None of Non-recurring gain /loss items recognized as recurring gain /loss/items as defined by the information disclosure explanatory Announcement No.1- Non - recurring gain/loss in the report period.

### III. Business Profile

#### I .Main Business the Company is Engaged in During the Report Period

##### (I)The company's main business

The company's main business covered such the high and new technology industry as represented by LCD polarizer, its own property management business and the retained business of high-end textile and garment.

During the reporting period, the company's main business conditions are as follows: Firstly, it completes the introduction and mass production of multiple customers and projects, optimizes the sales structure of polarizers, and improves the sales profit margin. Secondly, by strengthening quality inspection and process management, it improves automation level, optimizing supply chain system, promotes inventory elimination and other measures, continuously improves the operational capability and continuously reduces the operating cost of main business. Thirdly, it fully promotes the construction of the industrialization project (Line 7) of ultra-large-size TV polarizers. The project of Line 7 was fully resumed in mid-March due to the epidemic situation. The company is fully promoting the project construction, strengthening the monitoring and management of budget, schedule and quality, actively promoting technical exchanges with Nitto Denko and Kunshan Zhiqimei, and striving to complete all the work on schedule with high quality. Fourthly, in order to jointly cope with the COVID-19 and actively fulfill social responsibilities, the company and its wholly-owned enterprises respond to the call of Shenzhen Municipal Party Committee and Municipal Government and State-owned Assets Supervision and Administration Commission, and reduce the rent of some tenants of their own properties (except residential properties) in February and March this year. Fifthly, in order to improve the overall operation ability of the company's assets and revitalize the existing assets, the company plans to implement the transfer and liquidation work for the poorly managed shareholding enterprises and concentrate on developing the polarizer business. Sixthly, it implements the epidemic prevention and control work, focuses on safe and green production. The company sets up a special class for epidemic prevention and control work, forms a coordinated and efficient epidemic prevention work mechanism with responsibilities according to division and level-by-level transmission, which ensures the implementation of various deployment measures, concentrated remediation, focused investigation of safety and environmental protection issues, promotes the safe and stable development of enterprise, and actively fulfills social responsibilities.

##### (II)Main products and their purposes

As a type of upstream raw materials of LCD panels and one of essential and fundamental materials in the panel display industry, polarizers are widespread used in a variety of areas, LCD panels and OLED panels for smart phones, tablet PCs and TV sets, instruments, apparatuses, sunglasses, and light filters of camera equipment, to name a few. At the moment, the Company has 6 mass polarizer production lines for making products that cover such areas as TN, STN, TFT, OLED, 3D, dye films, and optical films for touch screens and are primarily used in TV, NB, navigators, Monitor, vehicle-mounted, industrial control, instruments, apparatuses, smart phones, wearable equipment, 3D glasses, sunglasses and other products, based on which, the Company has become a qualified supplier to China Star Optoelectronics Technology (CSOT), BOE, Century Technology, LGD, Tianma and other major panel enterprises through constant extension of its marketing channels and building of its own brand.

##### (III)Operation model

The company's main business polarizer business model is customer demand-centered, joint research and

development, and comprehensive service. The Company reduces production links and costs and creates value for customers and a win-win situation through cooperation by deeply understanding customers' needs, making high-quality products through multi-party joint research & development and high-standard production management and using advanced polarizer rolling and attaching equipment in conjunction with downstream panel manufacturers' production lines.

#### (IV) Major performance drivers

Refer to "III. Analysis on core competitiveness" in this section for details.

Relying on more than 20 years of industrial operation experience and regional advantages, the Company will deepen the mixed-ownership reform work and strengthen strategic cooperation. To be specific, the Company will further promote its production technology and business management standards through integration of resources in the polarizer and optical film industries; meanwhile, the Company will seize the opportunity and spare no effort to push forward the construction of an ultra-wide polarizer production line to occupy the highly lucrative jumbo LCD TV polarizer product market; in addition to working on the polarizer industry, the Company will make a leaping development towards the optical film industry related with flat panel display to make SAPO Photoelectric a bigger and stronger enterprise.

## II. Major Changes in Main Assets

### 1. Major Changes in Main Assets

Main assets	Major changes
Equity assets	No major changes
Fixed assets	No major changes
Intangible assets	No major changes
Construction in process	At the end of the period, the Construction in process increased by RMB 115.3819 million compared with the beginning of the period, an increased of 13.74%, Mainly due to the current investment of Line 7 project.

### 2. Main Conditions of Overseas Assets

Applicable  Not applicable

## III. Analysis On core Competitiveness

### (1) Technology advantages.

Shengbo Optoelectronic is the first domestic national high-tech company which entered into the R&D and production of the polarizer, We are one of the largest, most technical and professional polarizer R&D teams in the country and has more than 20 years of operating experience in the polarizer industry. Products include TN-type, STN-type, IPS-TFT-type, VA-TFT-type, OLED, vehicle-mounted industrial display, flexible display, 3D stereo and polarizer for sunglasses, and optical film for touch screens, etc., We have proprietary technology for polarizers and new intellectual property rights for various new products. By the end of the reporting period, SAPO Photoelectric has applied for 101 patents in total (76 licensed), including 30 national invention patents (12

licensed), 64 national utility model patents (60 licensed), 1 international invention patent (0 licensed) and 6 international utility model patents (4 licensed). SAPO Photoelectric studied and formulated 4 national standards and 2 industrial standards which have been adopted and put into practice. SAPO Photoelectric has two technical platforms--"Shenzhen Polarizing Materials and Technology Engineering Lab" and "Shenzhen Municipal Research and Development Center" where focus is given to research & development and industrialization of key LCD polarizer production techniques, research & development and industrialization of new OLED polarizer products and research on localization of polarizer production materials. Through the introduction of various types of sophisticated testing equipments to perfect the test means of small-scale test and medium-scale test, further by improving the incentive system of research and development and building the collaborative innovation platform of "Industry-Study-Research-Utilization" and so forth means, the company comprehensively enhanced the level of research and development.

(2) Talents advantages. The Company has a polarizer management team and a team of senior technicians with strong technical ability, long-term cooperation, rich experience and international vision. Through open market selection, the Company has hired professional senior management personnel, built a team of professional managers, cultivated a professional manager culture and enhanced the core competitiveness of the enterprise. The Company has established a technical cooperation relationship with Nitto Denko Corporation, a world-class polarizer manufacturer, to learn advanced polarizer production management concepts. Meanwhile, the Company has accumulated technical experience through independent innovation, improved its core competitiveness, and gradually accumulated its own advantages in brand, technology, operation and management.

According to the objectives of operation improvement and management optimization, in order to improve the operation status of SAPO Photoelectric, further promote the specialization, professionalization and marketization of management personnel and optimize the management team, the top-level design of SAPO Photoelectric was completed in January 2020, and 3 professional managers were selected and assigned to posts through marketization. Meanwhile, in order to effectively promote the improvement of key business issues, SAPO Photoelectric has completed the organizational structure adjustment, leadership division, internal competition for middle managers and section chiefs, as well as contractual management of market-based selection of management teams, and establishment of salary assessment mechanism.

(3)Market advantages. The company has a good market customer base at home and abroad. Compared with foreign advanced counterparts, the biggest advantage lies in localization, close to panel market and strong support of national policies. In terms of market demand, with the construction and planning of Generation 10.5/Generation 11 and advanced generation TFT - LCD panel production line production in succession, the production capacity of advanced generation TFT-LCD panels will increase considerably in the next few years in mainland China, and the corresponding domestic market demand for polarizers will also grow. The domestic market is the most important market for polarizer manufacturers, especially the large-scale polarizer market, which will usher in important industry opportunities in mainland China; When it comes to market development, focused on customers' needs, the Company will keep optimizing its production process and product structure, tighten quality control and well bind production and sales together, build a quick response mechanism, give full play to its local strengths, take advantage of all the techniques and talents accumulated, provide good point-to-point professional services, promote the verification of all types of machinery concerning the overall strategic deployment and form a stable supply chain to increase its market share.

(4) Quality advantages. The company always adheres to the quality policy of "meeting customer needs and pursuing excellent quality", attaching great importance to product quality control to make products up to the international quality standard. The company has strictly controlled product performance indicators, standardized incoming inspection standard, to achieve simultaneous improvement in output and quality by improving quality

and reducing consumption.through the introduction of a modern quality management system, the products have passed ISO9001 Quality Management System and ISO14001 Environmental Management System, OHSAS18000 Occupational Health and Safety Management System, QCO80000 System Certification; the product is tested by SGS and meets the environmental protection ,The company had increased the automatic detecting and marking equipments in the beginning section and the ending section, strictly controlled the product quality and improved the product utilization rate and product management efficiency.

(5) Management advantages.

The Company has been deeply cultivating the industry for more than 20 years and has accumulated rich management experience in the production of polarizer. It has a domestic leading polarizer production management process control system, quality management system and stable raw material supply channels. The Company has carried out comprehensive benchmarking work, organized managers to learn advanced experience from customers and peers, vigorously implemented standardized management, refined management process, learned from foreign polarizer business management experience, optimized the Company's organizational structure, reduced management levels, and further improved the Company's management efficiency. After introduction of strategic investors, the Company learns from others' strong points and close the gap through the reform of mixed ownership system, absorb the vitality of private enterprises, continues to implement advanced management system and reasonable incentive mechanism, improves decision-making efficiency, speeds up market reaction, perfects R&D incentive system, and realizes the value of enterprises and employees , learn from each other's strengths and make up for the weaknesses, absorb the vitality of private enterprises, continues to the in-depth integration of the value of the company and employees, and stimulates new vitality in business.

(6) Policy advantages. Polarizer is seen as an essential part of the panel display industry and SAPO Photoelectric in its development has promoted the supply capacity of national polarizers, greatly lowered the dependence of national panel enterprises on imported polarizers, and safeguarded the national panel industry, which serves as a good facilitator to enhancing the overall competitiveness of China's panel industry chain and coordinated development of the whole industry chain of the panel display industry cluster in Shenzhen. Recognized as a national high-tech enterprise, SAPO Photoelectric is entitled to the preferential policy for duty-free import of own productive raw materials that cannot be produced at home and frequently gained national, provincial and municipal policy and financial support in its polarizer projects. Meanwhile, SAPO Photoelectric tightened supplier management, improved its overall purchasing strategy, and downsized suppliers while introducing a competitive mechanism, wherein focus was given to introduction of new materials at a competitive price, to further lower its production cost and improve its product competitiveness.

## IV.Management' s Discussion and Analysis

### I .General

In the first half of 2020, facing the severe challenge of the sudden pneumonia epidemic in COVID-19, the company went all out to prevent and control the epidemic and resume production, made great efforts to ensure the main production and operation of polarizers, accelerated the construction of ultra-large TV polarizer line 7 project, responded to the call of the municipal government, municipal SASAC and Shenzhen Investment Holdings, and reduced rent and fees to support the real economy to overcome difficulties.

During the reporting period, the Company realized the operating income of RMB 856 million, representing a decrease of RMB153 million or 15.12% over the same period of last year; the total profit was RMB -3.7328 million, representing a decrease of RMB7.7789 million or 192.26% over the same period last year;the net profit of shareholders attributable to listed companies was RMB 719,700, which was RMB 7.1126 million lower than that of the same period last year and 90.81% lower than that of the same period last year.During the reporting period, the adjustment of the order structure of TFT-LCD Line 4/6 products achieved initial results, and the losses of polarizer business decreased significantly year on year. The main reasons for the decrease in net profit attributable to shareholders of listed companies compared with the same period of last year are as follows: Firstly, in order to jointly cope with the COVID-19 epidemic and actively fulfill social responsibilities, the company and its wholly-owned enterprises responded to the call of the Shenzhen Municipal Party Committee and Municipal Government and SASAC to reduce and exempt some rent of its own properties (except residential properties) in February and March of this year, and the rental income during the reporting period decreased significantly year-on-year; Secondly, during the reporting period, SAPO Photoelectric, a subsidiary, did not carry out trade business, and its income from trade business decreased year on year.

