董事长致辞

STATEMENT

董事长 周志亮
Chairman Zhou Zhiliang

中国铁路通信信号股份有限公司
China Railway Signal & Communication Co., Ltd.

中国通号对于社会责任和 ESG 的履行，发轫于我们成立 70 年来的历史担当和光荣使命，发轫于千万通号人创造的辉煌成就，发轫于“发展国家列控技术民族产业，引领全球轨道交通技术进步，守护人们美好出行”的企业使命。在党中央、国务院、国资委的坚强领导下，我们的社会责任和 ESG 工作质效双升、捷报频传。2023 年是全面贯彻落实党的二十大精神的开局之年，是实施“十四五”规划承上启下的关键之年，我们将进一步深悟初心使命，细照往年社会责任和 ESG 工作，深化履责担当，筑牢社会责任管理和 ESG 建设根基，开启公司高质量发展新征程。

CRSC's fulfillment of social responsibility and ESG originates from our sense of historical responsibility and glorious mission since its establishment 70 years ago, from the brilliant achievements created by tens of thousands of CRSC people, and from the corporate mission of "developing the national industry with train control technology, leading the technological progress of global rail transit and guarding people's beautiful travel". Under the strong leadership of the CPC Central Committee, the State Council and the State-owned Assets Supervision and Administration Commission, the quality and efficiency of our social responsibility and ESG work have been improved, and good news keeps pouring in. 2023 is the first year to fully implement the spirit of the 20th CPC National Congress, and it will also be a crucial year for implementing the 14th Five-Year Plan. We will further understand our original mission, carefully review our previous social responsibility and ESG work, and deepen our responsibility performance, laying a solid foundation for social responsibility management and ESG construction, enabling us to embark on a new journey of high-quality development.

回顾 2022 年，我们在 ESG 领域取得的成绩可彰可表。公司 ESG 工作实现常态化、系统化运行，自 2013 年起连续 9 年发布企业社会责任报告（ESG 报告），有效促进了责任管理和信息披露水平的稳步提升，有力推动了责任实践的常态化履行。我们胸怀“国之大者”，勇担国家列控技术民族产业发展重任，加快向具有全球竞争力的世界一流企业迈进；坚持自主创新，多项科创成果世界领先，创新引擎更为强劲；深入落实“一带一路”倡议，推动中国技术和标准“走出去”，向世界展示“中国高铁”靓丽名片。我们共赴“绿色未来”，积极践行“双碳”战略，在产品的设计、研发、生产、应用全过程深入践行绿色低碳理念，引领轨道交通装备行业向绿色、智能方向发展。我们厚植“家国情怀”，始终坚持以人为本，聚焦员工所想、社会所思、群众所盼，持续打造负责任供应链，全力做好乡村振兴、公益慈善等工作，以爱心传递温暖与关怀。

Looking back on 2022, we have made remarkable achievements in ESG. The ESG work was carried out on a regular and systematic basis. Since 2013, we have released a corporate social responsibility report (ESG report) for nine consecutive years, effectively promoting the steady improvement in CSR management and information disclosure, and giving a strong impetus to the normalization of CSR practices. Keeping in mind "the top priorities of the country", we take responsibility for developing the national industry with train control technology, and accelerate progress towards a world-class company with global competitiveness. We are committed to independent innovation, leading the world in scientific and technological achievements, and creating a stronger innovation engine. We will further implement the "Belt and Road Initiative" (BRI) to promote China's technology and standards to "go global" and show "China's High-Speed Rail" to the world. For the "green future", we actively practice the "Carbon Peak & Carbon Neutrality" (i.e. "double carbon") strategy, further integrate green and low-carbon concepts into the entire process of product design, R&D, manufacturing and application, and guide the rail transit equipment industry to develop in a green and intelligent direction. Being devoted to the family and country and adhering to the people-oriented principle, we focus on employees' thoughts, the society's aspirations and the masses' expectations, continue to build a responsible supply chain, and put our best effort into rural revitalization, public welfare and charity, etc. to spread warmth and care with love.

鉴于公司在 ESG 管理和社会、经济、环境信息披露水平方面的优异表现，2022 年，公司 2021 年 ESG 报告连续两年荣获明晟（MSCI）ESG 评级“A”级，被中国企业社会责任报告评级专家委员会评为五星级报告；社会责任案例多次入选国资委蓝皮书，成为央企履责典范；入选“央企先锋 50 指数”，荣获 ESG 金牛奖-“先锋企业”，受到广大利益相关方的高度关注和社会各界的一致好评。

In view of our outstanding performance in ESG management and social, economic and environmental information disclosure, in 2022, our 2021 ESG Report was A-rated by Morgan Stanley Capital International (MSCI) for two consecutive years and was five-star rated by the Chinese Expert Committee on CSR Rating. We have become a model for central SOEs to fulfill corporate social responsibilities as our CSR cases were included in the CSR Blue Book of SASAC several times. CRSC was selected as a component of the "State-owned Enterprises ESG Pioneer 50 Index" and won the title of "ESG Golden Bull Award Pioneer Enterprise". CRSC has received attention and praise from stakeholders and all walks of life.

走进新阶段，肩负新责任。党的二十大对央企履行社会责任提出了更高要求，国家轨道交通技术的高质量发展对通信信号企业 ESG 工作提出了更严标准，国资委、香港联合交易所、上海证券交易所等监管机构对上市公司 ESG 治理提出了更细规定。展望未来，我们可从三个方面持续加强 ESG 工作。

Entering a new stage and shouldering new responsibilities. The 20th CPC National Congress set higher requirements to the state-owned enterprises (SOEs) directly under the central government on fulfilling corporate social responsibilities, and set stricter standards for the ESG work of communication signal enterprises in order to achieve high-quality development of national rail transit technologies. The regulatory agencies such as State-owned Assets Supervision and Administration Commission (SASAC), Hong Kong Stock Exchange (HKEX) and Shanghai Stock Exchange (SSE) posed more detailed regulations for the ESG of listed companies. Looking ahead, we can continue to strengthen ESG work in three aspects.

第一，增强公司 ESG 工作使命感，主动服务国家发展大局。我们要坚决落实党中央重大战略决策部署，积极将自身发展融入新发展格局，聚焦主责主业，为建设交通强国不断做出新的更大贡献。第二，强化公司 ESG 治理工作的顶层设计，提升 ESG 管理水平。我们要紧抓国资委成立社会责任局的契机，进一步推动公司 ESG 工作规范化、制度化、科学化，筑牢风险防控根基。第三，推动公司 ESG 治理工作落实落细，为生态治理和美好社会做出更大贡献。我们要继续坚定服务国家“双碳战略”，积极做好全产业链降碳、减排等工作，始终把满足人民对美好生活的向往作为奋斗目标，在乡村振兴、志愿公益、爱心助学、应急救援等领域投入更多资源，彰显通号人的担当与奉献。

First, we shall harbor a stronger sense of mission with regard to ESG work, and actively serve the overall situation of national development. We must resolutely implement the major strategic decisions and arrangements made by the CPC Central Committee, actively integrate our own development into the new development pattern, focus on our main responsibilities and industries, and make new and greater contributions to building China into a transportation country. Second, we shall strengthen the top-level design with regard to ESG governance, and improve ESG management. We should see the establishment of the Social Responsibility Bureau by SASAC as an opportunity to push our ESG work towards standardization, institutionalization and scientization, and lay a solid foundation for risk prevention and control. Third, we shall further implement ESG corporate governance in an effective and detailed manner, and make greater contributions to ecological governance and a better society. We should continue to firmly serve the national "double carbon" strategy, actively carry out carbon reduction, and emission reduction across the industry chain, and always take satisfying people's yearning for a good and beautiful life as the goal for us to strive for, and invest more resources in rural revitalization, voluntary public welfare, care for students, emergency rescue and other fields to demonstrate the responsibility and dedication of CRSC people.

