arrangement whereby the Group has rights to the net assets of the arrangement.

Under the equity method, where the initial investment cost of a long-term equity investment exceeds the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, no adjustment is made to the initial investment cost. Where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, the difference is recognised in profit or loss for the period, and the cost of the long-term equity investment is adjusted accordingly.

Under the equity method, the Group recognises its share of the net profit or loss and other comprehensive income made by the investee as investment income and other comprehensive income respectively, and adjust the carrying amount of the long-term equity investment accordingly; The carrying amount of the investment is reduced by the portion of any profit distributions or cash dividends declared by the investee that is distributed to the Group; the share of changes in owners' equity of the investee other than those arising from net profit or loss, other comprehensive income and profit distribution are recognized in the capital reserve the carrying amount of the long-term equity investment is adjusted accordingly. The Group recognises its share of the investee's net profit or loss after making appropriate adjustments based on the fair value of the investee's individual separately identifiable assets, etc. at the acquisition date. Where the accounting policies and accounting period adopted by the investee are not consistent with those of the Group, the Group shall adjust the financial statements of the investee to conform to its own accounting policies and accounting period, and recognise investment income and other comprehensive income based on the adjusted financial statements. For the Group's transactions with its associates and joint ventures where assets contributed or sold does not constitute a business, unrealised intra-group profits or losses are recognised as investment income or loss to the extent that those attributable to the Group's proportionate share of interest are eliminated. However, unrealised losses resulting from the Group's transactions with its associates and joint ventures which represent impairment losses on the transferred assets are not eliminated.

The Group discontinues recognising its share of net losses of the investee after the carrying amount of the long-term equity investment together with any long-term interests that in substance form part of its net investment in the investee is reduced to zero. If the Group has incurred obligations to assume additional losses of the investee, a provision is recognised according to the expected obligation, and recorded as investment loss for the period. Where net profits are subsequently made by the investee, the Group resumes recognising its share of those profits only after its share of the profits exceeds the share of losses previously not recognised.

##### 13.4 Disposal of long-term equity investments

On disposal of a long term equity investment, the difference between the proceeds actually received and receivable and the carrying amount is recognized in profit or loss for the period. For a long-term equity investment accounted for using the equity method, the amount included in the [owners' /shareholders'] equity attributable to the percentage interest disposed is transferred to profit or loss for the period.

#### 14. Fixed assets

##### 14.1 Recognition criteria for fixed assets

Fixed assets are tangible assets that are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes, and have useful lives of more than one accounting year. A fixed asset is recognised only when it is probable that economic benefits associated with the asset will flow to the Group and the cost of the asset can be measured reliably. Fixed assets are initially measured at cost.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued****14. Fixed assets - continued**14.1 Recognition criteria for fixed assets - continued

Subsequent expenditures incurred for the fixed asset are included in the cost of the fixed asset if it is probable that economic benefits associated with the asset will flow to the Group and the subsequent expenditures can be measured reliably. Meanwhile the carrying amount of the replaced part is derecognised. Other subsequent expenditures except for above expenditures that included in the cost of fixed asset are recognised in profit or loss in the period in which they are incurred.

14.2 Depreciation methods

Depreciation is provided to write off the cost of each category of fixed assets after deducting their estimated residual values over their estimated useful lives from the month after they are brought to working condition for the intended use, using the straight-line method. For the fixed assets being provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The useful lives, estimated net residual values rates and annual depreciation rates of each class of fixed assets are as follows:

Category of fixed assets	Depreciation methods	Useful life (years)	Residual value(%)	Annual depreciation rates (%)
Buildings	Straight-Line Depreciation	20-40	5-10	2.25-4.75
Equipment	Straight-Line Depreciation	3-15	5-10	6.00-31.67
Motor vehicles	Straight-Line Depreciation	4-10	5-10	9.00-23.75
Renovation expenditure	Straight-Line Depreciation	5	0	20.00

Estimated net residual value of a fixed asset is the estimated amount that the Group would currently obtain from disposal of the asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

14.3 Recognition, measurement and depreciation method of fixed assets leased under finance leases

A finance lease is a lease that transfers in substance all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred. The leased asset is recorded at the amount equal to the lower of the fair value of the leased asset and the present value of the minimum lease payments. Consistent depreciation policies are adopted to finance leased fixed assets. Leased fixed assets are depreciated over the estimated useful lives when it is reasonably determined that the ownership of the asset will be obtained after the lease term is over. Otherwise, the leased assets are depreciated over the shorter period between the lease term and the estimated useful lives of the assets.