Reviewing the first half of 2020, the company focused on the key work, with contents as follows:

#### (I) Various measures to improve the operation and profitability of polarizer business

During the reporting period, the company carries out the general policy of "maintaining utilization and adjusting structure", adjusts customer orders, optimizes product structure, adjusts sales strategies, reduces the sales share of low and negative gross profit products, successfully completes the import and mass production of multiple products, reaches cooperation intention with some end customers, and makes use of the strict requirements of quality customers on quality, delivery time and cost to improve management level, timely understands market conditions and improves the company's operational capability. Secondly, it strengthens the process management of quality inspection, reduces the rate of customer complaints, and makes every effort to improve the speed of line production machine so as to increase production capacity and ensure the delivery of orders with good quality and quantity. Thirdly, it continuously optimizes the production and operation and reduces the cost. By improving the automation level, optimizing the supply chain system and strictly controlling the increase of inventory, the company reduces the operating cost in many ways.

Meanwhile, in order to improve the competitiveness of products and strengthen the research and development of independent intellectual property rights, the company has carried out a number of development and application of new products and materials and performance improvement projects of mass-produced products around the market demand, and completed the development and introduction of some products and materials on schedule, reducing costs and improving profitability through the application and development of new products and materials. During the reporting period, the company has applied for 2 patents (utility models), and 1 patent

was granted a notice of authorization. With the two technical platforms of "Shenzhen Polarizing Materials and Technology Engineering Laboratory" and "Municipal Research and Development Center", the company focuses on the research and development and industrialization of the core production technology of LCD polarizers, the development and industrialization of new products of OLED polarizers, and the localization of raw materials for polarizer production, actively expands investment in research and development, horizontally explores innovative development of mature products, and enhances its sustainable development capability.

(II) Actively promote the construction of Line 7 project

Affected by the COVID-19, the company is faced with problems such as labor shortage, insufficient supply of engineering materials and equipment, limited transportation, etc. The construction of Line 7 project was not fully resumed until mid-March 2020. The company further strengthened the monitoring and management of budget, schedule, quality and other aspects, rearranged the construction time node, and is currently carrying out the purification and decoration engineering construction and the installation of extension machine equipment. It is planned to complete the main machine equipment debugging in February 2021, and start the trial production.

During the reporting period, the Company has prudently demonstrated that it will invest 147.2 million yuan in the construction of 1 RTP production line and 2 RTS production lines on the Line 7 project. The source of funds is its own funds and bank loans. The main reasons for this increase in investment are first to meet the needs of downstream panel customers and enhance the depth of customer cooperation; second, to help improve the overall production efficiency of the Line 7 project, simplify the production process, and effectively reduce production costs; third, to further improve Enterprise competitiveness provides guarantee for the successful operation of Line 7 project. For the above details, please refer to the "Announcement on the Increase of Investment and Construction Progress in the Industrialization Project of Polarizers for Ultra-large TVs (Line 7)" by Juchao Information Network (<http://www.cninfo.com.cn>) on April 30, 2020. (No. 2020-25).

(III) Actively respond to the call of the Municipal Party Committee and the municipal government, and implement the property rent reduction measures

In accordance with the spirit of the documents of the State-owned Assets Supervision and Administration Commission of the People's Republic of China and Shenzhen Investment Holdings on the implementation of *Several Measures to Support Enterprises to Overcome Difficulties in Response to Pneumonia Infected by COVID-19 in Shenzhen*, the company first issued and published the implementation measures for rent exemption and fee reduction during COVID-19 epidemic period. Non-state-owned enterprises, scientific research institutions, medical institutions, individual industrial and commercial households and operating natural persons who rent the properties of the company and their wholly-owned enterprises have been exempted of the rent for 2 months from February to March this year, which is RMB 13.6931 million according to statistics; Secondly, it sent a letter to 9 shareholders of all 6 participating holding enterprises including property leasing management, proposing that the participating holding enterprises reduce the rent for 2 months, so as to reduce the operating pressure for the entity operators. According to statistics, the participating holding enterprises reduced the rent by RMB 5.7702 million in total.

(IV) Actively strive for policy support

The company comprehensively combs the government's industrial development fund support policies, actively applies for the major award projects of the enterprise technical transformation support plan of the Municipal Bureau of Industry and Information Technology, and applies for various support policies in various national ministries and commissions, relevant departments in Guangdong Province and Shenzhen City. As of the disclosure date of this report, enterprises have actively applied for subsidies for epidemic prevention and control funds and subsidies for projects under construction, totaling RMB 18.8654 million.

(V) Revitalize existing assets and focus on developing the main business

In order to improve the overall operational capability of the company's assets and revitalize existing assets, the company plans to jointly publicly list and transfer 20% equity of Shenzhen Xiangjiang Trading Co., Ltd. held by the company and 80% equity of Shenzhen Xiangjiang Trading Co., Ltd. held by Hunan Guofu Asset Management Co., Ltd., and the company has fulfilled the internal decision-making procedures. After confirming the transfer plan, it will publicly list and collect the intended transferee; Secondly, it well ensures the liquidation of Anhui Huapeng Textile Co., Ltd. and recovers the investment cost. At present, the shareholders of Anhui Huapeng Textile Co., Ltd. have reached an agreement on the employee resettlement and historical issues, and are further accelerating the liquidation work, and plan to complete the liquidation work by the end of this year; Thirdly, it accelerates the dissolution and liquidation of overseas textile and garment processing enterprises. Affected by the Sino-US trade war and epidemic situation, overseas garment processing enterprises that have been participating in the company's shareholding operation for many years are experiencing difficulties and sustained losses, and are gradually reducing their business and striving to complete the dissolution and liquidation work this year.

(VI) Implement epidemic prevention and control properly, and ensure safe production in a stable and orderly manner

Firstly, the company strengthens organizational leadership to effectively prevent and control the spread of the epidemic. The company has set up a special class for epidemic prevention and control, refined the division of responsibilities, enhanced the joint efforts of work, formed a coordinated and efficient epidemic prevention work mechanism with responsibilities according to division and level-by-level transmission, and enhanced the dense epidemic prevention responsibility network to ensure the implementation of various deployment measures and effectively protect the life safety and health of employees.

Secondly, it fully implements the responsibility system for work safety and deepen the investigation and management of potential safety hazards. At the beginning of the year, the company made clear regulations on the work safety of the enterprise, requiring all enterprises to implement the main responsibility of work safety and implement the one-vote veto system of work safety, and incorporate work safety into the annual performance appraisal of enterprise leaders. Meanwhile, the Safety Committee of the Company carried out on-site surprise inspections on construction sites such as Line 7 construction project, Lisi Building facade renovation project and Guanhua Building parking lot project, and issued timely rectification notices of potential safety hazards and problems, which were completed during the reporting period.

(VII) Implement inspection and rectification work and consolidate the foundation of party building

According to the work arrangement of the superior Party Committee, based on the study of the central group of the Party Committee and the "three sessions and one lesson", the company has earnestly carried out various forms of theoretical study, strengthened the annual special assessment of party building, the assessment of party branch secretary and the system construction, and consolidated the foundation of party building. According to the feedback from the Third Inspection Group of the Party Committee of SASAC, it formulates rectification measures, clarifies the time limit for rectification, timely submits rectification reports and publicize the rectification situation, compacts the inspection and rectification responsibilities, and makes overall plans to promote the implementation of rectification.

## II. Main business analysis

Refer to relevant contents of “1. Summarization” in “Discussion and Analysis of Management” .  
Changes in the financial data

In RMB

	This report period	Same period last year	YOY change (%)	Cause change
Operating income	856,313,348.74	1,008,863,295.50	-15.12%	
Operating cost	760,908,303.61	940,587,510.73	-19.10%	
Sale expenses	13,380,921.28	7,369,804.52	81.56%	During the reporting period, the salary of sales staff increased, the increase of sales volume outside the province leads to an increase in transportation costs, and the expansion of customers through channels makes the sales service fees increase year on year.
Administrative expenses	44,347,465.66	42,901,879.68	3.37%	
Financial expenses	1,761,575.96	-730,687.94	341.08%	During the reporting period, interest expenses and exchange losses decrease. Interest income from structured deposits was included in interest income during the same period last year, and investment income is included in this reporting period.
Income tax expenses	5,258,391.87	9,773,007.83	-46.19%	During the reporting period, property leasing and trade profits decrease year-on-year, and asset disposal gains and losses decrease year-on-year.
R & D Investment	24,561,050.95	19,172,388.20	28.11%	During the reporting period, R&D efforts are intensified.
Cash flow generated by business operation, net	-135,619,475.23	23,826,362.35	-669.20%	In the same period of last year, there is recovery of trade receivables in the previous period, but there is none in this reporting period.

Net cash flow generated by investment	48,439,746.15	-450,772,543.46	110.75%	During the reporting period, more structured deposits are recovered than investments, while investment in structured deposits is more than recovered in the same period last year.
Net cash flow generated by financing	-8,981,300.40	-451,630,120.04	98.01%	There is repayment of loan in the same period of last year, but there is no loan in this reporting period.
Net increasing of cash and cash equivalents	-94,940,308.45	-878,027,966.87	89.19%	In the reporting period, the cash flow paid by investment and financing is less than that in the same period of last year.

Major changes in profit composition or sources during the report period

Applicable  Not applicable

The profit composition or sources of the Company have remained largely unchanged during the report period.

### X.Risks facing the Company and countermeasures

#### 1. Macro economic risk

In the second half of 2020, China will still adhere to the principle and policy of "striving for progress while maintaining stability". Although the regular data of current national statistics show that China has made great achievements in preventing and controlling COVID-19, there are some positive signals in the economic situation, and the trend of economic stability and long-term improvement has not changed, the economic difficulties shall

not be ignored. Under the uncertain development of Sino-US relations, the science and technology competition between countries is very likely to face long-term and arduous challenge. As an important part of the electronic information industry, the industry in which the company is engaged in is subject to the possibility that unpredictable fluctuations in macro-economy will cause risks to the company's performance.

Countermeasures: The company will pay close attention to the international economic situation, study national policies and industry trends, strengthen the tracking and analysis of major industry information, and grasp the development and change trends of the industry in a timely manner. Meanwhile, it will continuously optimize the product structure, improve the market development ability, stimulate the vitality of enterprise development, strengthen internal management, control operational risks and ensure the steady development of the company.

## 2. Market risk

Polarizer industry is an important part of China's future manufacturing development. The demand for display panels and the development of corresponding technologies are changing everyday. Chinese technology enterprises are facing the instability of global supply chain, which determines that they will rely more on domestic independent R&D and production in the future, and the localization of polarizer products and domestic substitution of raw materials will also accelerate. In addition, with the gradual mass production of the 10.5<sup>th</sup> and 11<sup>th</sup> generation line and the current layout adjustment of the polarizer industry, the competition faced by the company may become more and more fierce. If the company's technology and products fail to meet the needs of the application field in time, the wide polarizer products and applications will fall short of expectations, or the market competition will intensify, resulting in the price drop of display products and the upward transmission of price reduction pressure to the polarizer market, which will have an adverse impact on the company.

Countermeasures: Facing the complex market environment, on the one hand, the company has comprehensively built the Line 7 project as planned, actively promoted the introduction of new product clients, improved product bargaining power, and stabilized customer confidence; On the other hand, it keeps close communication with customers at all levels, pays close attention to product demand trends, taps market potential, increases market share, continuously improves production line yield and utilization, enhances core competitiveness and deals with market risks.

## 3. Risk of raw material

The core patents of polarizer terminal materials have high technical barriers and are basically monopolized by foreign manufacturers. Thus, patents are the main reason for limiting the localization of raw materials. Currently, the key raw materials for manufacturing polarizers, PVA film and TAC film, are basically monopolized by Japanese companies and the production line and production technology of upstream supporting raw materials are constrained by the Japanese side. Compared with the international manufacturer's complete industrial chain model from upstream raw materials to polarizers to display panels, the Company does not have the corresponding complete industrial support to play the role in industrial integration while the price of major membrane materials is affected by the supplier's production capacity, market demand and the yen exchange rate, which influences the unit cost of the Company's products.