牢记职责使命，赓续百年初心。在“十四五”期末，我们要力争实现 ESG 管理体系日趋完善、ESG 责任品牌逐步成熟、ESG 实践持续深化的发展目标，追求效益和社会影响的平衡，提高公司美誉度，实现可持续发展、高质量发展。

Staying true to our responsibility and mission, and sustaining our original aspiration for a hundred years. At the end of the 14th Five-Year Plan period, we should strive for improving ESG management system, refining ESG brands and deepening ESG practice, balance benefits and social impact, improve our reputation, and achieve sustainable and high-quality development.

最后，我谨代表中国通号董事会及全体员工，向所有关心、支持和帮助中国通号发展的社会各界朋友和利益相关方致以最诚挚的感谢。面对美好未来的召唤，我们始终坚定信念、奋发进取，让我们携手同行，共创美好未来！

Finally, on behalf of the board of directors and all employees of CRSC, I would like to extend my deepest gratitude to all friends and stakeholders from all walks of life who care about, support and help CRSC's development. Looking ahead, we always keep faith and forge ahead. Let's join hands for a bright future!

创新驱动，赋能发展 Empower Development Driven by Innovation

中国通号把科技自立自强作为企业发展的战略支撑，以打造全球轨道交通控制技术的先行者和领导者为目标，全面提升创新创效能力，强化关键核心技术攻关，以科技驱动行业高质量发展。

Regarding self-reliance and self-improvement in science and technology as a strategic force for enterprise development, and aiming to become a global pioneer and leader in rail transit control technology, CRSC has increased innovation capacity and performance in all respects, and intensified efforts to achieve breakthroughs in core technologies in key fields, in order to drive the high-quality development of the industry through science and technology.

落实战略规划 Implementing Strategy

中国通号强化科技规划战略引领，制定“十四五”科技发展规划，确定科技创新目标和重点任务，进一步推动“一个体系、二个中心、三个高地、七大突破”的科技创新总体战略目标落实；积极统筹推进科技规划与所属公司战略规划、行业发展规划、企业年度行政重点工作的有效衔接，保障规划稳步落地，为科技创新工作高质量发展提供指南。

CRSC strengthened the strategic guidance of the science and technology plan, formulated the 14th Five-Year Plan for scientific and technological development, and determined the objectives and key tasks of S&T innovation to further promote the implementation of the overall strategic goal for S&T innovation of "One System, Two Centers, Three Highlands and Seven Breakthroughs". CRSC actively coordinated the effective connection between the science and technology plan and the subsidiary strategy plan, industry development plan and annual administrative priorities, to ensure steady implementation and provide guidance for high-quality development driven by S&T innovations.

提升创新能力 Enhancing Innovation Capabilities

中国通号坚持以创新变革开创工作新局面，实施“集中攻关”“揭榜挂帅”“成果孵化”“效益评估”等科技制度，凝聚和培养科技人才队伍，完善知识产权管理和保护，全力攻克指挥控制系统类、基础装备类等一批关键核心技术，多项技术达到世界领先水平，为公司实现高水平科技自立自强、引领轨道交通技术发展方向、巩固调度控制主业优势奠定坚实基础。

CRSC insists on creating a new situation through innovation-driven changes, implements S&T systems such as "concentrating efforts to achieve breakthroughs in core technologies in key fields", "enlisting and leading", "incubation of achievements" and "benefit evaluation", gathers and cultivates S&T talents, and improves intellectual property management and protection. CRSC has made concerted efforts to develop a number of core technologies in key fields such as command and control systems and basic equipment, many of which have reached the world leading level, laying a solid foundation for CRSC to achieve sci-tech self-reliance and self-strengthening at higher levels, lead the direction of development of rail transit technology, and consolidate the advantages of the main business based on dispatch control.

案例 Case 电磁领域深耕不辍，研究中心成功落户通号

CRSC Digs Deep into Electromagnetics and Research Center Settled in CRSC

2022 年 11 月，由研究设计院集团牵头申报的“电磁环境效应及电磁安全铁路行业工程研究中心”成功入选国家铁路局认定的铁路行业科技创新基地。该中心将立足铁路发展重大战略、重大工程需求，攻关轨道交通电磁干扰难题，聚集和培养轨道交通电磁人才，不断引领我国铁路行业科技创新。

In November 2022, the Railway Industry Engineering Research Center for Electromagnetic Environmental Effects and Electromagnetic Safety, led by Research & Design Institute Group, was successfully selected as one of the S&T innovation bases of railway industry accredited by the National Railway Administration of the People's Republic of China. Based on major railway development strategies and major engineering requirements, the center will solve electromagnetic interference (EMI) problems in rail transportation, gather and foster talents in electromagnetic fields of rail transportation, to lead the S&T innovation in China's railway industry.

科技人才建设
Construction of S&T Talents

中国通号把科技人才队伍建设摆在更加突出的位置，建立高质量培养和激励机制，念好“选、用、育、留”四字诀，有效激发公司创新创造活力。加强与詹天佑基金会的沟通，联合中国铁道学会通信信号分会设立詹天佑通信信号专项奖；积极开展各类专家推荐和“输出”工作，推荐工信部先进轨道交通产业领域、中国城市轨道交通协会等多名专家。截至 2022 年底，公司共有研发人员 4,428 人；新增 1 人入选国家科技部科技创新领军人才计划、3 人分获第十六届詹天佑成就奖和青年奖、2 人入选中国科协年度青年托举工程人才、10 人入选茅以升铁道工程师、1 人入选中国铁道学会推荐“最美铁道科技工作者”。

CRSC has given greater prominence to S&T talents by establishing a high-quality training and incentive mechanism and strengthening the "selection, adoption, cultivation and retention" which effectively stimulates innovation and creativity. CRSC strengthens communication with Zhantianyou Development Foundation for Science and Technology, and set up the Zhan Tianyou Special Award for researchers with the Communications Signal Branch of China Railway Society of China Railway Society. CRSC has actively carried out expert recommendation and "output", and recommended several experts from the advanced rail transit industry of the Ministry of Industry and Information Technology and the China Association of Metros. By the end of 2022, CRSC has a total of 4,428 R&D personnel, of which one person was selected into the Leading Science and Technology Innovation Talents by the Ministry of Science and Technology, three persons were respectively awarded the 16th Zhan Tianyou Achievement Award and Youth Award, two persons were selected into the annual Young Elite Scientist Sponsorship Program by China Association for Science and Technology, ten persons won the Mao Yisheng Railway Engineer Award, and one person was selected into "the Most Beautiful Railway Sci-Tech Workers" recommended by China Railway Society.

2022 年中国通号知识产权开发与保护工作进展

CRSC's Work Progress of the Development and Protection of Intellectual Property Rights in 2022

加快知识产权工作示范建设
Accelerate intellectual property demonstration and construction

- 1 家子企业获批国家知识产权示范企业称号，3 家子企业荣获国家知识产权优势企业称号，1 家企业获得高价值专利培育中心企业称号
One subsidiary was awarded the title of "National Intellectual Property Demonstration Enterprise", three subsidiaries were awarded the title of "National Intellectual Property Advantage Enterprise", and one enterprise was awarded the title of "High-value Patent Cultivation Center Enterprise".