14.4 Others

The Group reviews the useful life and estimated net residual value of a fixed asset and the depreciation method applied at least at each financial year-end. A change in the useful life or estimated net residual value of a fixed asset or the depreciation method used is accounted for as a change in an accounting estimate.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued****14. Fixed assets - continued**14.4 Others - continued

A fixed asset is derecognized on disposal or when no future economic benefits are expected from its use or disposal. When a fixed asset is sold, transferred, retired or damaged, the Group recognises the amount of any proceeds on disposal of the asset net of the carrying amount and related taxes in profit or loss for the current period.

**15. Construction in progress**

Construction in progress is measured at its actual costs. The actual costs include various construction expenditures during the construction period, [borrowing costs capitalised before it is ready for intended use] and other relevant costs. Construction in progress is not depreciated. Construction in progress is transferred to a fixed asset when it is ready for intended use.

**16. Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying asset are capitalised when expenditures for such asset and borrowing costs are incurred and activities relating to the acquisition, construction or production of the asset that are necessary to prepare the asset for its intended use or sale have commenced. Capitalisation of borrowing costs ceases when the qualifying asset being acquired, constructed or produced becomes ready for its intended use or sale. [Capitalisation of borrowing costs is suspended during periods in which the acquisition, construction or production of a qualifying asset is suspended abnormally and when the suspension is for a continuous period of more than 3 months. Capitalisation is suspended until the acquisition, construction or production of the asset is resumed.]

Other borrowing costs are recognised as an expense in the period in which they are incurred.

Where funds are borrowed under a specific-purpose borrowing, the amount of interest to be capitalised is the actual interest expense incurred on that borrowing for the period less any bank interest earned from depositing the borrowed funds before being used on the asset or any investment income on the temporary investment of those funds. Where funds are borrowed under general-purpose borrowings, the Group determines the amount of interest to be capitalised on such borrowings by applying a capitalisation rate to the weighted average of the excess of cumulative expenditures on the asset over the amounts of specific-purpose borrowings. The capitalisation rate is the weighted average of the interest rates applicable to the general-purpose borrowings.

**17. Intangible assets**

An intangible asset is an identifiable non-monetary asset without physical substance owned or controlled by the Group.

An intangible asset is initially measured at cost. The expenditures incurred on an intangible asset is recognised as cost of the intangible asset only if: 1) it is probable that economic benefits associated with the asset will flow to the Group; and 2) the cost of the asset can be measured reliably. Other expenditures on an intangible asset that fail to meet the recognition criteria are charged to profit or loss when incurred.

An intangible asset with a finite useful life is amortised using the straight-line method over its useful life when the asset is available for use. An intangible asset with an indefinite useful life is not amortised. Each intangible asset amortization method, useful life(year) and residual value are as follow:

Category of intangible assets	Amortization method	Useful life (year)	Residual value (%)
Land-use right	Straight-line amortization	40	-
The beneficial right of the long-term leases	Straight-line amortization	5-17	-
Software	Straight-line amortization	2-10	-

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued****17. Intangible assets - continued**

For an intangible asset with a finite useful life, the Group reviews the useful life and amortisation method at least at each financial year-end and makes changes if necessary.

**18. Impairment of long-term assets**

The Group assesses at each balance sheet date whether there is any indication that intangible assets with finite useful life may be impaired. If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Group determines the recoverable amount of the asset group to which the asset belongs. If the recoverable amount of an asset is less than its carrying amount, the difference is recognised as an impairment loss and charged to profit or loss for the current period.

An intangible asset with an indefinite useful life or an intangible asset that is yet to be available for use is tested for impairment annually, irrespective of whether there is any indication that the asset may be impaired.

Once any loss of asset impairment is recognized, it is not reversed in a subsequent period.