Countermeasures: The company will continue to optimize the supply chain system, improve the bargaining power with suppliers, increase the R&D of independent intellectual property rights, promote the import of low-cost raw materials, actively explore the import substitution of raw materials, improve the utilization and maintain a low level of production loss rate, maintain production stability and continuity, and reduce product production costs; If necessary, the company can choose exchange rate wealth management products such as forward foreign exchange and foreign exchange options to avoid excessive exchange losses caused by sharp exchange rate fluctuations.

## 4. Impact risk of COVID-19

Since January 2020, COVID-19 has broken out world. Although the epidemic prevention and control in China is improving, there are still uncertainties in the global epidemic and epidemic prevention and control. Firstly, if the overseas epidemic situation can not be effectively controlled, it may have an impact on the company's raw material import, product trade and the dissolution and liquidation of overseas garment processing enterprises; Secondly, affected by the epidemic situation, the installation and debugging of the equipment guided by the technical support personnel from Japan of Line 7 project cannot be carried out as planned.

Countermeasures: On the one hand, the company will promote its normal production and operation while ensuring the health of employees, strengthen the upstream raw material supply and the downstream customer demand tracking, ensure the stable development of production and operation, and minimize the adverse effects of the epidemic as much as possible. On the other hand, it will actively communicate with government departments about the entry application of Japanese technicians. If Japanese technicians cannot provide on-site guidance, it will consider adopting online and document communication to receive technical guidance.

## V. Important Events

### I. Annual General Meeting and Extraordinary Shareholders' Meetings in the Reporting Period

#### 1. Annual General Meeting

On November 27, 2017, the Proposal on the Company's Implementation Measures of Evaluation for the 2017 Restricted Stock Incentive Plan (Draft) and summary and the Proposal on the Company's Implementation Measures of Evaluation for the 2017 Restricted Stock Incentive Plan was examined and approved in the 7<sup>th</sup> board meeting of the company's 7<sup>th</sup> session board of directors, and related proposals agreed to fulfill the relevant procedures and related proposals agreed to fulfill the relevant procedures

On December 11, 2017, the SASAC agreed in principle to implement the restricted stock incentive plan.

On December 14, 2017, the company held the third extraordinary shareholders' general meeting in 2017, which reviewed and approved the Proposal on the Company's Implementation Measures of Evaluation for the 2017 Restricted Stock Incentive Plan (Draft) and summary and Proposal on the Company's Implementation Measures of Evaluation for the 2017 Restricted Stock Incentive Plan and other issues.

#### (II) Information on granting the restricted stock

On December 14, 2017, the company held the 8th meeting of the 7th Board of Directors, which reviewed and approved the “Proposal on Adjusting the List of Incentive Objects and Granting Quantity of the 2017 Restricted Stock Incentive Plan” and the “Proposal on Granting the Restricted Stocks to Incentive Objects”. The restricted shares actually granted by this stock incentive plan totaled 4,752,300 shares, and 119 incentive objects were granted, with the granting price was 5.73 yuan per share.

On December 27, 2017, the company's restricted stock completed the grant registration formalities at China Securities Depository and Clearing Corporation Shenzhen Branch.

#### (III) Progress of restricted stock

1. Regarding the repurchase and cancellation of some restricted stocks, i.e. the repurchase and cancellation of restricted stocks in Phase II and held by 3 original incentive objects

On June 4, 2019, the Company convened the 19th meeting of the 7th board of directors and the 13th meeting of the 7th board of supervisors to consider and pass the Proposal on Repurchase and Cancellation of Some Restricted Share, agreeing to repurchase and cancel the 1,877,720 restricted shares held by the Company for 116 incentive objects at a repurchase price of 5.92 yuan/share, which did not meet the conditions for lifting the restriction on sale in phase I. The buyback price of 5.73 yuan per share was used to cancel 58,000 restricted shares held by 3 original incentive subjects who left the company for personal reasons, and a total of 1,935,720 restricted shares were repurchased and canceled.

On June 26, 2019, the Company held its 2018 annual shareholders' meeting to consider and pass the Proposal on Repurchase and Cancellation of Some Restricted Shares, agreeing to repurchase and cancel the 1,877,720 restricted shares held by 116 incentive objects at a repurchase price of 5.92 yuan per share in phase I and 58,000 restricted shares held by 3 original incentive objects who left the company for personal reasons at a repurchase price of 5.73 yuan per share, and a total of 1,935,720 restricted shares were repurchased and canceled.

On September 12, 2019, the above-mentioned restricted stock companies completed the repurchase and cancellation procedures in Shenzhen Branch of China Securities Depository and Clearing Corporation Limited.

2. Regarding the repurchase and cancellation of some restricted stocks, i.e. the repurchase and cancellation of restricted stocks held by 3 original incentive objects

On December 30, 2019, the Company held the 25th meeting of the 7th board of directors and the 17th meeting of the 7th board of supervisors to consider and pass the Proposal on Repurchase and Cancellation of Some Restricted Shares, agreeing that the company will repurchase and cancel 69,900 restricted shares held by 3 original incentive objects who left the company for personal reasons at a repurchase price of 5.73 yuan per share.

On January 16, 2020, the Company convened the first extraordinary shareholders' meeting in 2020 to consider and pass the Proposal on Repurchase and Cancellation of Some Restricted Shares and agreed to

repurchase and cancel 69,900 shares of restricted shares held by 3 original incentive objects who left the company for personal reasons at a repurchase price of 5.73 yuan per share.

On January 17, 2020, the Company's registered capital will be reduced due to the repurchase and cancellation of some restricted stocks. According to the Company Law and other relevant laws and regulations, the Company discloses the Announcement on Reduction of Capital for Repurchase and Cancellation of Some Restricted Stocks (No 2020-02), and creditors are hereby notified that they have the right to require the Company to repay debts or provide corresponding guarantees within 45 days from the date of this announcement. If the creditor fails to exercise the above rights within the prescribed time limit, the repurchase and cancellation will continue to be implemented according to legal procedures.

3. About the repurchase and cancellation of some restricted stocks namely the repurchase and cancellation of phase II restricted stocks and the restricted stocks held by the three original incentive objects

On March 12, 2020, the Company convened the 27th meeting of the 7th Board of Directors and the 19th meeting of the 7th Board of Supervisors, in which it reviewed and approved the "Proposal on the Repurchase of Some Restricted Stocks", agreed that the Company buys back and cancels the restricted stock of the Phase II-that does not meet the conditions for lifting the sales restriction in the second phase of 1,313,340 shares held by 110 incentive objects with a repurchase price of RMB 5.73 per share plus with the interest during the same period that the bank's deposit has, and buys back and cancels the 120,000 restricted stocks-granted but have not been lifted for sale-held by the three original incentive subjects who left for personal reasons with a repurchase price of RMB 5.73 per share, thus a total of 1,433,340 restricted stocks shall be repurchased and cancelled.

On April 3, 2020, the Company held the second extraordinary shareholders' general meeting of 2020, in which it reviewed and approved the "Proposal on the Repurchase of Some Restricted Stocks", agreed that the Company buys back and cancels the restricted stock-that does not meet the conditions for lifting the sales restriction in the second phase of 1,313,340 shares held by 110 incentive objects with a repurchase price of RMB 6.01 per share, and buys back and cancels the 120,000 restricted stocks held by the three original incentive subjects who left for personal reasons with a repurchase price of RMB 5.73 per share, thus a total of 1,433,340 restricted stocks shall be repurchased and cancelled. The afore-mentioned restricted stocks have not yet completed the repurchase and cancellation procedures at the China Securities Depository and Clearing Corporation Limited Shenzhen Branch.

On April 7, 2020, because the repurchase and cancellation of some restricted stocks will reduce the registered capital of the company, according to the *Company Law* and other relevant laws and regulations, the company disclosed the *Announcement on Capital Reduction of Repurchase and Cancellation of Some Restricted Stocks* (No.2020-23), and hereby notified creditors that creditors have the right to require the company to pay off debts or provide corresponding guarantees within 45 days from the date of this announcement. If the creditor fails to exercise the above rights within the prescribed time limit, the repurchase and cancellation will continue to be implemented according to legal procedures.

4. Regarding the repurchase and cancellation of some restricted stocks and the repurchase and cancellation of restricted stocks held by 6 original incentive objects

On June 8, 2020, the company held the 30th meeting of the 7th Board of Directors and the 21st meeting of the 7th Board of Supervisors, and reviewed and approved the *Proposal on Repurchase and Cancellation of Some Restricted Stocks*, aiming to repurchase and cancel the 57,150 restricted stocks held by the five original incentive objects who resigned for personal reasons, with a repurchase price of 5.73 yuan/share; It is proposed to repurchase and cancel 5,760 restricted stocks held by 1 original incentive object who resigned due to retirement, with the repurchase price of 6.14 yuan/share. To sum up, a total of 62,910 restricted stocks were repurchased and cancelled.

On June 29, 2020, the company held the 2019 Annual General Meeting of Shareholders to review and approve the *Proposal on Repurchase and Cancellation of Some Restricted Stocks*, agreeing that the company will repurchase and cancel 57,150 restricted stocks held by 5 original incentive objects who resigned for personal reasons at a repurchase price of 5.73 yuan/share, and agree that the company will repurchase and cancel 5,760 restricted stocks held by 1 original incentive object who resigned due to retirement at a repurchase price of 6.14 yuan/share.

On June 30, 2020, because the repurchase and cancellation of some restricted stocks will reduce the registered capital of the company, according to the Company Law and other relevant laws and regulations, the company disclosed the Announcement on Capital Reduction of Repurchase and Cancellation of Some Restricted Stocks (No.2020-30), and hereby notified creditors that creditors have the right to require the company to pay off debts or provide corresponding guarantees within 45 days from the date of this announcement. If the creditor fails to exercise the above rights within the prescribed time limit, the repurchase and cancellation will continue to be implemented according to legal procedures.

## XVI. Social responsibilities

### 1.Major environmental protection

The Listed Company and its subsidiary whether belongs to the key sewage units released from environmental protection department

Yes

Company or subsidiary name	Main pollutant and specific pollutant name	Emission way	Emission port number	Emission port distribution condition	Emission concentration (mg/Nm <sup>3</sup> )	Implemented pollutant emission standards	Total emission	Verified total emission(Tons)	Excessive emission condition
Shenzhen Shengbo Optoelectronic Technology Co., Ltd.	Exhaust gas: total non-methane hydrocarbons	Altitude emission	2	The discharge port is located on the east side of the roof of Building No. 1	<100mg/m <sup>3</sup>	120mg/m <sup>3</sup>	<84t/a	100.8t/a	No
Shenzhen Shengbo Optoelectronic Technology Co., Ltd.	Effluents : COD	Open channel discharge after treatment	1	厂 Southeast side of plant area	<35mg/L	40mg/L	<16.6t/a	18.98/a	No

Prevention and control of pollution facilities construction and operation

The waste gas treatment facility adopted the RTO waste gas regenerative incineration process of Shengbo Optoelectronic . which can fully meet the emission requirements of discharge gas. The removal rate of organic waste gas VOCs reached more than 99%,Meanwhile, the equipment adopted the imported thermal storage material, with the heat storage effect reached 90%, so that the equipment operation had low energy consumption; after RTO treatment, the exhaust gas produced by the production process can meet the discharge standard.

SAPO Photoelectric wastewater treatment facility has improved Fenton system in the early stage. At present, UASB anaerobic+aerobic+MBR membrane+coagulation sedimentation wastewater treatment process is adopted. The process is characterized by strong impact load resistance, stable system operation, low energy consumption, low maintenance and operation cost, high automation degree and good effluent treatment effect. The wastewater from the production process can meet the environmental protection requirements after being treated by wastewater treatment facilities.

Situation of Construction project environmental impact assessment and other environmental protection administrative licenses

The Company complied with relevant environmental protection regulations at such three stages as project design, construction and operation and obtained environmental protection approvals needed at each corresponding stage including EIA report, EIA approval, environmental protection acceptance decision and emission permit among others.