强化高价值专利培育
Strengthen the cultivation of high-value patents

- 积极推荐中国专利奖，2 件专利获第二十三届中国专利优秀奖，1 件专利获第四届上海市知识产权创新奖
Recommended for China Patent Award, two patents from CRSC won the 23rd China Patent Excellence Award; and one patent won the 4th Shanghai Intellectual Property Innovation Award.
- 组织开展中国专利奖申报，通过多渠道申报 7 项中国专利奖项目
CRSC organized application for China Patent Award, and its seven projects were filed with the China Patent Award through multiple channels.

推进知识产权体系建设
Promote the construction of intellectual property system

- 2 家子企业通过国家标准 GB/T 29490-2013《企业知识产权管理规范》贯标认证
Two subsidiaries are certified under the national standard titled *Enterprise Intellectual Property Management Standard* (GB/T 29490-2013).

创新成果转化应用

Transformation and Application of Innovation Achievements

中国通号充分发挥设计研发、装备制造和工程服务“三位一体”的综合优势，加快突破关键核心技术，加快实现重点技术在城市轨道交通、铁路信号安全控制等创新领域的“技术成果化、成果市场化、市场效益化”，推动一系列科技创新成果竞相涌现。2022 年，公司先后获得“国家制造业单项冠军示范企业”“国家级专精特新小巨人企业”等荣誉。

CRSC has vigorously leveraged the "three-in-one" advantage of design and development, equipment manufacturing and engineering services, and accelerated the research on core technologies in key fields, and realization of "technological achievements, marketization of results, and market efficiency" of key technologies in fields of innovation such as urban rail transit and railway signal safety control, contributing to the emergence of S&T innovation achievements. In 2022, CRSC won the National Single Champion Demonstration Enterprise in Manufacturing Industry and the National Specialized and New "Little Giant" Enterprise, etc.

2022 年中国通号科技创新成果应用（部分）

Application of CRSC's Scientific and Technological Innovation Achievements in 2022 (Partial)

●○○○○○

开展低真空管超高速磁浮运行控制系统研发，完成分区运控系统和舱载运控系统研究，山西大同 - 阳高超高速磁浮试验线进行现场试验。
CRSC carried out the research and development of ultra-high-speed low-vacuum pipeline maglev operation control system, and completed the research on partition operation control system and cabin load operation control system. The Datong-Yanggao ultra-high-speed maglev test line was field-tested in Shanxi Province.

●●○○○○

自主研发的 ETCS-2 级列控系统，符合欧盟互联互通标准及安全体系，在匈塞铁路塞尔维亚段正式开通运营，标志着全套中国自主知识产权的列控系统首次在欧洲国家应用。
The self-developed ETCS-2 train control system conforms to the interconnection & interoperability standards and safety systems of the European Union, and was officially put into operation in the Serbian section of the Hungary-Serbia Railway, marking the first time that China's full set of train control system with completely independent intellectual property rights was applied in Europe.

“超大规模地铁列控系统运维数字化转型关键技术及应用”顺利通过由院士领衔的专家组的评审，获得“国际领先”高度评价，并在上海陈太路运维中心、昆明线网中心试点应用。
The "key technology and application of digital transformation of operation and maintenance of ultra-large metro train control system" successfully passed the review of the expert group led by academicians. The project was highly rated as "international leading", and was applied on a pilot basis in Shanghai Chentai Road Operation and Maintenance Center and Kunming Metro Line Control Center.

案例 Case 新型列控系统，助力和若铁路顺利开通

New Train Control System Supports the Operation of Hotan-Ruoqiang Railway

2022年6月，搭载中国通号新型列控系统的和若铁路顺利开通，极大改善了南疆交通运输条件，成为西部地区对外开放的重要通道，形成利用境外资源、开辟境外市场便捷的陆路大通道，有力推动地方经济发展和丝绸之路经济带建设。

Hotan-Ruoqiang Railway, equipped with CRSC's new train control system, opened in June 2022. It has greatly improved traffic conditions in southern Xinjiang, becoming an important channel for opening Western China wider to the outside world, and forming a convenient land route to utilize overseas resources and exploit overseas markets, which effectively promotes the local economic development and the construction of the Silk Road Economic Belt.

实现 1 项核心功能
1 Core Function

- 可适应国家铁路长大线路环境下基于机车牵引、由不同车长和不同载重条件客、货编组列车的紧追踪运行功能
Adapt to the operations on the same track of locomotive-hauled freight/passenger trains with different lengths and load conditions under the background of long and large national railways

突破 2 项关键技术
2 Breakthrough Technologies

- 由车载设备综合北斗卫星定位、电子地图、速度传感器等多种信息源，自主感知确定列车位置
The on-board equipment integrating Beidou, electronic map, speed sensor and other information sources can sense and locate the train automatically
- 综合卫星定位数据和列车风管空气压力数据，自主确认列车车体编组的完整性
Confirm the integrity of train marshalling automatically, based on satellite positioning data and train duct air pressure data

具备 3 个突出特点
3 Outstanding Features

- 轨旁设备简约化
Wayside equipment simplification
- 车站区间一体化
Station-section integration
- 设备维护智能化
Intelligent equipment maintenance

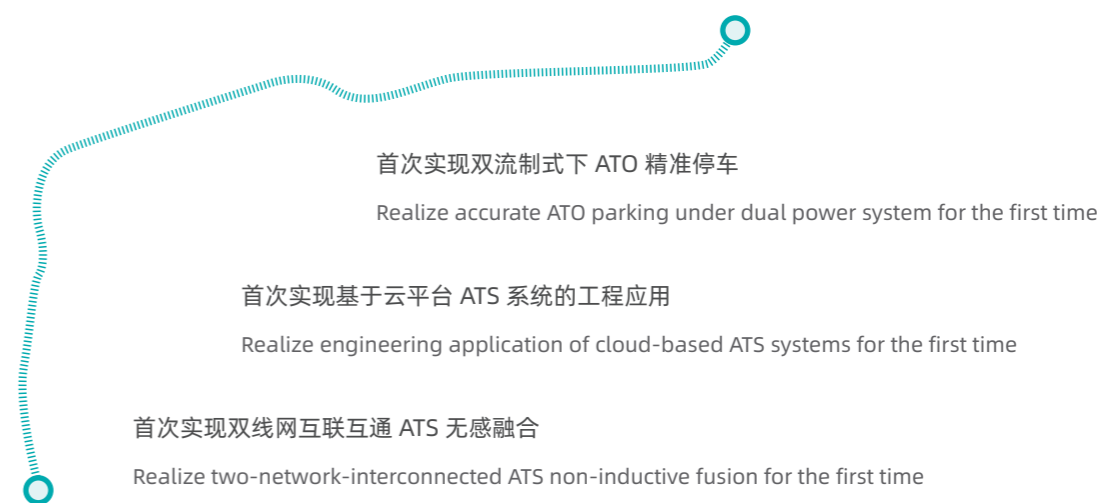

案例 Case 通号方案，助推国内首条双流制市郊铁路开通运行

CRSC's Solution Supports the Opening of China's First Dual-powered Suburban Railway

2022年8月，重庆市郊铁路跳磴至江津线（简称“江跳线”）开通载客运营。中国通号为江跳线提供了全自主知识产权的 CBTC 信号系统解决方案，覆盖项目全生命周期服务，助力江跳线实现 120 公里每小时的最高运行速度，创造了重庆地区城市轨道交通运营最高运行速度的纪录，为实现重庆地区“四网融合”奠定坚实基础。

Tiaodeng-Jiangjin Line, a suburban railway in Chongqing (hereinafter referred to as Jiang-Tiao Line), opened to traffic in August 2022. CRSC provides Jiang-Tiao Line with a CBTC solution with completely independent intellectual property rights, which covers project life cycle services, so that Jiang-Tiao Line runs at a maximum speed of 120km/h, setting a urban rail speed record in Chongqing, and laying a solid foundation for realizing "four-network integration" in Chongqing.