**19. Long-term prepayment**

Long-term prepayments are various expenditures incurred but that should be allocated over the current and future periods of more than one year. Long-term prepayments are evenly amortised over the respective beneficial period.

The estimated beneficial periods and annual amortization rate are as follows:

Categories of long-term prepayment	Estimated beneficial periods	Annual amortization rate (%)
Leasehold improvement	The shorter period among the lease term, useful period and the operating period.	-
Leasehold decoration	5	20.00
Others	Lease term under contract	-

**20. Employee compensation****20.1 Accounting treatment of short-term compensation**

Actually occurred short-term employee benefits are recognised as liabilities, with a corresponding charge to the profit or loss for the period or in the costs of relevant assets in the accounting period in which employees provide services to the Group. Staff welfare expenses incurred by the Group are recognised in profit or loss for the period or the costs of relevant assets based on the actually occurred amounts when it actually occurred. Non-monetary staff welfare expenses are measured at fair value.

Payment made by the Group of social security contributions for employees such as premiums or contributions on medical insurance, work injury insurance and maternity insurance, etc. and payments of housing funds, as well as union running costs and employee education costs provided in accordance with relevant requirements, are calculated according to prescribed bases and percentages in determining the amount of employee benefits and recognised as relevant liabilities, with a corresponding charge to the profit or loss for the period or the costs of relevant assets in the accounting period in which employees provide services.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 20. Employee compensation - continued

##### 20.2 Accounting treatment of termination by the Group

When the Group terminates the employment relationship with employees before the end of the employment contracts or provides compensation as an offer to encourage employees to accept voluntary redundancy, if the Group has a formal plan for termination of employment relationship or has made an offer for voluntary redundancy which will be implemented immediately, and at the same time the Group cannot unilaterally withdraw from the termination plan or the redundancy offer, a provision is recognised for the compensation arising from termination of employment relationship with employees, with a corresponding charge to the profit or loss for the current period.

##### 20.3 Accounting treatment of welfare termination

When the Group provides termination benefits to employees, employee benefit liabilities are recognised for termination benefits, with a corresponding charge to the profit or loss for the period at the earlier of: (1) when the Group cannot unilaterally withdraw the offer of termination benefits because of the termination plan or a curtailment proposal; and (2) when the Group recognises costs or expenses related to restructuring that involves the payment of termination benefits.

#### 21. Provisions

Provisions are recognised when the Group has a present obligation related to a contingency such as [products quality assurance/ onerous contract/ restructuring], it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account factors pertaining to a contingency such as the risks, uncertainties and time value of money. Where the effect of the time value of money is material, the amount of the provision is determined by discounting the related future cash outflows.

#### 22. Revenue

##### 22.1 Revenue from the sale of goods

Revenue is recognised when the Group has delivered products to the location specified in the sales contracts and the distributor has confirmed the acceptance of the products. The Company remains no effective control over the goods after the consignment and the economic benefits associated with the transaction will flow to the Group, the relevant revenue can be reliably measured and specific revenue recognition criteria have been met.

##### 22.2 Revenue arising from the rendering of services

Revenue for the Group's provision of hotel accommodation services to external parties is recognized when the services are rendered and the right of collect service charge is obtained.

Amounts received or receivable from business rendering service with awards points granted to customers should be allocated between revenue from the service and fair value of awards points. Cash received or amounts receivable less the fair value of awards points is recognized as revenue, the fair value of awards points is recognized as deferred income.

When customers exchange awards points, the Group recognised amounts previously recorded as deferred income as revenue calculated upon the basis of percentage of amounts exchanged to amounts expected to be exchanged.

##### 22.3 Income from initial fee

Income from initial fee is recognized on an accrual basis in accordance with relevant contracts or agreements.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued**

**22. Revenue - continued**

22.4 Income from central booking system

Income from central booking system is recognized on an accrual basis in accordance with relevant contracts or agreements.

21.5 Membership income

Membership income is recognised on a straight-line basis over the beneficial period of the members.

21.6 Interest income

The amount of interest income is determined according to the length of time for which the Group's monetary funds are used by others and the effective interest rate.