Emergency Plan for Emergency Environmental Incidents

According to the actual situation of the company, the preparation of the emergency plan for emergency environmental incidents was completed, and an emergency environmental emergency plan filing application

Environmental Self-Monitoring Program

Surveillance done subject to surveillance requirements made by the surveillance station and operation needs of all systems of SAPO, the specific monitoring programs are as follows: organic exhaust gas is 8 times per year (2 per quarter), wastewater discharge is 4 times per year (once per quarter), boiler exhaust gas is 2 times per year (once every six months), and canteen fume is 2 times per year (once every six months), the noise at the plant boundary is 2 times per year (once every six months).

Other Environmental Information That Should Be Disclosed

None

Other Environmental Related Information

None

## 2.Overview of the annual targeted poverty alleviation

The company has no precise social responsibility for poverty alleviation in the period and has no follow-up plan either.

## **XVII.Other material events**

Applicable  Not applicable

(I) Progress of polarizer industrialization project for ultra-large TV (Line 7)

In order to meet the capital demand for the construction of Line 7 project, the 28th meeting of the 7th Board of Directors reviewed and approved the Proposal on Subsidiaries Applying for Mortgage Loans from Banks and the Proposal on Providing Guarantee for Subsidiaries' Mortgage Loans, and the Second Extraordinary General Meeting of Shareholders in 2020 reviewed and approved the Proposal on Providing Guarantee for Subsidiaries' Mortgage Loans, and agreed that Shengbo Optoelectronics Co., Ltd., a subsidiary, will apply for a fixed asset loan of RMB 800 million from the syndicate led by Shenzhen Branch of Bank of Communications Co., Ltd. with some of its self-held properties, with a term of no more than 8 years, and the specific terms and terms are subject to the actually signed loan contract; It is agreed that the company will provide joint liability guarantee for the above loan matters according to the shareholding ratio of 60%, and waive the guarantee fee payable to the company, and authorize the legal representative of the company or its authorized representative to handle the above guarantee matters on behalf of the company and sign the guarantee contract and any other documents related to this guarantee; It is agreed that the company and Jinjiang Group, another guarantor, will make an agreement on issues related to joint liability guarantee. For details, please refer to Announcement No.2020-18, 2020-19 and 2020-22 of cninfo (<http://www.cninfo.com.cn>).

In order to meet the needs of downstream panel customers, improve the overall production efficiency of Line 7 project and enhance the competitiveness of the enterprise, SAPO Photoelectric, a subsidiary, increases its investment by 147.2 million yuan to build one RTP production line and 2 RTS production lines, with its own funds and bank loans. For details, please refer to Announcement No.2020-25 of CNInfo (<http://www.cninfo.com.cn>).

As of the disclosure date of this report, the Line 7 project has completed the capping of the main plant and the manufacturing of extension equipment. Affected by the Coronavirus epidemic, due to labor shortages, insufficient supply of engineering materials and equipment, transportation restrictions, etc., the construction of the Line 7 project was not fully resumed until mid-March 2020. The company further strengthened the monitoring and management of budget, schedule, quality and other aspects, rearranged the construction time node, and is currently carrying out the purification and decoration engineering construction and the installation of extension machine equipment. It is planned to complete the main machine equipment debugging in February 2021, and start the trial production.

During the reporting period, the Company has prudently demonstrated that it will invest 147.2 million yuan in the construction of 1 RTP production line and 2 RTS production lines on the Line 7 project. The source of funds is its own funds and bank loans. The main reasons for this increase in investment are first to meet the needs of downstream panel customers and enhance the depth of customer cooperation; second, to help improve the overall production efficiency of the Line 7 project, simplify the production process, and effectively reduce production costs; third, to further improve Enterprise competitiveness provides guarantee for the successful operation of Line 7 project. For the above details, please refer to the "Announcement on the Increase of Investment and Construction Progress in the Industrialization Project of Polarizers for Ultra-large TVs (Line 7)" by Juchao Information Network (<http://www.cninfo.com.cn>) on April 30, 2020. (No. 2020-25).

As of June 30,2020, the total investment contract amount of the Line 7 project was 1,477.8032 million yuan, and the actual paid-in investment was 1052.9322 million yuan (with raised funds of 409.951 million yuan, and its own funds and government funds of 642.9812 million yuan used).

## (II) Progress of Renting of Guanhua Building

In order to further revitalize the Company's existing assets, concentrate resources on its main business and stimulate the vitality of the enterprise, the Proposal on Transfer of 50.16% Equity of Shenzhen Guanhua Printing and Dyeing Co., Ltd. was deliberated and passed at the 22nd meeting of the 7th Board of Directors and the 2nd Extraordinary General Meeting in 2019. It was agreed that the Company would transfer 50.16% of Guanhua

equity held by the Company through public listing at a price of not less than 340,468,300 yuan in Shenzhen United Property and Share Rights, which was approved by the state-owned assets management department for filing. However, due to market reasons and changes in relevant conditions, after comprehensive consideration by the Company, the shares of Guanhua are not listed on Shenzhen United Property and Share Rights, and the Company will choose a suitable time to list within the validity period of the underlying equity evaluation report (August 30, 2020) according to market conditions and in combination with the actual operation of the Company.

For details, please refer to the Announcement of 2019-55,2019-63 and 2019-71 on the website of <http://www.cninfo.com.cn>.

(I) Matters concerning the company's compensation for arbitration and its subsidiaries' annual performance commitments in 2019

On March 9, 2020, the company received the Notice of Arbitration (No.452 -2) from Shenzhen International Arbitration Court and the Application for Arbitration submitted by Hangzhou Jinjiang Group Co., Ltd., which is the applicant of this arbitration while the company is the respondent. Hangzhou Jinjiang Group Co., Ltd. submitted the following arbitration requests: 1. The ruling made the following changes to the Cooperation Agreement: (1) Delete the original Article 3.1 of the Cooperation Agreement and the relevant unfulfilled rights and obligations will no longer be fulfilled (2) Delete the original Article 6.4 of the Cooperation Agreement, and the relevant unfulfilled rights and obligations will no longer be fulfilled; 2. The respondent shall bear the arbitration fee of the case and the actual expenses of the arbitral tribunal. The applicant reserves the right to further modify the arbitration request.

On March 9, 2020, the company received the Notice of Arbitration (No.452 -2) from Shenzhen International Arbitration Court and the Application for Arbitration submitted by Hangzhou Jinjiang Group Co., Ltd., which is the applicant of this arbitration while the company is the respondent. Hangzhou Jinjiang Group Co., Ltd. submitted the following arbitration requests: 1. The ruling made the following changes to the Cooperation Agreement: (1) Delete the original Article 3.1 of the Cooperation Agreement and the relevant unfulfilled rights and obligations will no longer be fulfilled (2) Delete the original Article 6.4 of the Cooperation Agreement, and the relevant unfulfilled rights and obligations will no longer be fulfilled; 2. The respondent shall bear the arbitration fee of the case and the actual expenses of the arbitral tribunal. The applicant reserves the right to further modify the arbitration request. For details, please refer to the Announcement of 2020-07 on the website of <http://www.cninfo.com.cn>.

On March 26, 2020, the company received the Notice on Extending the Time Limit Appointed by Arbitrators (2020 SGZS No.452 -3) delivered by Shenzhen International Arbitration Court. Due to the complexity of the dispute and the special epidemic background, the applicant needs extra time to negotiate and communicate the procedural matters of the case with the respondent, so it applies to Shenzhen International Arbitration Court to extend the time limit for appointing arbitrators in this case. Shenzhen International Arbitration Court believes that the applicant's request is reasonable, and both parties are requested to notify Shenzhen International Arbitration Court in writing of the arbitrator's appointment result before March 30, 2020. Therefore, the company shall appoint an arbitrator before March 30, 2020 instead of within 15 days after receiving the arbitration notice on March 9, 2020, and notify the Shenzhen International Arbitration Court of the results in writing. For details, please refer to the Announcement of 2020-21 on the website of <http://www.cninfo.com.cn>.

On April 17, 2020, the company received the Notice of Arbitral Tribunal Composition (2020 SGZS No.452-4) from Shenzhen International Arbitration Court. Both parties to the arbitration informed Shenzhen International Arbitration Court in writing of the results of arbitrator selection according to the arbitration procedure before March 30, 2020, and appointed 1 arbitrator respectively and 1 chief arbitrator together. On April 16, 2020, the arbitration tribunal was formed to hear the case.

As of the disclosure date of this report, the company has entrusted a lawyer to submit evidence and materials of this arbitration to the arbitration tribunal in accordance with the arbitration procedures, and submitted a letter of invitation for the applicant to clarify the arbitration request and arrange the hearing. However, due to the epidemic, the arbitration has not yet been held, and the time of the court session has yet to be scheduled. In view of the company's involvement in the above arbitration and the uncertainty of the arbitration results, Jinjiang Group's unfulfilled commitment to the company's subsidiary SAPO Photoelectric in 2019 is uncertain. The company will continue to pay attention to the follow-up progress of this arbitration and fulfill its information disclosure obligations in a timely manner.

### (III) Progress in subsidiaries participating in the establishment of industrial funds

On November 16, 2017, the company's controlling subsidiary SAPO Photoelectric signed the Changxing Junying Equity Investment Partnership (Limited Partnership) Agreement with the fund manager Huizhi Investment Management Co., Ltd, general partner Jinxin Investment Co., Ltd and other limited partners, and co-sponsored the establishment of an industrial fund, focusing on the optical film industry chain related projects related to the company's main business, with a fund size of 50 million yuan. SAPO Photoelectric, as one of the limited partners of the industrial fund, subscribed for a capital contribution of 28.5 million yuan.

For details Juchao Website: (<http://www.cninfo.com.cn>. (Announcement No.2017--55).

On February 10, 2018, Changxing Junying Equity Investment Partnership completed the industrial and commercial registration and completed the private equity investment fund registration on February 8, 2018. For details Juchao Website: (<http://www.cninfo.com.cn>. (Announcement No.2018--05).

As of December 31, 2019, Changxing Junying had accumulated 3 investment projects with a total investment of 42 million yuan.

No	Name	Investment	Fund contribution (RMB 10,000)
1	Shenzhen Kaichuang Shijia Technology Co., Ltd.	Optical Film	1,400
2	Shenzhen Shenfuyu Electronic Technology Co., Ltd.	Optical Film	1,300
3	Shenzhen Hengbaoshun Technology Development Co., Ltd.	Optical Film	1,500

#### 3. Operating cycle

Normal business cycle is realized by the Company in cash or cash equivalents from the purchase of assets form processing until. Less than 1 year is for the normal operating cycle in the company.

With regard to less than 1 year for the normal operating cycle, the assets realized or the liabilities repaid at maturity within one year as of the balance sheet date shall be classified into the current assets or the current liabilities.

#### 4. Accounting standard money

The Company takes RMB as the standard currency for bookkeeping.

#### 5. Accounting process method of enterprise consolidation under same and different controlling.

##### (1) Enterprise merger under same control:

For a business combination involving enterprises under common control, the party that, on the combination date, obtains control of another enterprise participating in the combination is the absorbing party, while that other enterprise participating in the combination is a party being absorbed. Combination date is the date on which the absorbing party effectively obtains control of the party being absorbed.

The assets and liabilities obtained are measured at the carrying amounts as recorded by the enterprise being combined at the combination date. The difference between the carrying amount of the net assets obtained and the carrying amount of consideration paid for the combination (or the total face value of shares issued) is adjusted to the capital premium in the capital reserve. If the balance of the capital premium is insufficient, any excess is adjusted to retained earnings.

The cost of a combination incurred by the absorbing party includes any costs directly attributable to the combination shall be recognized as an expense through profit or loss for the current period when incurred.

##### Accounting Treatment of the Consolidated Financial Statements:

The long-term equity investment held by the combining party before the combination will change if the relevant profit and loss, other comprehensive income and other owner equity are confirmed between the ultimate control

date and the combining date for the combining party and the combined party on the acquirement date, and shall respectively offset the initial retained incomes or the profits and losses of the current period during the comparative statement.