助推行业发展 Boosting Industrial Development

中国通号聚焦行业发展前沿，积极参与中国铁路通信信号领域行业标准制修订，持续加强与科研院所、行业协会等机构的技术交流互鉴，加大外部协同创新力度，充分汇聚各方智力资源，携手引领行业高质量发展和技术进步。

Focusing on the frontiers of industry development, CRSC actively participates in the formulation and revision of industrial standards on railway signaling in China, continuously strengthens technical exchanges and mutual learning with scientific research institutes, industry associations and other institutions, intensifies efforts to make innovation through collaboration with others, and fully pools intellectual resources from all sides, to jointly lead the high-quality development and technical progress of the industry.

■ 行业标准制定 Formulating Industry Standards

中国通号积极组织 and 参与国际、国家、行业、团体、地方标准制定，主编的《同轴通信电缆 第 4 - 部分：辐射电缆分规范》(IEC 61196-4:2022)、《同轴通信电缆 第 4-1 部分：辐射电缆空白详细规范》(IEC 61196-4-1:2022)，参编的《轨道交通 铁路列车时刻表 第一部分：需求》(ISO 24675-1:2022)、《轨道交通司机培训用驾驶模拟器》(ISO 23019:2022) 等国际标准正式发布，并牵头编制 4 项国际标准。

CRSC actively organizes and participates in the formulation of international, national, industrial, group and local standards. CRSC edited the *Coaxial Communication Cables - Part 4: Sectional Specification for Radiating Cables* (IEC 61196-4:2022) and the *Coaxial Communication Cables - Part 4-1: Blank Detail Specification for Radiating Cables* (IEC 61196-4-1: 2022). CRSC took part in international standards such as *Railway Applications - Running Time Calculation for Timetabling - Part 1: Requirements* (ISO 24675-1:2022) and *Railway Applications - Driving Simulator for Drivers' Training* (ISO 23019:2022) which were officially released, and took the lead in compiling four new international standards.

中国通号邀请中国工程院、国家市场监督管理总局、国家铁路局、国铁集团等 40 余家单位的专家、领导参加，成功召开全国轨道交通电气设备与系统标准化技术委员会通信信号分技术委员会 (SAC/TC278/SC2) 和铁路行业电气设备与系统标准化通信信号分技术委员会成立大会，以标准引领轨道交通通信信号产业高质量发展，彰显了公司行业凝聚力和标准引领力。截至 2022 年底，公司共归口管理现行有效国家和行业标准 196 项，在编标准 16 项。

Experts and leaders from more than 40 institutions, including the Chinese Academy of Engineering, the State Administration for Market Regulation, the National Railway Administration, China State Railway Group Co., Ltd., were invited to attend the inaugural meetings of the Communication Signal Sub-Committee of the National Technical Committee on Electrical Equipment and Systems for Railways of Standardization Administration of China (SAC/TC278/SC2) and the Communication Signal Sub-Committee of the Technical Committee

■ 行业沟通交流

Industrial Communication and Exchanges

作为中国铁道学会通信信号分会的挂靠单位，中国通号鼎力支持通信信号分会创条件、搭平台、促服务，积极参加行业、协会交流论坛活动。联合申报中国科协全国学会分支机构示范发展专项，并入围全国 50 家学会示范分支机构发展专项支持；组织召开第九届轨道电路系统技术研讨会、中关村轨道交通国际创新创业大赛、全路道岔转换设备技术交流会等系列重大行业盛会；推动行业创先争优，中国铁道学会通信信号分会连续 3 年获得中国铁道学会分支机构考核第一名，荣获“优秀分支机构”荣誉称号，3 人获得优秀工作者称号。

As an affiliated institution of the Communications Signal Branch of China Railway Society, CRSC fully supports the Communications Signal Branch to create sound conditions, build platforms and promote services, and actively participates in industry and association forums. CRSC jointly applied for the demonstration and development fund established by China Association for Science and Technology for its branches nationwide, and was shortlisted for the demonstration and development fund support for 50 branches nationwide; held major events of the industry, such as the 9th Technical Seminar on Track Circuit System, Zhongguancun Rail Transit International Innovation & Entrepreneurship Competition, and China National Railway Turnout Switching Equipment Technology Exchange Conference, to promote the industry to create advancement and strive for excellence. The Communications Signal Branch of China Railway Society won first place in the performance evaluation of branches of China Railway Society for three consecutive years and was awarded the honorary title of "Excellent Branch", and three persons were awarded the title of "Outstanding Worker".

案例 Case “创客北京 2022”中国通号·轨道交通通信信号行业专项大赛圆满收官

"Maker Beijing 2022" CRSC • Rail Transit Communication Signal Industry Special Competition concluded successfully

2022 年 8 月，“创客北京 2022”创新创业大赛中国通号·轨道交通通信信号行业专项赛决赛圆满收官。作为历经七年孵化出的双创大赛品牌，大赛主要面向前沿技术研究、产品研发、运用维护等轨道交通全产业链，重点聚焦高端装备和智慧服务两大方向，征集新技术、新产品与新服务，吸引了轨道交通相关企业及创新创业者的广泛关注和积极参与，共有来自全国 19 个省 270 余个项目报名参赛。

In August 2022, the final of "Maker Beijing 2022" CRSC • Rail Transit Communication Signal Industry Special Competition successfully concluded. As a brand of innovation and entrepreneurship competition that has been incubated for 7 years, the competition is mainly oriented to the whole industry chain of rail transit, such as cutting-edge technology research, product development, operation and maintenance, focusing on two directions of high-end equipment and intelligent service, and collecting new technologies, new products and new services. It has attracted wide attention and active participation of rail transit-related enterprises and innovative entrepreneurs. A total of more than 270 projects from 19 provinces across the country have signed up for the competition.

中国通号将以本次大赛为新起点，持续发挥行业技术引领和对产业链的带动作用，通过为中小企业和创新团队搭建交流展示、项目孵化和产融对接的服务平台，不断催生新产品、新技术、新模式和新业态，着力构建与中小企业协同创新、资源共享、融合发展的轨道交通产业生态，为交通强国和科技强国建设贡献力量。

Taking this competition as a new starting point, CRSC will continue to play the leading role of industry technology and the leading role of the industrial chain. By building a service platform for small and medium-sized enterprises and innovation teams to exchange and display, project incubation and industrial and financial docking, new products, new technologies, new models and new formats will be continuously spawned, and efforts will be made to build a rail transit industry ecology with collaborative innovation, resource sharing and integrated development with small and medium-sized enterprises, so as to contribute to the construction of a transportation power and a science and technology power.