**23. Government grant**

Government grants are transfer of monetary assets and non-monetary assets from the government to the Group at no consideration. A government grant is recognised only when the Group can comply with the conditions attaching to the grant and the Group will receive the grant.

If a government grant is in the form of a transfer of a monetary asset, it is measured at the amount received or receivable. [If a government grant is in the form of a non-monetary asset, it is measured at fair value. If the fair value cannot be reliably determined, it is measured at a nominal amount. A government grant measured at a nominal amount is recognised immediately in profit or loss for the period.]

23.1 Accounting treatment and determining basis of government grant related to assets

Government grants of the group included supporting funds for information platform, Xincheng hotel project funds and Smartel project. Because the subsidy payments used for investing, researching and developing of related assets, these payments are government grant of related assets.

A government grant related to an asset is recognised as deferred income, and evenly amortised to profit or loss over the useful life of the related asset.

23.2 Accounting treatment and determining basis of government grant related to earnings

Government grants of the group included financial subsidy for supporting of Jinjiang star and promoting of Jingjiang city brand, these are government grant related to gain (loss).

For a government grant related to income, if the grant is a compensation for related expenses or losses to be incurred in subsequent periods, the grant is recognised as deferred income, and recognised in profit or loss over the periods in which the related costs are recognised; if the grant is a compensation for related expenses or losses already incurred, the grant is recognised immediately in profit or loss for the current period.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 24. Income tax

Income tax expense comprises current tax expense and deferred tax expense.

##### 24.1. Current income taxes

At the balance sheet date, current income tax liabilities (or assets) for the current and prior periods are measured at the amount expected to be paid (or recovered) according to the requirements of tax laws.

##### 24.2. Deferred tax assets and deferred tax liabilities

For temporary differences between the carrying amounts of certain assets or liabilities and their tax base, or between the nil carrying amount of those items that are not recognised as assets or liabilities and their tax base that can be determined according to tax laws, deferred tax assets and liabilities are recognised using the balance sheet liability method.

Deferred tax is generally recognised for all temporary differences. Deferred tax assets for deductible temporary differences are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilised. However, for temporary differences associated with the initial recognition of goodwill and the initial recognition of an asset or liability arising from a transaction (not a business combination) that affects neither the accounting profit nor taxable profits (or deductible losses) at the time of transaction, no deferred tax asset or liability is recognised.

For deductible losses and tax credits that can be carried forward, deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the deductible losses and tax credits can be utilised.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

At the balance sheet date, deferred tax assets and liabilities are measured at the tax rates, according to tax laws, that are expected to apply in the period in which the asset is realised or the liability is settled.

Current and deferred tax expenses or income are recognised in profit or loss for the period, except when they arise from transactions or events that are directly recognised in other comprehensive income or in shareholders' equity, in which case they are recognised in other comprehensive income or in shareholders' equity; and when they arise from business combinations, in which case they adjust the carrying amount of goodwill.

At the balance sheet date, the carrying amount of deferred tax assets is reviewed and reduced if it is no longer probable that sufficient taxable profits will be available in the future to allow the benefit of deferred tax assets to be utilised. Such reduction in amount is reversed when it becomes probable that sufficient taxable profits will be available.

### III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES – continued

#### 24. Income tax-continued

##### 24.3 Offsetting of income taxes

When the Group has a legal right to settle on a net basis and intends either to settle on a net basis or to realise the assets and settle the liabilities simultaneously, current tax assets and current tax liabilities are offset and presented on a net basis.

When the Group has a legal right to settle current tax assets and liabilities on a net basis, and deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax assets and liabilities on a net basis or to realise the assets and liabilities simultaneously, in each future period in which significant amounts of deferred tax assets or liabilities are expected to be reversed, deferred tax assets and deferred tax liabilities are offset and presented on a net basis.

#### 25. Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

##### 25.1 Accounting treatment of operating leases

###### 25.1.1 The Group as lessee under operating leases

Operating lease payments are recognised on a straight-line basis over the terms of the relevant lease, and are either included in the cost of related asset or charged to profit or loss for the period. Initial direct costs incurred are charged to profit or loss for the period. Contingent rents are charged to profit or loss in the period in which they are actually incurred.