## (2) Business combination involving entities not under common control

A business combination involving enterprises not under common control is a business combination in which all of the combining enterprises are not ultimately controlled by the same party or parties both before and after the business combination. For a business combination not involving enterprises under common control, the party that, on the acquisition date, obtains control of another enterprise participating in the combination is the acquirer, while that other enterprise participating in the combination is the acquiree. Acquisition date is the date on which the acquirer effectively obtains control of the acquiree.

The difference of the merger cost minus the fair value shares of identifiable net assets obtained by the acquiree during the merger on the acquisition date, is recognized as the business reputation. While the merger cost is less than the fair value shares of identifiable net assets obtained by the acquiree during the merger, all the measurement on the identifiable assets, the liabilities, the fair value of liabilities and the merger cost obtained by the acquiree should firstly be rechecked, and the difference shall be recorded into the current profits and costs if the merger cost is still less than the fair value shares of identifiable net assets obtained by the acquiree during the merger after rechecking.

Where the temporary difference obtained by the acquirer was not recognized due to inconformity with the conditions applied for recognition of deferred income tax, if, within the 12 months after acquisition, additional information can prove the existence of related information at acquisition date and the expected economic benefits on the acquisition date arose from deductible temporary difference by the acquiree can be achieved, relevant income tax assets can be recognized, and goodwill offset. If the goodwill is not sufficient, the difference shall be recognized as profit of the current period.

For a business combination not involving enterprise under common control, which achieved in stages that involves multiple exchange transactions, according to “The notice of the Ministry of Finance on the issuance of Accounting Standards Interpretation No. 5” (CaiKuai [2012] No. 19) and Article 51 of “Accounting Standards for Business Enterprises No.33 - Consolidated Financial Statements” on the “package deal” criterion, to judge the multiple exchange transactions whether they are the "package deal". If it belong to the “package deal” in reference to the preceding paragraphs of this section and “long-term investment” accounting treatment, if it does not belong to the “package deal” to distinguish the individual financial statements and the consolidated financial statements related to the accounting treatment:

In the individual financial statements, the total value of the book value of the acquiree's equity investment before the acquisition date and the cost of new investment at the acquisition date, as the initial cost of the investment, the acquiree's equity investment before the acquisition date involved in other comprehensive income, in the disposal of the investment will be in other comprehensive income associated with the use of infrastructure and the acquiree directly related to the disposal of assets or liabilities of the same accounting treatment (that is, except in accordance with the equity method of accounting in the defined benefit plan acquiree is remeasured net changes in net assets or liabilities other than in the corresponding share of the lead, and the rest into the current investment income).

In the combination financial statements, the equity interest in the acquiree previously held before the acquisition date re-assessed at the fair value at the acquisition date, with any difference between its fair value and its carrying amount is recorded as investment income. The previously-held equity interest in the acquiree involved in other

comprehensive income and other comprehensive income associated with the purchase of the foundation should be used party directly related to the disposal of assets or liabilities of the same accounting treatment (that is, except in accordance with the equity method of accounting in the acquiree is remeasured defined benefit plans other than changes in net liabilities or net assets due to a corresponding share of the rest of the acquisition date into current investment income).

## 6.Preparation of the consolidated financial statements

### (1) The scope of consolidation

The scope of consolidation for the consolidated financial statements is determined on the basis of control. Control is the power to govern the financial and operating policies of an enterprise so as to obtain benefits from its operating activities. The relevant events refer to the activities that have significant influence on the return to the invested party. In accordance with the specific conditions, the relevant events of the invested party should conclude the sale and purchase of goods and services, the management of the financial assets, the purchase and disposal of the assets, the research and development activities, the financing activities and so on.

The scope of consolidation includes the Company and all of the subsidiaries. Subsidiary is an enterprise or entity under the control of the Company.

Once the change in the relevant facts and circumstances leading to the definition of the relevant elements involved in the control of the change, the company will be re-evaluated.

### (2) Preparation of the consolidated financial statements.

The Company based on its own and its subsidiaries financial statements, in accordance with other relevant information, to prepare the consolidated financial statements.

For a subsidiary acquired through a business combination not under common control, the operating results and cash flows from the acquisition (the date when the control is obtained) are included in the consolidated income statement and consolidated statement of cash flows, as appropriated; no adjustment is made to the opening balance and comparative figures in the consolidated financial statements. Where a subsidiary and a party being absorbed in a merger by absorption was acquired during the reporting period, through a business combination involving enterprises under common control, the financial statements of the subsidiary are included in the consolidated financial statements. The results of operations and cash flow are included in the consolidated balance sheet and the consolidated income statement, respectively, based on their carrying amounts, from the date that common control was established, and the opening balances and the comparative figures of the consolidated financial statements are restated.

When the accounting period or accounting policies of a subsidiary are different from those of the Company, the Company makes necessary adjustments to the financial statements of the subsidiary based on the Company's own accounting period or accounting policies. Where a subsidiary was acquired during the reporting period through a business combination not under common control, the financial statements was reconciliated on the basis of the fair value of identifiable net assets at the date of acquisition.

Intra-Group balances and transactions, and any unrealized profit or loss arising from intra-Group transactions, are eliminated in preparing the consolidated financial statements.

Minority interest and the portion in the net profit or loss not attributable to the Company are presented separately in the consolidated balance sheet within shareholders' / owners' equity and net profit. Net profit or loss attributable to minority shareholders in the subsidiaries is presented separately as minority interest in the consolidated income statement below the net profit line item.

When the amount of loss for the current period attributable to the minority shareholders of a subsidiary exceeds

the minority shareholders' portion of the opening balance of shareholders' /equity of the subsidiary, the excess is allocated against the minority interests.

When the Company loses control of a subsidiary due to the disposal of a portion of an equity investment or other reasons, the remaining equity investment is re-measured at its fair value at the date when control is lost. The difference between 1) the total amount of consideration received from the transaction that resulted in the loss of control and the fair value of the remaining equity investment and 2) the carrying amounts of the interest in the former subsidiary' s net assets immediately before the loss of the control is recognized as investment income for the current period when control is lost. Other comprehensive income related to the former subsidiary's equity investment, using the foundation and the acquiree directly related to the disposal of the same assets or liabilities are accounted when the control is lost (ie, in addition to the former subsidiary is remeasured at the net defined benefit plan or changes in net assets and liabilities resulting from, the rest are transferred to the current investment income). The retained interest is subsequently measured according to the rules stipulated in the - “ Chinese Accounting Standards for Business Enterprises No.2 - Long-term equity investment” or “ Chinese Accounting Standards for Business Enterprises No.22 - Determination and measurement of financial instruments” .

The company through multiple transactions step deal with disposal of the subsidiary's equity investment until the loss of control, need to distinguish between equity until the disposal of a subsidiary's loss of control over whether the transaction is package deal. Terms of the transaction disposition of equity investment in a subsidiary, subject to the following conditions and the economic impact of one or more of cases, usually indicates that several transactions should be accounted for as a package deal:①these transactions are considered。 simultaneously, or in the case of mutual influence made, ②these transactions as a whole in order to achieve a complete business results; ③the occurrence of a transaction depends on occurs at least one other transaction; ④a transaction look alone is not economical, but when considered together with other transaction is economical.

If they does not belong to the package deal, each of them separately, as the case of a transaction in accordance with “ without losing control over the disposal of a subsidiary part of a long-term equity investments “ principles applicable accounting treatment. Until the disposal of the equity investment loss of control of a subsidiary of the transactions belonging to the package deal, the transaction will be used as a disposal of a subsidiary and the loss of control of the transaction. However, before losing control of the price of each disposal entitled to share in the net assets of the subsidiary 's investment corresponding to the difference between the disposal, recognized in the consolidated financial statements as other comprehensive income, loss of control over the transferred together with the loss of control or loss in the period.

## 7.Joint venture arrangements classification and Co-operation accounting treatment

### (1) Joint arrangement

A joint arrangement is an arrangement of which two or more parties have joint control, depending of the rights and obligation of the Company in the joint arrangement. A joint operation is a joint arrangement whereby the Company has rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the Company has rights to the net assets of the arrangement.

### (2)Co-operation accounting treatment

When the joint venture company for joint operations, confirm the following items and share common business interests related to:

- (1) Confirm individual assets and common assets held based on shareholdings;
- (2) Confirm individual liabilities and shared liabilities held based on shareholdings;

- (3) Confirm the income from the sales revenue of co-operate business output
  - (4) Confirm the income from the sales of the co-operate business output based on shareholdings;
  - (5) Confirm the individual expenditure and co-operate business cost based on shareholdings.
- (3)When a company is a joint ventures, joint venture investment will be recognized as long-term equity investments .

## 8.Recognition Standard of Cash & Cash Equivalents

Cash and cash equivalents of the Company include cash on hand, ready usable deposits and investments having short holding term (normally will be due within three months from the day of purchase), with strong liquidity and easy to be exchanged into certain amount of cash that can be measured reliably and have low risks of change.

## 9.Foreign Currency Transaction

### (1) Foreign Currency Transaction

The approximate spot exchange rate on the transaction date is adopted and translated as RMB amount when the foreign currency transaction is initially recognized. On the balance sheet date, the monetary items of foreign currency are translated as per the spot exchange rate on the balance sheet date, the foreign exchange conversion gap due to the exchange rate, except for the balance of exchange conversion arising from special foreign currency borrowings capitals and interests for the purchase and construction of qualified capitalization assets, shall be recorded into the profits and losses of the current period. The non-monetary items of foreign currency measured at the historical cost shall still be translated at the spot exchange rate on the transaction date, of which the RMB amount shall not be changed. The non-monetary items of foreign currency measured at the fair value shall be translated at the spot exchange rate on the fair value recognized date, the gap shall be recorded into the current profits and losses or other comprehensive incomes.

### (2) Translation Method of Foreign Currency Financial Statement

For the assets and liabilities in the balance sheet, the spot exchange rate on the balance sheet date is adopted as the translation exchange rate. For the owner' s equity, the spot exchange rate on the transaction date is adopted as the translation exchange rate, with the exception of "undistributed profits". The incomes and expenses in the income statement shall be translated at the spot exchange rate or the approximate exchange rate on the transaction date. The translation gap of financial statement of foreign currency converted above shall be listed in other comprehensive incomes under the owner' s equity in the consolidated balance sheet.

## 10.Financial instruments

When the company becomes a party to the financial instrument contract, the relevant financial assets or financial liabilities are confirmed.

### (1) Classification, recognition and measurement of financial assets

In accordance with the characteristics of business model for managing financial assets and the contractual cash flow of financial assets, the Company classifies financial assets into: financial assets measured in amortized cost; financial assets measured at fair value and their's changes are included in other comprehensive income; financial

assets measured at fair value and their's changes are included in current profits and losses.

Financial assets are measured at fair value upon initial recognition. For financial assets measured at fair value, whose changes are included in current profits and losses, relevant transaction costs are directly included in current profits and losses; For other types of financial assets, relevant transaction costs are included in the initial recognition amount. Accounts receivable or notes receivable arising from the sale of products or the provision of labor services that do not include or take into account significant financing components are initially recognized by the Company in accordance with the amount of consideration that the Company is expected to be entitled to receive.

①Financial assets measured at amortized cost

The business model of the Company's management of financial assets measured by amortized cost is aimed at collecting the contractual cash flow, and the contractual cash flow characteristics of such financial assets are consistent with the basic lending arrangements, that is, the cash flow generated on a specific date is only the payment of principal and interest based on the amount of outstanding principal. For such financial assets, the Company adopts the method of real interest rate and makes subsequent measurement according to the cost of amortization. The profits or losses resulting from amortization or impairment are included in current profits and losses.

②Financial assets measured at fair value and changes included in other comprehensive income

The Company's business model for managing such financial assets is to collect the contractual cash flow, and the contractual cash flow characteristics of such financial assets are consistent with the basic lending arrangements. The Company measures such financial assets at fair value and their changes are included in other comprehensive gains, but impairment losses or gains, exchange gains and losses and interest income calculated according to the actual interest rate method are included in current profits and losses.