匠心品质，服务客户

Provide Quality Service for Clients

中国通号秉持“质量是生命、安全大于天”的理念，持续优化产品质量，不断强化产品竞争力；主动贴近市场，打造一流服务竞争优势；大力推进数字化转型升级，锻造服务新优势；强化安全生产责任，守护本质安全，厚植企业高质量发展根基。

Adhering to the concept of "quality is life and safety of paramount importance", CRSC has constantly optimized its product quality and enhanced product competitiveness; actively followed market trends, and built up its competitiveness in first-class services; endeavored to promote digital transformation and upgrade to form new advantages in service; strengthened the responsibility on safety production, ensured essential safety and consolidated the basis for the Company's high-quality development.

卓越产品与服务

Excellent Product and Service

中国通号持续深耕质量管理。公司信守质量承诺，严格遵守《产品质量法》等法律法规，严格落实《质量管控规则》《产品质量检验工作管理办法》等制度规范，健全质量安全三级管控体系，从产品研发、设备制造、工程安装、集成调度、运营维护全产业链统筹质量管理，培育坚实的质量文化。

CRSC continued deepening quality management. The Company abode by its promises on quality, strictly followed the Law on Product Quality and other relevant laws and regulations, strictly implemented the Rules on Quality Management and Control, Management Measures on Product Quality Control and other systems and standards, improved its three-tiered management for quality safety, made overall arrangements for quality management covering the entire industrial chain including product R&D, equipment manufacturing, engineering installation, integration scheduling and operation & maintenance, and cultivated a solid quality culture.

同时，中国通号及所属企业紧密结合市场需要，深入挖掘客户需求，建立全生命周期的客户服务体系，积极回应客户关切，主动提供优质客户服务，充分保护客户隐私，及时妥善应对客户投诉，持续赢得客户满意。

In the meantime, CRSC and its affiliated enterprises adhered closely to the market demands, deeply explored the needs of client, established the full life circle client service system, actively responded to the concerns of client, actively provided quality services, fully protected the privacy of client, handled client complainants properly in a timely manner and won the continuous satisfactions of client.

Based on SAP and integrated with the implementation of MES and SRM systems, realized integration between production plan, material purchase and supplier management and achieved the full-process management of supplier business and the dynamic management of supply quality.

智能柔性产线及设备 Intelligent flexible production line and equipment

应用单盒组装柔性生产线、智能料仓等智能化生产装备，提升产品生产制造、检验检测效率，大幅改善生产过程数据采集监测水平。

Adopted intelligent product equipment including the single-box assembly flexible production line and intelligent feed bin to enhance efficiency in product manufacturing and testing, and greatly improve collection and monitoring of production data.

城轨云测试平台 Urban rail cloud testing platform

满足城轨科研开发以及系统集成项目的调试测试需求，实现互联互通 CBTC 2.0 集成项目信号系统在云平台上的部署及测试应用，缩短实验室测试环境搭建时间。

Satisfied the needs for commissioning and test for the scientific research and development of urban rail and the projects of system integration, realized the deployment, testing and application of interconnected CBTC 2.0 integration project signal system on cloud platform, and shortened the time for building the environment for lab test.

城轨一体化绘图工具软件 Integrated urban rail drawing software

将传统工程数据表、联锁表等几十个工程设计文件进行整合，通过工具软件自动导入替代了传统的人工录入，大幅提高相关文档质量，有效减少了在产品生产过程中的多头输入问题。

Integrated dozens of engineering design documents including traditional engineering data table and interlocking table, which replaces traditional manual entry with automatic entry of software, greatly improves the quality of relevant documents and effectively reduces inconsistency from multi-entry during product manufacturing.

案例 Case 数字化运维实现高端核心装备自主可控

Digital Operation & Maintenance Makes High-End Core Equipment Controllable

2022 年 7 月，卡斯柯基于数字化运维系统的“超大规模地铁列控系统运维数字化转型关键技术及应用”在上海地铁顺利通过专家评审，该项目在世界上首次实现了列控系统“状态修”，列控系统运行可靠度、列车正点率、全员生产率等技术指标均达到世界领先水平，每人公里运营成本世界最低，为我国城市轨道交通探索数字化转型提供成功经验和参考。

In July 2022, Casco's the "Key Technology and Application of Digital Operation & Maintenance of Super-large Scale Subway Train Control System" based on digital operation & maintenance system successfully passed the expert review in Shanghai Metro; the project first realized "condition based maintenance" for train control system in the world, with the technical indicators all reaching global leading levels including the operation reliability, punctuality and productivity of the train control system, making the operation cost per person kilometer to a global lowest level and providing successful experiences and references for the digital transformation of urban rail transportation in China.

保障安全生产 Ensuring Production Safety

中国通号深入贯彻习近平总书记关于安全生产重要论述和指示批示精神，严格遵守《安全生产法》《消防法》等安全法律法规，健全完善全员安全生产责任制，推进安全生产专项整治三年行动计划，加强安全风险防控，扎实开展安全应急演练，做好安全宣传培训，全力筑牢安全生产防线。

CRSC strictly implemented the important statements and instructions made by General Secretary Xi Jinping on production safety, strictly abode by the Law on Production Safety, Law on Fire Control and other relevant laws and regulations on safety, improved relevant responsibilities on production safety, carried out the three-year action plan on special rectification of production safety issues, enhanced prevention and control of safety risks, conducted safety emergency drill, promoted the publicity and training on safety and endeavored to consolidate the base for production safety.

■ 安全生产管理 Safe Production Management

中国通号全面落实安全生产责任制，建立健全安全管理机构，成立以董事长为主任的安全生产管理委员会，定期召开安全生产委员会，研究部署安全生产相关工作。稳定运行安全生产标准化体系，有效落实安全生产责任，加强安全生产信息化建设，为维护好广大员工生命财产安全和公司高质量发展提供有力保障。2022 年，公司未发生安全生产一般及以上、重轻伤事故，未发生特种设备、火灾一般及以上责任事故，安全形势总体稳定。

CRSC fully implements accountability on safe production, establishes and improves the safety management organizations, and set up the safe production management committee with Chairman as the director to hold regular meeting and discuss and make arrangements for the works related to safe production. It steadily ran the standardized system of safe production, effectively implemented relevant responsibility on safe production, enhanced informationalization of safe production and provided strong supports for maintaining the life and property safety of employees as well as the high-quality development of the Company.

CRSC's Total Funds Invested in Safe Production in 2020-2022 (100 million yuan)

■ 安全风险防控 Risk Prevention and Control of Safe Production

中国通号紧扣重大风险辨识管控、重大隐患排查治理两个关键领域，对安全生产实行分级分类管控，健全安全生产监督机制，开展安全质量隐患大排查大整治工作。加大监督检查频次和力度，各层级共组织检查 7,337 次，完成整改 15,857 项；开展三次全系统安全隐患大排查大整治，完成整改 3,314 项，有效遏制安全生产事故的发生；扎实推进安全生产专项整治三年行动收官工作，三年共发现问题 3,534 个，已全部整改，有效提升安全防控水平。

Sticking closely to the two key areas of identification and management of major risks and the troubleshooting and governance of potential hazards, CRSC implements tiered and classified management on safe production, improves the supervision mechanism on safe production and conducts general troubleshooting and rectification on potential hazards of safety and quality. It increased the frequency and thoroughness of supervision checking, with a total 7,337 checks conducted at different levels and 15,857 items rectified; conducted three general troubleshooting and rectification events on potential safety hazards covering the entire system and completed 3,314 items of rectification, which effectively prevented the accidents of safe production; strictly carried out relevant works to complete the three-year action on special rectification of safe production issues, with a total 3,534 problems spotted and rectified within three years, effectively improving the level on safety control.