###### 25.1.2. The Group as lessor under operating leases

Rental income from operating leases is recognised in profit or loss on a straight-line basis over the terms of the relevant lease. Initial direct costs with more than an insignificant amount are capitalised when incurred, and are recognised in profit or loss on the same basis as rental income over the lease term. Other initial direct costs with an insignificant amount are charged to profit or loss in the period in which they are incurred. Contingent rents are charged to profit or loss in the period in which they actually arise

##### 25.2 Accounting treatment of finance leases

###### The Group as lessee under finance leases

Related accounting treatment refer to Note (XIV) "14.3 Recognition, measurement and depreciation method of fixed assets leased under finance leases ". Unrecognised finance charges are recognised as finance charge for the period using the effective interest method over the lease term. Contingent rents are credited to profit or loss in the period in which they are actually incurred. The net amount of minimum lease payments less unrecognised finance charges is separated into long-term liabilities and the portion of long-term liabilities due within one year for presentation.

Other comprehensive income	-	622,988,963.56	622,988,963.56

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES - continued**

26.1 Changes in accounting policies-continued

The above changes in accounting policies have no impact on shareholder's equity, income statement and the amount of other comprehensive income on January 1<sup>st</sup> 2013 and December 31<sup>st</sup> 2013.

26.2 Changes in accounting estimate

During Financial reporting period, the Group has no changes in accounting estimate.

**27. Basis of determining significant accounting policies and key assumptions and uncertainties in accounting estimates**

The Group continuously evaluates the critical accounting estimates and key judgments applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimated and judgments

The critical accounting estimates and key assumptions that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year are outlined as below:

27.1 Estimated useful lives and residual values of fixed assets

The Group's management determines the estimated useful lives and residual values for its fixed assets. This estimate is based on the historical experience of the actual useful lives and residual lives of fixed assets of similar nature and functions. It could change significantly as a result of changes in economic environment, technical innovations and other conditions. The management will adjust the estimations where the actual useful lives and residual values are different from estimated useful lives and residual values.

27.2 Estimated beneficial periods of leasehold improvement and decoration

The Group operates numbers of hotels with rental properties, and makes payments to leasehold improvement and decoration of the hotels. Based on the historical experience and available information, the leasehold improvement is amortized within shorter period among useful lives, lease terms and expected beneficial periods,; and leasehold decoration is amortized within 5 years. The management of the Group will revise the expectation where the estimated beneficial period of leasehold improvement and decoration is different from the original expectation.

27.3 Deferred income tax assets and deferred income tax liabilities

Deferred income tax assets and liabilities are determined using tax rates that are expected to apply when the related deferred income tax assets are realized or the related deferred income tax liabilities are settled. The expected applicable tax rate is determined based on the enacted tax laws and regulations and the actual situation of the Group. The management of the Group will revise the expectation where the intending tax rate is different from the original expectation.

Deferred income tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. The carrying amount of deferred income tax assets is written down when it is expected that there is not sufficient taxable profits to be obtained to utilize the temporary differences in the coming periods.

**III. PRINCIPAL ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES - continued****27 Basis of determining significant accounting policies and key assumptions and uncertainties in accounting estimates- continued**27.4 Impairment of long-term investments, fixed assets, land-useright and leasehold improvement

The Group's management assesses at each of the balance sheet date whether long-term investments, fixed assets, land-useright and leasehold improvement have any indication of impairment, in accordance with the accounting policy stated in note (II) 12, 13, 16 and 17. The recoverable amount is higher of an asset's present value of estimated future cash flows and fair value less costs to sell, which is estimated based on the best information available to reflect the amount that is obtainable at each of the balance sheet date, from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the costs to disposal, or cash to be generated from continuously using the assets. The estimation is likely to be adjusted in each impairment test.

27.5 Impairment of receivables

The Group's management estimates the provisions of impairment of accounts receivables and other receivables by assessing their recoverability. Provisions are applied to accounts receivables and other receivables where events or changes in circumstances indicate that the balances may not be collected and require using estimation. Where the expectation is different from the original estimation, such difference will have impact on carrying value of receivables and the impairment charge.