In addition, the Company designated some non-trading equity instrument investments as financial assets measured at fair value with changes included in other comprehensive income. The Company includes the relevant dividend income of such financial assets in current profits and losses, and the changes in fair value in other comprehensive gains. When the financial asset ceases to be recognized, the accumulated gains or losses previously included in other comprehensive gains shall be transferred into retained income from other comprehensive income, and not be included in current profit and loss.

③Financial assets measured at fair value and changes included in current profits and losses

The Company includes the above-mentioned financial assets measured at amortized cost and those measured at fair value and their's changes in financial assets other than financial assets of comprehensive income and classifies them as financial assets measured at fair value and their's changes that are included in current profits and losses. In addition, the Company designates some financial assets as financial assets measured at fair value and includes their changes in current profits and losses in order to eliminate or significantly reduce accounting

mismatches during initial recognition. In regard with such financial assets, the Company adopts fair value for subsequent measurement, and includes changes in fair value into current profits and losses.

## 2. Classification and measurement of financial liabilities

Financial liabilities are classified as financial liabilities and other financial liabilities measured at fair value at the time of initial recognition and their changes are included in the current profits and losses. For financial liabilities measured at fair value and whose changes are included in current profits and losses, relevant transaction costs are directly included in current profits and losses, and relevant transaction costs for other financial liabilities are included in their initial recognition amount.

### ① Financial liabilities measured at fair value, whose changes are included in current profits and losses

Financial liabilities measured at fair value and whose changes are included in current profits and losses include transactional financial liabilities (including derivatives which are financial liabilities) and financial liabilities designated at fair value at initial recognition and whose changes are included in current profits and losses.

Transactional financial liabilities (including derivatives belonging to financial liabilities) are subsequently measured according to fair value. Except for hedging accounting, changes in fair value are included in current profits and losses.

Financial liabilities designated as financial liabilities that are measured at fair value and their's changes are included in current profits and losses. The liabilities are included in other comprehensive gains due to changes in fair value caused by changes in the Company's own credit risk, and when the liabilities are terminated, the changes in fair value caused by changes in its own credit risk of other comprehensive gains are included in the cumulative changes in its fair value caused by changes in its own credit risk of other comprehensive gains. The amount is transferred to retained earnings. The remaining changes in fair value are included in current profits and losses. If the above-mentioned way of dealing with the impact of the changes in the credit risk of such financial liabilities will result in or expand the accounting mismatch in the profits and losses, the Company shall include all the profits or losses of such financial liabilities (including the amount of the impact of the changes in the credit risk of the enterprise itself) into the current profits and losses.

### ② Other financial liabilities

In addition to the transfer of a financial asset is not in conformity with the conditions to stop the recognition or formed by its continuous involvement in the transferred financial asset, financial liabilities and financial guarantee contract of other financial liabilities classified as financial liabilities measured at the amortized cost, measured at the amortized cost for subsequent measurement, recognition has been stopped or amortization of the profit or loss is included in the current profits and losses.

## 3. Recognition and measurement of financial assets transfer

The Group derecognizes a financial asset when one of the following conditions is met:

- 1) the rights to receive cash flows from the asset have expired;
- 2) the enterprise has transferred its rights to receive cash flows from the asset to a third party under a pass-through arrangement; or
- 3) the enterprise has transferred its rights to receive cash flows from the asset and either has transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

If the enterprise has neither retained all the risks and rewards from the financial asset nor control over the asset, the asset is recognized according to the extent it exists as financial asset, and correspondent liability is recognized. The extent of existence refers the level of risk by the financial asset changes the enterprise is facing.

For a transfer of a financial asset in its entirety that satisfies the derecognition criteria, the carrying amount of the financial asset transferred; and the sum of the consideration received from the transfer and any cumulative gain or loss that had been recognized in other comprehensive income, is recognized in profit or loss.

If a part of the transferred financial asset qualifies for derecognition, the carrying amount of the transferred financial asset is allocated between the part that continues to be recognized and the part that is derecognized, based on the relative fair value of those parts. The difference between (a) the carrying amount allocated to the part derecognized; and (b) the sum of the consideration received for the part derecognized and any cumulative gain or loss allocated to the part derecognized which has been previously recognized in other comprehensive income, is recognized in profit or loss.

The Company uses recourse sale financial assets, or financial assets held endorser, determine almost all of the risks and rewards of ownership of the financial assets have been transferred if. Has transferred the ownership of the financial assets of almost all the risks and rewards to the transferee, the derecognition of the financial asset; retains ownership of the financial assets of almost all of the risks and rewards of financial assets that are not derecognised; neither transfers nor retains ownership of the financial assets of almost all of the risks and rewards, then continue to determine whether the enterprise retains control of the assets and the accounting treatment in accordance with the principles described in the preceding paragraphs.

#### 4.Termination confirmation of financial liabilities

If the current obligation of a financial liability (or part thereof) has been discharged, the Company shall terminate the recognition of the financial liability (or part thereof). If the Company (the debtor) signs an agreement with the lender to replace the original financial liabilities by assuming new financial liabilities, and the contract terms of the new financial liabilities are substantially different from those of the original financial liabilities, it shall terminate the recognition of the original financial liabilities and at the same time confirm a new financial liabilities. If the Company substantially amends the contract terms of the original financial liabilities (or part thereof), it shall terminate the confirmation of the original financial liabilities and at the same time confirm a new financial liabilities in accordance with the revised terms.

If the financial liabilities (or part thereof) are terminated, the difference between their book value and the consideration paid (including the transferred non-cash assets or liabilities assumed) shall be included in the profits and losses of the current period.

## 5. Offsetting financial assets and financial liabilities

When the Company has a legal right that is currently enforceable to set off the recognized financial assets and financial liabilities, and intends either to settle on a net basis, or to realize the financial asset and settle the financial liability simultaneously, a financial asset and a financial liability shall be offset and the net amount is presented in the balance sheet. Except for the above circumstances, financial assets and financial liabilities shall be presented separately in the balance sheet and shall not be offset.

## 6. Method for determining the fair value of financial assets and financial liabilities

Fair value refers to the price that a market participant must pay to sell or transfer a liability in an orderly transaction that occurs on the measurement date. If there is an active market for financial instruments, the Company will determine their fair value by quoting prices in the active market. Quotes in active markets refer to prices that are easily obtained from exchanges, brokers, trade associations, pricing service agencies, etc. on a regular basis, and represent the prices of market transactions that actually occur in fair transactions. For financial instruments with active market, the Company adopts valuation technology to determine their fair values. Valuation techniques include reference to prices used in recent market transactions by parties familiar with the situation and willing to trade, and reference to current fair values of other financial instruments that are substantially the same, discounted cash flow method, option pricing model, etc. In valuation, the Company adopts valuation techniques that are applicable in the current situation and supported by sufficient data and other information to select input values consistent with the characteristics of assets or liabilities considered by market participants in the transactions of related assets or liabilities, and give priority to the use of relevant observable input values as far as possible. Unallowable values are used if the relevant observable input values are not available or are not practicable.

## 7. Our own equity instruments

Equity instruments refer to contracts that can prove ownership of the Company's residual equity in assets after deducting all liabilities. The issuance (including refinancing), repurchase, sale or cancellation of equity instruments by the Company are treated as changes in equity, and transaction costs related to equity transactions are deducted from equity. The Company does not recognize changes in the fair value of equity instruments.

## 11. Notes receivable

The Company shall measure loss preparation for Notes receivable according to the amount of anticipated credit loss equivalent to the entire duration. Based on the credit risk characteristics of bills receivable, they are divided into different combinations:

Items	Basis for determining combination
Bank acceptance	This combination is a receivable bank acceptance bill.
Commercial acceptance bills	This combination is a commercial acceptance bill receivable

## 12.Accounts Receivable

The Company measures the loss reserve for receivables by an amount equivalent to the expected credit loss during the duration.

In regard to accounts receivable with significant financing components, the Company shall choose to measure loss preparation according to the amount equivalent to the expected credit loss within the duration all the time.

In addition to the accounts receivable for which credit risk is assessed individually, aging is used as the credit risk characteristic to measure loss reserve.

Items	Basis for determining combination
Aging portfolio	The credit risk is characterized by the aging of receivables.

## 13. Receivable financing

For bills receivable and accounts receivable classified as those measured at fair value and whose changes are included in other comprehensive income, the portion with self-financing period within one year (including one year) is listed as receivables financing; If the period of self-acceptance is more than one year, it shall be listed as other creditor's rights investment. For relevant accounting policies, please refer to Note III, (10) "Financial Instruments" and Note V, (10) "Impairment of Financial instruments".

## 14.Other account receivable

Determination method and accounting treatment method of expected credit loss of other receivables

The Company has measured the impairment loss based on the amount of expected credit losses in the next 12 months or the entire duration, based on whether the credit risk of other receivables has increased significantly since the initial recognition.

In addition to the other accounts receivable which assesses the credit risk individually, they are divided into different portfolios based on their credit risk characteristics:

Items	Basis for determining combination
Interest receivable	This combination is interest receivable
Dividend receivable	This combination is dividend receivable
Other receivable	This combination is all kinds of daily accounts receivable

## 15.Inventory

### 1.Inventory class

Inventory shall include the finished products or goods available for sale during daily activities, the products in the process of production, the stuff and material consumed during the process of production or the services offered.

### 2. Valuation method of inventory issued

The company calculates the prices of its inventories according to the weighted averages method

### 3. Recognition Criteria for the Net Realizable Value of Different Category of Inventory and Withdrawing Method of Inventory Falling Price Reserves

The inventory shall be measured by use of the lower between the cost and the net realizable value and the inventory falling price reserves shall be withdrawn as per the gap of single inventory cost minus the net realizable value at the balance sheet date. The net realizable value refers to the amounts that the estimated sale price of inventory minus the estimated costs ready to happen till the completion of works, the estimated selling expenses and the relevant expenses of taxation. The company shall recognize the net realizable value of inventory based on the acquired unambiguous evidence and in view of the purpose to hold the inventory, the influence of matters after the balance sheet date and other factors.

The net realizable value of inventory directly for sale shall be recognized according to the amounts of the estimated sale price of the inventory minus the estimated sale expenses and the relevant expenses of taxation during the process of normal production and operation. The net realizable value of inventory that required to conduct processing shall be recognized according to the amounts of the estimated sale price of the finished products minus the estimated costs ready to happen till the completion of works, the estimated selling expenses and the relevant expenses of taxation. On the balance sheet date, the net realizable value shall be respectively defined for the partial agreed with the contract price and others without the contract price in the same inventory, and the amounts of the inventory falling price reserves withdrawn or returned shall be respectively recognized in comparison with their corresponding costs.

### 4. Inventory System: Adopts the Perpetual Inventory System

### 5. Amortization method for low cost and short-lived consumable items and packaging materials

#### (1) Low cost and short-lived consumable items

Low cost and short-lived consumable items are amortized using immediate write-off method.

#### (2) Packaging materials

Packaging materials are amortized using

## 16.Contract assets

The Company lists the customer's unpaid contract consideration for which the Company has fulfilled its performance obligations according to the contract, and which is not the right to collect money from customers unconditionally (that is, only depending on the passage of time) as a contract asset in the balance sheet. Contract assets and liabilities under the same contract are listed in net amount, while contract assets and liabilities under different contracts are not offset.

## 17.Contract assets

### (1) Method for determining asset amount related to contract cost

Assets related to contract costs include contract acquisition costs and contract performance costs.

The contract performance cost, that is, the cost incurred by the company for the performance of the contract, which does not fall within the scope of other accounting standards for business enterprises and meets the following conditions at the same time, is recognized as an asset for contract performance cost: The cost is directly related to a current or expected contract, including direct labor, direct materials, manufacturing expenses (or

similar expenses), costs explicitly borne by customers, and other costs incurred only because of the contract; This cost increases the resources of the Company for fulfilling its performance obligations in the future; The cost is expected to be recovered.