■ 安全生产应急 Emergency Management of Safe Production

中国通号持续加强事故应急管理，制定《轨道交通运营设备故障应急预案》《事故灾难综合应急预案》，建立完善的应急管理体系；加强应急值守，修订应急预案，针对春运、“两会”、国庆及党的二十大等关键时期，通过组织全系统实施在轨运营系统设备保障方案，有效保障轨道交通运营可靠安全；加大应急演练和评估工作，提升突发事件的处理能力。2022 年，公司组织开展火灾、触电、坍塌、机械伤害、高处坠落等应急演练共 501 次。

CRSC constantly improves its accident emergency management, formulates the *Emergency Preparedness Plan for Rail Transportation Operation Equipment Malfunction* and the *Comprehensive Emergency Preparedness Plan for Accident Disaster*, establishes a sound emergency management system, strengthens emergency guard to timely handle emergencies, modifies the emergency preparedness plan and organizes and implements the equipment support plan of on-rail operation system to effectively ensure reliable and safe operation of rail transportation during key periods such as the Spring Festival travel rush, “NPC&CPPCC”, the National Day holiday and the 20th CPC National Congress; and improves emergency drill and evaluations to enhance the handling capacity of emergency accidents. In 2022, 501 emergency drills such as fire, electric shock, collapse, mechanical injury and high-altitude fall were organized.

■ 安全教育培训 Safety Education and Training

中国通号落实全员安全培训教育责任，广泛宣传安全生产法律法规，制定印发《安全生产教育培训管理办法》，组织“安全生产月”“安全生产法宣传周”、年度安全生产教育培训会等系列活动，建立员工安全培训教育档案，增强员工岗位安全操作技能和应急处置能力，营造浓厚安全氛围。

CRSC undertakes safety training and education for all employees, widely publicizes the laws and regulations on safe production, formulates and issues *the Management Measures on Education and Training on Safety Production*, organizes relevant activities including the “month of safe production”, “publicity week of the law on safe production” and the annual education and training meeting on safe production, establishes the files of safety training and education for employees, and enhances employees’ capacity in safe operation skills and emergency disposal to create a sound atmosphere of safety.

绿色“双碳”，呵护生态 Protect Ecosystems through Green Development under "Double Carbon" Background

中国通号以习近平生态文明思想为指导，提高能源资源有效利用率，积极妥善应对气候变化，减少温室气体排放，最大限度地减少污染物排放，深度助力实现“双碳”目标，助力建设天蓝、地绿、水清的美丽中国。

Guided by the thoughts of Xi Jinping on ecological civilization, CRSC improves the effective utilization of energy resources, actively copes with climate change in a proper manner, reduces emissions of greenhouse gas, reduces the discharge of pollutants to the minimum, and makes its own contributions to realizing the objectives of "carbon peaking and carbon neutrality" and to building the beautiful China with blue sky, green land and clear water.

节约能源资源 Saving Energy Resources

中国通号制定《节约能源与生态环境保护管理办法》，拟定各项能源消耗指标；加快淘汰高耗能、高污染的工艺装备，优先使用节能、高效、环保的设备和机具；提高各种机械的使用率和满载率，对大功率电器实行限流限时制度，最大限度节约用电；加快节能低碳新技术、新工艺、新产品的示范与应用推广，积极探索绿色制造体系；推进化石能源清洁高效利用，推动煤电向支撑性和调节性电源转型，积极有序推进煤炭替代和煤炭清洁化改造；积极促进包装材料减量化，持续减少不必要的包装，优先选用环保包材。

CRSC formulates the *Management Measures on Energy Conservation and Ecological Environment Protection*, and establishes several indicators of energy consumption; accelerates the elimination of skills and equipment with high energy consumption and pollutions, and prioritizes the use of energy-saving, efficient and environmental friendly equipment and tools; improves the utilization and full load rate of different machines, and implements current-and time-limiting rules on large power electric appliances to save electricity to the maximum; accelerates the demonstration and wide application of new technology, new technique and new product that's energy-saving and low-carbon, and actively explores the green manufacturing system; promotes the clean and efficient utilization of fossil energy, and facilitates the alternative and clean transformation of coal power; actively reduces package materials, constantly decreases unnecessary packing and prioritizes the use of environmental friendly materials.

温室气体减排 Reducing Emissions of Greenhouse Gases

中国通号认真贯彻落实《中共中央 国务院关于完整准确全面贯彻新发展理念做好碳达峰碳中和工作的意见》以及国资委《关于推进中央企业高质量发展做好碳达峰碳中和工作的指导意见》，不断完善长效机制，积极开展气候变化相关风险与机遇识别、“双碳”路径研究工作，持续降低温室气体排放，提升在应对气候变化相关议题上的治理表现。

CRSC strictly implements the *Opinions of the Central Committee of the Communist Party of China and the State Council on Completely and Accurately Implementing the New Development Concept and Doing a Good Job of Carbon Peak Carbon Neutralization* and the *SASAC's Guiding Opinions on Promoting the High-quality Development of Central Enterprises and Doing a Good Job of Carbon Peak Carbon Neutralization*, constantly improves the long-effective mechanism, actively identifies the risks and opportunities related to climate change, undertakes researches on the path of "carbon peaking and carbon neutrality", constantly reduces the emission of greenhouse gases and improves its governance on relevant issues of climate change.

中国通号加快落实“双碳”工作的经济布局 and 结构，成立落实“双碳”工作领导小组和工作小组，编发《碳达峰行动方案》《节约能源与生态环境保护管理办法》；召开碳达峰碳中和工作推进视频会议，对“双碳”工作提出具体要求和部署；积极开展碳排放数据质量问题排查整治工作，杜绝碳排放数据弄虚作假行为，为落实碳达峰碳中和工作奠定基础。

CRSC accelerates the building of its economic layout and structure for implementing "carbon peaking and carbon neutrality", establishes a leading team and working team in this regard, formulates and issues the *Carbon Peak Action Plan* and *Energy Conservation and Ecological Environment Protection*, holds the video conferences to promote carbon

peaking and carbon neutrality works, proposes relevant concrete requirements and deployment in this regard, and actively conducts relevant examination and rectification of data quality issues relating to carbon emission to eradicate data fabrication and lay solid grounds for implementing carbon peaking and carbon neutrality.

中国通号坚持从源头减少二氧化碳排放，持续推进绿色低碳转型升级，提升绿电的使用比例，提高能源资源利用效率，降低单位产出能源资源消耗和碳排放；增强高质量绿色产品服务供给能力，加速绿色低碳新材料、新技术、新工艺推广应用。2022 年，中国通号温室气体（二氧化碳）排放量为 74,039 吨¹，公司进一步规范了对二氧化碳的统计计算，将工程施工企业、设计研发集成等非工业企业全产业链生产过程产生的二氧化碳纳入统计范围，包括化石能源燃烧、购入电力、热力蕴含的二氧化碳排放量。

CRSC sticks to reduction of carbon dioxide from the source, continuously promotes green and low-carbon transformation and upgrade, improves the usage of green electricity, enhances the utilization of energy resources, reduces energy consumption and carbon emission per unit output, enhances the service supply capacity of high-quality green products, and accelerates the promotion and application of green and low-carbon new materials, new technologies and new techniques. In 2022, CRSC's emission of greenhouse gas (carbon dioxide) was 74,039 tons¹. The Company further standardized the statistics and computation of carbon dioxide to include that generated from the production of the entire industrial chain of non-industrial enterprises such as engineering construction enterprises and design, R&D and integration enterprises, which specifically includes the emission of carbon dioxide contained in combustion of fossil fuel, purchase of electricity and thermal power.