27.6 Impairment of goodwill

The Group's management tests the provisions of impairment of goodwill by calculating the recoverability in accordance with the present value of expected future cash flow using the internal rate of return of the event as discount rate.

**IV. Taxation****1. Taxes and tax rate**

Taxes	Tax basis	Tax rate
Value added tax (General taxpayers)	Value added tax ("VAT") on sales is calculated on revenue from principal operations and paid after deducting input VAT on purchases	6% or 13% or 17%(note1)
Business tax	Taxable revenue	5%
Urban maintenance and construction tax	Turnover tax	7%
Levy for Education	Turnover tax	3%
Local levy for education	Turnover tax	2%
Income tax	Taxable income	15% or 25%(note2)
Property tax	Original cost of taxable property , rental income	1.2% or 12%

Note1: Under the "notice business tax with VAT pilot program," the Ministry of Finance, State Administration of Taxation on November 26<sup>th</sup> 2011 jointly issued (Cai Shui [2011] No. 110) and fiscal [2012] No. 71 the text "About eight in Beijing Conducting transportation provinces and parts of modern services business tax with VAT pilot "ongoing franchise of the Group's subsidiaries, officers dispatched labor and booking channels fee income from June 2013 to start the implementation of the VAT reform pilot turned the VAT to pay sales tax, applicable VAT rate of 6%.

Note2: According to the Tibet Autonomous Region People's Government on the adjustment of corporate income tax rate (Tibetan Affairs [2011] No. 14), as well as state tax incentives for the development of the western region, for all kinds of enterprises located in the Tibet Autonomous Region, during the period 2011-2020 Lhasa Jinjiang Inn Co. at the rate of 15% corporate income tax. In addition, the Company and other subsidiaries corporate income tax rate is 25%.

NOTES TO THE FINANCIAL STATEMENTS  
FOR THE PERIOD FROM 1 JANUARY 2014 TO 31 DECEMBER 2014

**V NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS – continued**

**8. Available-for-sale financial assets-continued**

Note: Pursuant to the agreement reached by the Company and Guangdong Finance Trust and Investment Co., Ltd. ("trustee") on 29 December 2006, the Company kept Changjiang Securities shares, whose initial investment cost is RMB 8,850,000.00, to implement a share incentive scheme for the employees of Changjiang Securities, which was pending for the approval of authorization department. According to the statement of "Yuecai trust- equity reserve collection property trust termination of contract on Changjiang Securities equity incentive plan(" the termination of the trust contract" ) which ultimately signed by the company and trustee and came into force on 6 Feb. 2012, the liquidation of the trust will begin by trustee since the date when all clients of the collection property trust sign termination of the trust contract with the trustee and terminate the trust when the all the trust property have been distributed . In the reporting period, the liquidation of the trust was completed and the Company received RMB 60,372,940.77. Deducted investment cost of RMB 8.85 million, the rest, RMB 51,522,940.77, was recognised as investment income.

## 13. Goodwill

(1) Original book value of good will

Unit: RMB

Name of the investee or entities causing deriving goodwill	2013/12/31	Addition	Deduction	2014/12/31
Shanxi Goldmet Inn Management Co., Ltd.	40,171,417.85	-	-	40,171,417.85
Smartel (Note II)	51,785,803.21	-	-	51,785,803.21
City Inn (Note I,II)	-	3,740,756.59	-	3,740,756.59
Total	91,957,221.06	3,740,756.59	-	95,697,977.65

Note: The addition is related to the positive difference between the cost of consolidation for City Inn which is not under common control of the group and the fair value of identified net assets which is received from City Inn. (Refer to Note (VI)1)

(2) Provision of Goodwill impairment

At the end of reporting period, goodwill is reviewed by the management. The fair value of the goodwill is determined in accordance with its estimated future cash flows which are discounted to their present value using a proper discount rate. The cash flow projection is based on an appropriate discount rate approved by management covering a period from year 2015 to 2019. The cash flows beyond 2019 are extrapolated using a growth rate of 0%. The management of the Group considered that any reasonably possible change in any of these assumptions would not cause the carrying amount of the goodwill to exceed the corresponding recoverable amount and no impairment provision was needed on the goodwill.