The contract acquisition cost, that is, the incremental cost incurred by the company to obtain the contract is expected to be recovered, is recognized as an asset for contract acquisition cost; If the amortization period of this asset does not exceed one year, it will be included in the current profits and losses in when it occurs. Incremental cost refers to the cost that will not happen if the company does not obtain the contract (such as sales commission, etc.). Other expenses (such as travel expenses that will be incurred regardless of whether the contract is obtained or not) incurred by the Company in order to obtain the contract are included in the current profits and losses when they occur, except those explicitly borne by the customer.

#### (2) Amortization of assets related to contract costs

The assets related to the contract cost shall be amortized on the same basis as the revenue recognition of goods or services related to the assets, and shall be included in the current profits and losses.

#### (3) Impairment of assets related to contract cost

If the book value of the asset related to the contract cost is higher than the expected residual consideration for transferring the goods or services related to the asset minus the estimated cost to be incurred, the company will make provision for impairment of the excess and recognize it as the asset impairment loss. If the factors of impairment in previous periods change later, so that the remaining consideration expected to be obtained by transferring the goods or services related to the asset minus the estimated costs to be incurred is higher than the book value of the asset, the original provision for impairment of assets shall be reversed and included in the current profits and losses, but the book value of the asset after reversal shall not exceed the book value of the asset on the reversal date assuming no accrual for impairment provision.

### 18.Held-for-sale assets

If the company recovers its book value mainly by sale of non-current asset (including exchange of non-monetary assets of commercial nature and similarly hereinafter) , instead of continued use of one non-current asset or disposal group, which shall be included into available-for-sale. In specific standards, the following conditions shall be met at the same time: One non-current asset or disposal group is available for sale at all times under current status depending on standard practice of selling them in similar transactions; the company has made a resolution on the sale plan and gained definitive purchase commitments; the sale is expected to be finished within one year. In which, the disposal group refers to one set of assets that may be disposed as a whole along with other assets by sale or other ways in one deal and the liability transferred and related directly to such assets. If the asset group or combination of asset group under account title disposal group amortizes the goodwill obtained from business combination in accordance with No.8 of Accounting Standards for Business Enterprises--Asset Impairment, the disposal group shall include the goodwill amortized to it.

When the company's initial measurement or re-measurement on the balance sheet date is classified into available-for-sale non-current asset and disposal group, the book value shall be written down to the net amount of fair value minus selling expenses if it is higher than the net amount of fair value minus selling expenses, the write-down shall be confirmed as the assets impairment loss and included in current profits and losses, meanwhile the available-for-sale asset depreciation reserves shall be accrued. For the disposal group, the asset impairment loss shall be written off pro rata the book value of each non-current asset that is applicable to No.42 of Accounting Standards for Business Enterprises: Available-for-sale Non-current Assets, Disposal Group and Discontinued Operations (hereinafter referred to as "Available-for-sale rule for measurement") after deducting the

book value of goodwill in it.

If the net amount of the fair value of available-for-sale disposal group minus selling expenses increases after the balance sheet date, the previous write-downs shall be recovered and reversed in asset impairment loss of non-current assets that are applicable to available-for-sale rule for measurement after being included into available-for-sale account title, the amount of reversal shall be included in current profits and losses and increased pro rata its book value based on the proportion of the book value of each non-current asset in the disposal group that is applicable to available-for-sale rule for measurement except for goodwill; the book value of written-off goodwill and the asset impairment loss confirmed before the non-current asset specified in available-for-sale rule for measurement is classified into available-for-sale asset must not be reversed.

The available-for-sale non-current assets or the non-current assets in the disposal group shall not be accrued depreciation or amortization, the interest of debit in available-for-sale disposal group and other expenses shall continue to be confirmed.

The non-current asset will no longer be included into available-for-sale category or will be removed from the available-for-sale disposal group if it or the disposal group has no longer satisfied the conditions for classifying available-for-sale assets and measured as per the lower of: (1) book value of the non-current asset before being classified into available-for-sale asset adjusted on the basis of the depreciation, amortization or impairment that shall be confirmed on the assumption that the non-current asset is not included into available-for-sale account title; (2) Recoverable amount.

#### 19.Creditor's rights investment

Creditor's rights investment mainly accounts for bond investment measured by amortized cost, etc. The Company has measured the impairment loss based on the amount of expected credit losses in the next 12 months or the entire duration, based on whether the credit risk has increased significantly since the initial recognition.

#### 20. Other Creditor's rights investment

Other debt investments are mainly accounted for as bond investments measured at fair value and their changes are included in other comprehensive income. The Company has measured the impairment loss based on the amount of expected credit losses in the next 12 months or the entire duration, based on whether the credit risk has increased significantly since the initial recognition.

#### 21.Long-term account receivable

None

#### 22.Long-term equity investments

Long-term equity investments referred to in this section refer to the Company invested entity has control, joint control or significant influence over the long-term equity investments. The Company invested does not have control, joint control or significant influence over the long-term equity investments as financial assets available for sale or at fair value and the changes included financial assets through profit or loss.

Joint control is the Company control over an arrangement in accordance with the relevant stipulations are common, related activities and the arrangement must be after sharing control participants agreed to the

decision-making. Significant influence is the Company's financial and operating policies of the entity has the right to participate in decision-making, but can not control or with other parties joint control over those policies.

#### 1. Determination of Investment cost

The cost of a long-term equity investment acquired through business combination under common control is measured at the acquirer's share of the combination date book value of the acquiree's net equity in the ultimate controller's consolidated financial statements. The difference between the cost and book value of cash paid, non-monetary assets transferred and liabilities assumed is adjusted to capital reserves, and to retained earnings if capital reserves is insufficient. If the consideration is transferred by way of issuing equity instruments, the face value of the equity instruments issued is recognised in share capital and the difference between the cost of the face value of the equity instruments issued is adjusted to capital reserves, and to retained earnings if capital reserves is insufficient. The cost of a long-term equity investment acquired through business combination not under common control is the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued. (For the equity of the combined party under common control obtained step-by-step through multiple transactions and the business combination under common control ultimately formed, the company should respectively dispose all the transactions if belong to the package deal. For the package deal, all the transactions will be conducted the accounting treatment as the deal with acquisition of control. For the non-package deal, the shares of the book value of the stockholders' equity/owners' equity of the combined party in the consolidated financial statements of the ultimate control party shall be as the initial investment cost of the long-term equity investment, and the capital reserves shall be adjusted for the difference between the initial investment cost of long-term equity investment and the sum of the book value of long-term equity investment before merging and that of new consideration payment obtained on the merger date, or the retained earnings shall be adjusted if the capital reserves are insufficient to offset. As for the equity investment held before the merger date, the accounting treatment will not be conducted temporarily for other comprehensive income accounted by equity method or confirmed for the financial assets available for sale.)

All expenses incurred directly associated with the acquisition by the acquirer, including expenditure of audit, legal services, valuation and consultancy and other administrative expenses, are recognised in profit or loss for the period during which the acquisition occurs. For the merger of enterprises not under the same control through gaining the shares of the combined enterprise by multiple steps of deals, it shall deal with it in the following two ways depending on that if it belongs to "a package deal": if it belongs to "a package deal", it shall deal with all the deals as one obtaining the control power; if it does not belong to "a package deal", it shall, on the date of merger, regard the sum of book value of the owner's original equity of the merged enterprise and the newly increased investment cost as the initial cost of the long-term equity investment. For the shares originally held by this enterprise accounted for by weighted equity method, the relevant other comprehensive income shall not be accounted for temporarily. If the equity investment held originally can be classified as the financial assets for sale, the difference between the fair value and the book value, and the variation in the accumulative fair value of other comprehensive returns recorded originally will be transferred into the current profits and losses.

All expenses incurred directly associated with the acquisition by the acquirer, including expenditure of audit, legal services, valuation and consultancy and other administrative expenses, are recognised in profit or loss for the period during which the acquisition occurs.

Long-term equity investments acquired not through business combination are measured at cost on initial recognition. Depending on the way of acquisition, the cost of acquisition can be the total cash paid, the fair value of equity instrument issued, the contract price, the fair value or book value of the assets given away in the case of

non-monetary asset exchange, or the fair value of the relevant long-term equity investments. The cost of acquisition of a long-term equity investment acquired not through business combination also includes all directly associated expenses, applicable taxes and fees, and other necessary expenses. When the significant impact or the joint control but non-control on the invested party can be implemented due to the additional investment, the long-term equity investment cost is the sum of the fair value of the equity investment originally held and the new investment costs based on the recognition of “Accounting Standards for Enterprises No.22 – Recognition and Measurement of Financial Instruments” .

## 2. Subsequent Measurement

To be invested joint control ( except constitute common operator ) or long-term equity investments significant influence are accounted for using the equity method. In addition, the Company's financial statements using the cost method of accounting for long-term equity can exercise control over the investee.

### (1) Cost method of accounting for long-term equity investments

Under the cost method, a long-term equity investment is measured at initial investment cost. Except for cash dividends or profits declared but not yet paid that are included in the price or consideration actually paid upon acquisition of the long-term equity investment, investment income is recognized in the period in accordance with the attributable share of cash dividends or profit distributions declared by the investee.

### (2) Equity method of accounting for long-term equity investments

When using the equity method, the initial investment cost of long-term equity investment exceeds the investor's net identifiable assets of the fair share of the investment value, do not adjust the initial investment cost of long-term equity investment; the initial investment cost is less than the investee unit share of identifiable net assets at fair value, the difference is recognized in profit or loss, while the long-term equity investment adjustment costs.

Where the initial investment cost of a long-term equity investment exceeds the investing enterprise's interest in the fair values of the investee's identifiable net assets at the time of acquisition, no adjustment shall be made to the initial investment cost. The carrying amount of an long-term equity investment measured using the equity method is adjusted by the Company's share of the investee's net profit and other comprehensive income, which is recognised as investment income and other comprehensive income respectively. The carrying amount of an long-term equity investment measured using the equity method is reduced by profit distribution or cash dividends announced by the investee. The carrying amount of an long-term equity investment measured using the equity method is also adjusted by the investee's equity movement other than net profit, other comprehensive income and profit distribution, which is adjusted to capital reserves. The net profit of the investee is adjusted by the fair value of the investee's identifiable assets as at acquisition. The financial statements and hence the net profit and other comprehensive income of an investee which does not adopt accounting policies or accounting period uniform with the Company is adjusted by the Company's accounting policies and accounting period. The Company's share of unrealised profit or loss arising from related party transactions between the Company and an associate or joint venture is deducted from investment income. Unrealised loss arising from related party transactions between the Company and an associate or joint venture which is associated with asset impairment is not adjusted. Where assets transferred to an associate or joint venture which form part of the Company's investment in the investee but which does not enable the Company obtain control over the investee, the cost of the additional investment acquired is measured at the fair value of assets transferred and the difference between the cost of the additional investment and the book value of the assets transferred is recognised in profit or loss. Where assets transferred to an associate or joint venture form an operation, the difference between the consideration received and the book value of the assets transferred is recognised in profit or loss. Where assets transferred from an associate or joint venture form

an operation, the transaction is accounted for in accordance with CAS 20 - Business Combination, any gain or loss is recognised in profit or loss.

The Company's share of an investee's net loss is limited by the sum of the book value of the long-term equity investment and other net long-term investments in the investees. Where the Company has obligation to share additional net loss of the investee, the estimated share of loss recognised as accrued liabilities and investment loss. Where the Company has unrecognised share of loss of the investee when the investee generates net profit, the Company's unrecognised share of loss is reduced by the Company's share of net profit and when the Company's unrecognised share or loss is eliminated in full, the Company's share of net profit, if any, is recognised as investment income.

### (3) Acquisition of minority interest

The difference between newly increased equity investment due to acquisition of minority interests and portion of net asset cumulatively calculated from the acquisition date is adjusted as capital reserve. If the capital reserve is not sufficient to absorb the difference, the excess are adjusted against returned earnings.