注 1：本公司温室气体排放参考《2006 年 IPCC 国家温室气体清单指南》《企业温室气体排放核算方法与报告指南发电设施（2021 年修订版）》等文件排放因数，进行统计核算。

提供绿色解决方案 Providing Green Solutions

中国通号紧密围绕当今世界铁路科技发展新形势，在产品的设计、研发、生产、应用全过程深入践行绿色低碳理念，全面提升轨道交通智能调度指挥、驾驶、制造、建造、运维等智能化水平，在能源分级利用、工业园区改造升级、信息化监控智能管理、在线仿真控制技术、绿色建筑智能楼宇等方面不断进行技术优化，推出海绵城市、地下综合管理综合监控与报警系统、智慧建筑综合应用系统等一系列成果，为发展成为全球最大轨道交通控制系统解决方案提供商注入绿色动力、贡献不竭力量。

Adhering closely to the new trends for the current technological development of global railway, CRSC deeply practices the green and low-carbon concept throughout the entire process of product design, R&D, production and application, fully improves the intelligent application in rail transportation including intelligent scheduling and command, driving, manufacturing, construction and operation & maintenance, and continuously optimizes technologies in energy graded utilization, transformation and upgrading of industrial parks, intelligent management of information-based monitoring, online simulation control technology, and intelligent buildings for green buildings, and launches a series of achievements such as sponge city, underground comprehensive management comprehensive monitoring and alarm system, and intelligent building comprehensive application system, to inject green impetus and contribute inexhaustible strengths to developing into the world's largest solution provider of rail transportation control system.

案例 Case 卡斯柯自主研发新系统，推动货运铁路更加节能降碳

New System Independently Researched and Developed by Casco Promotes Freight Railway to Save More Energy and Reduce More Carbon

2022年3月，由卡斯柯自主研发的基于北斗定位的移动闭塞智能列控系统在靖神铁路完成了满载的万吨重载列车追踪试验。这是继多车空载追踪试验后，卡斯柯在列控研发领域的一次重要的技术升级和关键突破。

In March 2022, the mobile block intelligent train control system independently researched and developed by Casco based on Beidou positioning completed the ten-thousand full-load train tracking test on Jingbian-Shenmu Railway. This marks an important technical upgrade and a key breakthrough of Casco in R&D of train control system, after the multi-vehicle no-load tracking test.

基于北斗卫星定位的移动闭塞智能列控系统是货运铁路的技术发展方向，可有效推动铁路运输技术和装备进步，既能满足运营维护单位对高运能、高实时、高密度、无人化及强安全重载货运需求，又有利于实现“碳达峰、碳中和”“公转铁”等国家战略部署针对重载铁路实现绿色低碳转型的要求。

The mobile block intelligent train control system based on Beidou positioning shows the direction for technical development of freight railway and can effectively promote the advances of railway transport technology and equipment. It can not only satisfy the needs of operation & maintenance units for scalable, real-time, highly densified, unmanned and strongly safe heavy-haul freight, but also help realize the requirements of national strategy on green and low-carbon transformation of heavy-haul railway including "carbon peaking, carbon neutrality" and "transferring loads from roadway to railway".

落实环境管理 Environmental Management

中国通号强化全生命周期环境管理，制定节能环保管理制度，完善环境应急机制，落实环境风险常态化管控和环境质量提升工程，加大环保节能检查，在全系统开展“六五”环境日、全国节能宣传周和全国低碳日宣传活动，为公司实施绿色发展奠定坚实基础。2022 年，公司未发生突发环境事件，环境形势持续稳定。

CRSC strengthens full life circle environmental management, formulates the energy-saving environmental protection management system, improves environmental emergency mechanism, implements regular control of environmental risks and improvement of environmental quality, increased environmental energy-saving checks, conducts propaganda activities covering the entire system including the “June 5th” Environment Day, National Energy-saving Publicity Week and National Low Carbon Day to lay solid base for the Company to pursue green development. In 2022, the Company had no environmental emergency accidents and the overall environmental situation is maintained stable.

维护员工权益 Safeguarding the Rights and Interests of Employees

中国通号严格遵守《劳动法》《劳动合同法》《工会法》《企业民主管理规定》等相关法律法规，依法维护国际公认的各项人权，构建合理高效的薪酬福利体系，推进民主管理，建立和谐稳定的劳动关系。

CRSC strictly abides by relevant laws and regulations including the *Labor Law*, the *Labor Contract Law*, the *Trade Union Law* and the *Regulations on Democratic Management of Enterprises*, safeguards human rights recognized by international community according to law, constructs a reasonable and efficient system on remuneration and benefits, promotes democratic management, and establishes harmonious and stable labor relations.

■ 平等雇佣 Equal Employment

中国通号坚持平等雇佣，自觉抵制任何漠视与践踏人权的行为，杜绝一切因国籍、民族、性别、年龄、宗教信仰和文化背景等产生的歧视，落实同工同酬，杜绝雇用童工或强迫劳动；制定《劳动合同管理暂行办法》，依法与员工订立、履行、变更、解除或终止劳动合同，确保劳动合同得到严格履行。

CRSC sticks to equal employment, positively resists any behavior disregarding or trampling human rights, completely eradicates any discrimination caused by the difference in nationality, ethnic group, gender, age, religious belief and cultural background, implements same remuneration for the same position, refuses the employment of child labor or force labor, formulates the *Tentative Measures on Labor Contract Management*, and signs, performs, changes, cancels or terminates the labor contract with employees according to law to ensure strict performance of such contract.

■ 薪酬福利 Remuneration and Benefits

中国通号基本建成工资总额分级分类管理模式，切实建立健全职工工资与经济效益同向联动、能增能减的机制；印发《关于加强全员绩效考核工作的指导意见》健全考核体系，加强绩效考核在薪酬中的运用。为员工按时足额缴纳社会保险费和补充养老保险费、补充医疗保险费及住房公积金，发放或支付各项补贴和福利，制定印发《关于进一步规范实施企业年金的指导意见》，充分体现企业年金制度的公平性。

CRSC basically establishes the tiered and classified management of remunerations, strictly sets up and improves the mechanism to link, increase or decrease employee salary with the economic benefits, and issues the *Guiding Opinions on Strengthening Performance Assessment of Employees* to improve the assessment system and enhance the application of performance assessment in remunerations. The Company pays the social insurance fees, supplementary pension insurance premiums, supplementary medical insurance premiums and housing provident funds for employees in full amount, grants or pays subsidies and allowances of different kind and formulates and issues the *Guiding Opinions on Further Standardizing Enterprise Annuity* to ensure fairness of the Company's annuity system.

■ 民主管理 Democratic Management

中国通号充分实施民主管理，加强民主沟通。建立健全以职工代表大会为基本形式的企业民主管理制度，实行厂务公开，推行民主管理。依法建立职工董事和职工监事制度。依法维护公司和职工的合法权益，建立健全稳定的劳动关系，推动完善集体协商制度，平等协商签订《集体合同》《工资专项协议》，保障员工享有的知情权、参与权、表达权、监督权等民主权利。

CRSC fully implements democratic management to strengthen democratic communications. We establish and improve the democratic management system of enterprises with the basic form of workers' congress, implement the openness of factory affairs and promote democratic management. Establish the system of employee directors and employee supervisors according to law. Safeguard the legitimate rights and interests of the company and employees according to law, establish and improve stable labor relations, promote the improvement of the collective consultation system, negotiate and sign the *Collective Contract and Wage Special Agreement*, protect the democratic rights of employees such as the right to know, participation, expression and supervision.