## 14. Long-term prepaid expenses

Unit: RMB

Item	2013/12/31	Addition	Amortization	Other deduction	2014/12/31
Leasehold improvement of fixed assets	1,195,319,745.48	213,295,545.67	(121,270,928.54)	(15,375,704.82)	1,271,968,657.79
Leasehold decoration of fixed assets	106,679,453.24	62,393,936.98	(40,298,570.48)	(176,174.57)	128,598,645.17
Other	17,290,484.37	2,884,091.29	(1,758,455.93)	(60,398.80)	18,355,720.93
Total	1,319,289,683.09	278,573,573.94	(163,327,954.95)	(15,612,278.19)	1,418,923,023.89

The increase in the original book value for the reporting period consists of an increase of RMB 233,026,484.53 transferred from construction in progress, an increase of RMB 44,313,963.56 for purchasing the subsidiary (Refer to note(VI) 1(3)), and an increase of RMB 9,627,487.30 for purchase and settlement.

Note: The reduction in the original carrying amount for the reporting period consists of a decrease of RMB 5,984,790.89 for disposals and write off, and a decrease of RMB 9,627,487.30 for adjustment for clearing construction fee.

## **VIII FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

The Group's major financial instruments include account receivables, account payables, available-for-sale financial assets, borrowings and long-term payables etc. Details of these financial instruments are disclosed in Note (V). The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

### **1. Risk management objectives and policies**

The Group's risk management objectives are to achieve proper balance between risks and yield, minimize the adverse impacts of risks on the Group's operation performance, and maximize the benefits of the shareholders and other equity investors. Based on these risk management objectives, the Group's basic risk management strategy is to identify and analyze the industry's exposure to various risks, establish appropriate bottom line for risk tolerance, implement risk management, and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

The Group adopts sensitivity analysis techniques to analyze how the entity's profit and loss for the period and owners' equity would have been affected by changes in the relevant risk variables that were reasonably possible. As it is unlikely that risk variables will change in an isolated manner, and the interdependence between risk variables will have significant effect on the amount ultimately influenced by the changes in a single risk variable, the following items are based on the assumption that each risk variable has changes on a stand-alone basis.

#### 1.1 Market risk

Market risk is the risk of changes in the fair value or future cash flow will occur because of changes in market price, including currency risk, interest risk and other price risk.

##### 1.1.1. Currency risk

Currency risk is the risk of changes in the fair value or future cash flow will occur because of changes in foreign exchange rates. The Group's other principal activities are denominated and settled in RMB. As at 31 December 2014, the foreign currency balance mainly is bank, cash, and other receivables. The Group's exposure to the currency risk is primarily associated with USD. Currency risk arising from the foreign currency balance of assets and liabilities has no significant impact on the Group's performance.

##### 1.1.2. Interest rate risk:

Interest rate risk is the risk of changes in the fair value or future cash flow will occur because of changes in interest rates. The Group's exposure to the interest rate risk is primarily associated with bank and cash, loan. As at 31 December 2014, loan of variable interest rate equivalently has been completely repaid. Interest rate risk has no significant impact on the Group's performance.

**VIII FINANCIAL INSTRUMENTS AND RISK MANAGEMENT- continued**

**1. Risk management objectives and policies- continued**

*1.1.3. Other price risk*

Other price risk is the risk except for currency and interest rate risk. The Group's available-for-sale financial assets and held-for-trade financial assets are measured at fair value at each balance sheet date. Therefore, the Group is exposed to the risks of changes in the equity security prices. As at 31 Decemeber 2014, the Group's available-for-sale financial assets and held-for-trade financial assets is set out in note (V) 8. Other price risk of assets in fair value may affect the Group's performance. The Group pays special attention to interest rate risk arising from the change in stock value and future value. The Group adopts the sensitivity analysis techniques to analyse the effects of reasonably possible changes in stock value risk. Stock price risk has significant impact on the Group's performance.

The Group is exposed to the price risk arising from financial assets which are measured at fair value. As at 31 December 2014, all other variables keep constant, the reasonably 10% increment (decrement) in equity instrument price will result in an increment (decrement) amounting to RMB 177,023,462.80 in Group's equity.

*1.2. Credit risk*

As at 31 December 2014, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge an obligation by the counterparties and financial guarantees issued by the Group is arising from:

- The carrying amount of the respective recognised financial assets as stated in the consolidated balance sheet. For financial instruments measured at fair value, the carrying amount reflects the exposure to risks (but not the maximum exposure to risks); the maximum exposure to risks would vary according to the future changes in fair value.

In order to minimize the credit risk, the Group has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the management of the Group considers that the Group's credit risk is significantly reduced.

The Group has adopted a policy of only dealing with creditworthy counterparties. As at 31 December 2014. The Group has no other significant concentration of credit risk.

The current bank and cash has been saved in bank and financial company with high credit standard, so the credit risk is very low.

*1.3. Liquidity risk*

Liquidity risk is the risk that enterprise have met when they performed related obligation of financial liability. In the management of the liquidity risk, the Company monitors and maintains a level of cash and cash equivalents deemed adequate by the management to finance the Company's operations and mitigate the effects of fluctuations in cash flows. The management monitors the utilization of borrowings and ensures compliance with loan covenants.

**VIII FINANCIAL INSTRUMENTS AND RISK MANAGEMENT - continued****2. Capital management**

The group manage capital through the structure of optimum liabilities and shareholder's equity to make sure that the main part of the group could keep operating, and maximize the return on equity. The corporate strategies are same in 2013, and 2014

The Group's capital structure consists of net liabilities of the Group and shareholder's equity.

The Group is not limited by requirements from external mandatory capital management. The management of the Group will review the Group's capital structure at fixed period

**IX Disclosure of Fair value****1. Ending fair value of assets and liabilities calculated by fair value method**

Unit:RMB

	Ending Fair Value			
	Level 1 Fair value	Level 2 Fair value	Level 3 Fair value	Total
Sustained fair value				
Available-for-sale financial assets - equity instruments	2,195,314,975.19	-	164,997,862.08	2,360,312,837.27
Total of assets calculated by fair value continually	2,195,314,975.19	-	164,997,862.08	2,360,312,837.27

**2. Evidences to confirm the market value of projects measured by first level sustained and unsustained fair value.**

In this financial report, the fair value is determined by the closing price of issued stock in Shanghai stock exchange and Shenzhen stock exchange on December 31<sup>st</sup>, 2014

**3. Projects measured by level three sustained fair value, applicable appraisal technique and information of important parameter.**

Unit:RMB

	Fair value on 12/31/2014	Appraisal technique
Available-for-sale financial assets - equity instruments	164,997,862.08	Comparison with listed companies

At end of the year, the group has available-for-sale financial assets - equity instruments which are shares of Shenyin&Wanguo measured by level three sustained fair value.

**IX Disclosure of Fair value - continued**

**3. Projects measured by level three sustained fair value, applicable appraisal technique and information of important parameter - continued**

At Dec 31<sup>st</sup>, 2014, the group used valuation method to measure the fair value of Shenyin&Wanguo by using comparison with listed companies. The fair value of Shenyin&Wanguo is determined by considering the closing price of Hongyuan Security and the conversion ratio of Shenyin&Wanguo and Hongyuan Security.

**4. Fair value Information of financial assets and financial liabilities which are not measured by fair value**

The current assets and current liabilities are financial assets and financial liabilities which are not measured by fair value. Book value of current assets and current liabilities approximate fair value.

### **XIII SEGMENT INFORMATION**

According to internal organization and management structure and internal reporting system, the Group identifies four operation segments on base of business type. The management of Group assigns resources and assesses achievement according to periodical assessment on operation segments. On the basis of the operation segments, the group identified three reporting segments, which include limited service hotel operation and management, food and catering business and other business. The reporting segments are identified based on the business nature of the Group. The products and services achieved by the reporting segments are mainly hotel services, catering services and other business.

Segment accounting policies are the accounting policies adopted for preparing the consolidated financial statements or the financial statements of the enterprise.

Transfer price in segments is decided according to market price and indirect expenses are allocated to segment by revenue.