保障职业健康 Safeguarding Occupational Health

中国通号遵守《职业病防治法》，规范劳动保护职责、劳动保护措施、劳动防护用品管理、事故隐患和事故处理，推动 54 家所属企业全部通过职业健康安全管理体系认证；定期进行体检，梳理涉及职业病危害因素的作业点分布情况，对作业场所进行检测，减少生产过程中产生的职业病危害因素；提供专业心理服务，缓解身心健康压力；加大职业健康宣传，提高职业病防护意识。2020-2022 年，公司因工亡故人数、发生职业病及职业中毒等事故数均为 0。

CRSC abides by the *Law on Prevention and Control of Occupational Diseases* normalizes the duties and measures on labor protection, the management of labor protective supplies and the treatment of potential hazards and accidents, promotes 54 affiliated enterprises to pass the certification of Occupation Health Safety Management System, conducts regular physical examinations, sorts out the operation sites involving hazardous factors of occupational disease and tests such sites to alleviate the hazardous factors generated during production, provides professional mental consultation services to relieve employees of the physical and mental stress, and improves publicity on occupational health to raise the awareness on prevention and control of occupational diseases. From 2020 to 2022, the number of deaths in work-related injury, occupational diseases and occupational poisoning in the Company was 0.

塑造劳模品牌 Building a Model Worker Brand

中国通号大力弘扬劳模精神、劳动精神、工匠精神，开展劳模先进评选，充分弘扬劳动光荣、技能宝贵、创造伟大的时代风尚。

CRSC greatly promotes the spirit of model workers, of labor and of craftsmanship, carries out the selection of advanced model workers, and fully promotes the glorious labor, valuable skills, and creates a great fashion of the times.

同时，中国通号持续深化劳模先进创新创效活动，加强劳模先进创新工作室建设。截至目前，全系统已创建劳模创新工作室 28 个，获得专利 110 项，开展创新攻关项目 103 次，推动创新成果转化 76 项，创造经济效益近 2 亿元，有力推动工会工作与生产经营深度融合。西安工业集团沈信公司邓宇工作室成为全国铁路机务系统劳模和工匠人才创新工作室联盟首批理事会成员单位。

In the meantime, CRSC continues to deepen advanced innovation and efficiency activities of model workers and strengthen the building of the model worker innovation studio. As of now, the Company has established in total 28 innovation studios, won 110 patents, undertaken 103 innovative and key projects, transformed 76 innovative results, and created the economic benefits of nearly RMB 200 million, which effectively promoted the deep integration between the works of labor union and its production and operation. Deng Yu Studio of Shenxin Company of Xi'an Industry Group became one of the first batch of council member units of National Railway Maintenance System Model Worker and Talent Innovation Studio Alliance.

Rating Report

Rating Report of “The 2022 Environment, Social and Governance Report of China Railway Signal & Communication Co., LTD.”

Upon the request of China Railway Signal & Communication Co., LTD., the Chinese Expert Committee on CSR Report Rating invited experts to form a rating team to rate The 2022 Environment, Social and Governance Report of China Railway Signal & Communication Co., LTD. (hereinafter referred to as “the report”).

I. Rating Criteria

Guidelines on China’s Corporate Social Responsibility Reports (CASS-ESG 5.0) by Chinese Academy of Social Sciences, and Rating Standards on China’s Corporate ESG Reports (2023) by the Chinese Expert Committee on CSR Report Rating.

II. Rating Process

1. The Rating Panel reviews and confirms ESG Report Process and Accessibility Materials Confirmation and supporting documents submitted by the CSR Report Compiling Group;
2. The Rating Panel assesses the preparation process and contents of CSR Report, and drafts the Rating Report;
3. Vice Chairman of China Expert Committee on CSR Report Rating, the Leader and experts of the Rating Panel jointly review and sign the Rating Report.

III. Rating Results

Process (★★★★☆)

The company established a report preparation working group, which was led and coordinated by the party-mass work department; the Party committee and the board of directors controlled the content and overall direction of the report, and were responsible for the final review of the report. The information and data cited in the report are objective and true, and have been confirmed by the board of directors; the report is positioned as an important tool for complying with disclosure of responsibility information, standardizing corporate governance, responding to capital market demands, strengthening stakeholder communication, and enhancing brand image. In combination with national macro policies, international and domestic ESG standards, the company development strategies, stakeholder surveys, etc., substantive issues are identified, with leading performance in process.

Materiality (★★★★★)

The report systematically discloses key issues in the industry, such as improving ESG governance, serving national strategies, saving energy and resources, product technology innovation, product quality management, protecting intellectual property rights, safe production, employee health and safety, employee development and training, and sustainable supply chain, with sufficient detailed description and excellent materiality performance.

Integrity (★★★★☆)

The main body of the Report systematically disclosed 88.55% of the core indicators of the industry from the perspectives of “Concept: Listen to Our Heart and Carry Forward the Culture of Responsibility”, “Management: Rely on Trust and Build a Firm Foundation of Responsibility”, “Practice: Take Actions and Manifest Corporate Social Responsibilities”, with leading integrity performance.

Balance (★★★★★)

The report disclosed the negative data, including “corruption-related litigation events”, “fraud litigation cases”, “quality liability accidents”, “production safety general and above liability death accidents”, “special equipment general and above liability accidents”, “engineering quality general and above liability accidents”, “number of deaths in work-related injury”, “occupational diseases and occupational poisoning accidents”, and briefly described the rectification of suppliers for hidden dangers of safe production and bad behaviors of enterprises., with excellent balance performance.

Comparability (★★★★★)

The report disclosed the comparative data of 54 key indicators for three consecutive years, such as “annual R&D investment”, “new authorized patents”, “product qualification rate”, “comprehensive energy consumption”, “per capita training time for female employees”, “overseas open projects”. It emphasized the use of consistent disclosure statistical methods and explained the statistical caliber of core indicators, such as “greenhouse gas

(carbon dioxide) emissions”. Through the horizontal comparison of “the Communication and Signal Branch of China Railway Association has won the first place in the branch assessment of China Railway Association for three consecutive years” and “the total amount of agricultural products purchased from poverty-stricken areas ranks 56th among central enterprises”, with excellent comparability performance.

Readability (★★★★★)

The report innovatively adopted the characteristic frame structure of “Concept”, “Management” and “Practice”. The frame structure is clear and the key issues are prominent, which responds to the expectations and demands of stakeholders. Based on the actual situation of the company, this report put forward the requirement of “continuously strengthening ESG work from three aspects”, which highlights the leading role of enterprises in fulfilling their responsibilities and the sense of the times of reporting; the cover design adopted the concept style, fully integrates the main industry elements, and improved the industry identification and appeal of the report. The design style is simple, and the performance of the responsibility is highlighted by the intuitive comparison diagram. The simple strokes are used to outline the element graphics, which significantly enhances the readability of the report, with excellent readability performance.

Accessibility (★★★★☆)

The report is the 10th ESG report released by China Railway Signal & Communication Co., LTD., and the annual report is expected to be released within one month. It will be published on the company’s official website and exchange website, and spread through social channels such as official wechat. The report can be obtained through Internet search, download, mail and other channels, with good innovativeness performance.