### (4) Disposal of long-term equity investment

Where the parent company disposes long-term investment in a subsidiary without a change in control, the difference in the net asset between the amount of disposed long-term investment and the amount of the consideration paid or received is adjusted to the owner's equity. If the disposal of long-term investment in a subsidiary involves loss of control over the subsidiary, the related accounting policies in Note applies. For disposal of long-term equity investments in any situation other than the fore-mentioned situation, the difference between the book value of the investment disposed and the consideration received is recognised in profit or loss.

The investee's equity movement other than net profit, other comprehensive income and profit distribution is recognised in profit or loss proportionate to the disposal.

Where a long-term equity investment is measured by the equity method both before and after part disposal of the investment, cumulative other comprehensive income relevant to the investment recognised prior to the acquisition is treated in the same manner that the investee disposes the relevant assets or liabilities proportionate to the disposal. The investee's equity movement other than net profit, other comprehensive income and profit distribution is recognised in profit or loss proportionate to the disposal.

Where a long-term equity investment is measured at cost both before and after part disposal of the investment, cumulative other comprehensive income relevant to the investment recognised, as a result of accounting by equity method or recognition and measurement principles applicable to financial instruments, prior to the Company's acquisition of control over the investee is treated in the same manner that the investee disposes the relevant assets or liabilities and recognised in profit or loss proportionate to the disposal. The investee's equity movement other than net profit, other comprehensive income and profit distribution, as a result of accounting by equity method, is recognised in profit or loss proportionate to the disposal.

Where the Company's control over an investee is lost due to partial disposal of investment in the investee and the Company continues to have significant influence over the investee after the partial disposal, the investment is measured by the equity method in the Company's separate financial statements; where the Company's control over an investee is lost due to partial disposal of investment in the investee and the Company ceases to have significant influence over the investee after the partial disposal, the investment is measured in accordance with the recognition and measurement principles applicable to financial instruments in the Company's separate financial statements and the difference between the fair value and the book value of the remaining investment at the date of

loss of control is recognised in profit or loss. Cumulative other comprehensive income relevant to the investment recognised, as a result of accounting by equity method or recognition and measurement principles applicable to financial instruments, prior to the Company's acquisition of control over the investee is treated in the same manner that the investee disposes the relevant assets or liabilities on the date of loss of control. The investee's equity movement other than net profit, other comprehensive income and profit distribution, as a result of accounting by equity method, is recognised in profit or loss when control is lost. Where the remaining investment is measured by equity method, the fore-mentioned other comprehensive income and other equity movement are recognised in profit or loss proportionate to the disposal; Where the remaining investment is measured in accordance with the recognition and measurement principles applicable to financial instruments, the fore-mentioned other comprehensive income and other equity movement are recognised in profit or loss in full.

Where the Company's joint control or significant influence over an investee is lost due to partial disposal of investment in the investee, the remaining investment in the investee is measured in accordance with the recognition and measurement principles applicable to financial instruments, the difference between the fair value and the book value of the remaining investment at the date of loss of joint control or significant influence is recognised in profit or loss. Cumulative other comprehensive income relevant to the investment recognised, as a result of accounting by equity method, prior to the partial disposal is treated in the same manner that the investee disposes the relevant assets or liabilities on the date of loss of joint control or significant influence. The investee's equity movement other than net profit, other comprehensive income and profit distribution is recognised in profit or loss when joint control or significant influence is lost.

Where the Company's control over an investee is lost through multiple disposals and the multiple disposals shall be viewed as one single transaction, the multiple disposals is accounted for one single transaction which result in the Company's loss of control over the investee. Each difference between the consideration received and the book value of the investment disposed is recognised in other comprehensive income and reclassified in full to profit or loss at the time when control over the investee is lost.

### 23. Investment property

The measurement mode of investment property

The company shall adopt the cost mode to measure the investment property.

Depreciation or Amortization Method by Use of Cost Mode

#### 1. The measurement mode of investment property

The investment property of the company includes the leased land use rights, the leased buildings, the land use rights held and prepared to transfer after appreciation.

The company shall adopt the cost mode to measure the investment property.

#### 2. Depreciation or Amortization Method by Use of Cost Mode

The leased buildings of the investment property in the company shall be withdrawn the depreciation by the service life average method, and the depreciation policy is the same with that of the fixed assets. The land use rights held and prepared to transfer after appreciation in the investment property shall be amortized by the line method, and the specific accounting policy is same with that of the intangible assets.

## 24.Fixed assets

## 1. The conditions of recognition

Fixed assets refers to the tangible assets that are held for the sake of producing commodities, rendering labor service, renting or business management and their useful life is in excess of one fiscal year. The fixed assets can be recognized when the following requirements are all met: (1) the economic benefits relevant to the fixed assets will flow into the enterprise. (2) the cost of the fixed assets can be measured reliably. The fixed assets of the company include the houses and buildings, the decoration of the fixed assets, the machinery equipment, the transportation equipment, the electronic instrument and other devices.

## 2. The method for depreciation

Category	The method for depreciation	Expected useful life (Year)	Estimated residual value	Depreciation
House and Building-Production	Straight-line method	35	4	2.74
House and Building-Non-Production	Straight-line method	40	4	2.4
Decoration of Fixed assets	Straight-line method	10	0	10
Machinery and equipment	Straight-line method	10-14	4	9.60-6.86
Transportation equipment	Straight-line method	8	4	12
Electronic equipment	Straight-line method	8	4	12
Other equipment	Straight-line method	8	4	12

## 3. Cognizance evidence and pricing method of financial leasing fixed assets

## (1) Recognition Criteria of the Fixed Assets under Financing Lease

The financing lease shall be recognized if the following one or several criteria are met: ① the ownership of the leasing assets shall be transferred to the tenant when the expiration of lease term. ② the tenant has the option to purchase the leasing assets, and the made purchase price is expected to be far less than the fair value of the leasing assets in the implementation of the option. Thus, it can be reasonably recognized that the tenant will implement the option on the lease date. ③ the ownership of assets is not transferred, but the lease term shall be the most of

the life of the lease assets. ④ the least present value of the lease payment of the tenant and the least present value of the lease receipts on the lease date almost equal to the fair value of the leasing assets on the lease date respectively. ⑤ the leasing assets have the special nature, and only the tenant can use if there is no major modifications.

(2) Valuation of Fixed Assets Acquired under Finance Leases: the fixed assets acquired under finance leases shall be book kept according to the lower between the fair value of the leasing assets and the least lease payment on the lease date.

(3) Depreciation Method of Fixed Assets Acquired under Finance Leases: the depreciation shall be withdrawn for the fixed assets acquired under finance leases as per the depreciation policy of own fixed assets.

## 25. Construction in progress

1. The projects under construction shall be recognized when the economic benefits may flow into and the cost can be reliably measured. Meanwhile, the projects under construction shall be measured according to the actual cost occurred before the assets are built to achieve the expected usable condition.

2. The projects under construction shall be transferred into the fixed assets according to the actual project costs when the expected usable condition achieved. For the expected usable condition achieved while the final accounts for completed projects not handled yet, the projects shall be transferred into the fixed assets as per the estimated value. After the final accounts for completed projects handled, the original estimated value shall be adjusted as per the actual cost, but the original withdrawn depreciation shall not be adjusted again.

## 26. Borrowing costs

### 1. Recognition principles for capitalizing of loan expenses

Borrowing expenses occurred to the Company that can be accounted as purchasing or production of asset satisfying the conditions of capitalizing, are capitalized and accounted as cost of related asset. Other borrowing expenses are recognized as expenses according to the occurred amount, and accounted into gain/loss of current term.

### 2. Duration of capitalization of Loan costs

(1). When a loan expense satisfies all of the following conditions, it is capitalized:

1. Expenditures on assets have taken place.
2. Loan costs have taken place;
3. The construction or production activities to make assets to reach the intended use or sale of state have begun.

(2) Capitalization of borrowing costs is suspended during periods in which the acquisition, construction or production of a qualifying asset is interrupted by activities other than those necessary to prepare the asset for its intended use or sale, when the interruption is for a continuous period of more than 3 months. Borrowing costs incurred during these periods recognized as an expense for the current period until the acquisition, construction or production is resumed.

(3) When the construction or production meets the intended use or sale of state of capitalization conditions, the Loan costs should stop capitalization.

### 3. Computation Method for Capitalization Rate and Amount of Borrowing Costs

With regard to the special borrowings for the purchase and construction of qualified assets, the capitalized interest amount shall be recognized according to the amount of the interest cost for the special borrowings actually

occurred during the current period (including the amortization of discount or premium recognized as per the effective interest method) minus the interest income acquired after the borrowings deposit in bank or the investment income obtained from the temporary investment. For the general borrowings for the purchase and construction of qualified assets, the capitalized interest amount of the general borrowings shall be computed and recognized according to the weighted average of accumulative asset expense beyond the expense of the special borrowings, multiplying the capitalization rate of general borrowings.

#### 27. Biological Assets

Not applicable

#### 28. Oil & Gas assets

Not applicable

#### 29. Right to use assets

Not applicable

#### 30. Intangible assets

##### 1. Valuation Method, Service Life and Impairment Test of Intangible Assets

(1) The intangible assets include the land use rights, the professional technology and the software, which are conducted the initial measurement as per the cost.

(2) The service life of intangible assets is analyzed and judged when of the company acquires the intangible assets. For the finite service life of the intangible assets, the years of service life or the quantity of service life formed and the number of similar measurement unit shall be estimated. If the term of economic benefits of the intangible assets brought for the company is not able to be foreseen, the intangible assets shall be recognized as that with the indefinite service life.

##### (3) Estimation Method of Service life of Intangible Assets

1) For the intangible assets with the finite service life, the company shall generally consider the following factors to estimate the service life: ① the normal service life of products produced with the assets, and the acquired information of the service life of similar assets. ② the estimation of the current stage conditions and the future development trends in the aspects of technology and craft. ③ the demand of the products produced by the assets or the offered services in the market. ④ the expectation of actions adopted by current or potential competitors. ⑤ the expected maintenance expense for sustaining the capacity to economic benefits brought by the assets and the ability to the relevant expense expected. ⑥ the relevant law provision or the similar limit to the control term of the assets, such as the licensed use term and the lease term. ⑦ the correlation with the service life of other assets held by the company.

##### 2) Intangible Assets with Indefinite Service Life, Judgment Criteria on Indefinite Service Life and Review Procedure of Its Service Life

The company shall be unable to foresee the term of economic benefits brought by the assets for the company, or

the indefinite term of intangible assets recognized as the indefinite service life of intangible assets.

The judgment criteria of Indefinite service life: ① as from the contractual rights or other legal rights, but the indefinite service life of contract provision or legal provisions. ② unable to judge the term of economic benefits brought by the intangible assets for the company after the integration of information in the same industry or the relevant expert argumentation.

At the end of every year, the review should be made for the service life of the intangible assets with the indefinite service life, and the relevant department that uses the intangible assets, shall conduct the basic review by the method from up to down, in order to evaluate the judgment criteria of the indefinite service life if there is the change.

#### (4) Amortization Method of Intangible Assets Value

The intangible assets with the finite service life shall be systematically and reasonably amortized according to the expected implementation mode of the economic benefits related to the intangible assets during the service life, and the line method shall be adopted to amortize for the intangible assets unable to reliably recognize the expected implementation mode. The specific service life is as follows:

Items	Amortization life time (Year)
Land use right	50 years
Proprietary technology	15 years
Software	5 years

The intangible assets with the indefinite service life shall not be amortized, and the company shall make the review of the service life of the intangible assets during every accounting period.

(5) If there is the impairment for the intangible assets with the definite service life on the balance sheet date, the corresponding impairment provision shall be withdrawn according to the difference between the book value and the recoverable amount. The intangible assets with the indefinite service life and without the usable condition shall be conducted the impairment test every year whether the impairment exists.

## 2. Accounting Policy of Internal Research and Development Expenditure

The expenditure for internal research and development project in the study stage shall be recorded into the current profits and losses when occurring. The expenditure for internal research and development project in the development stage shall be recognized as the intangible assets when the following requirements are simultaneously met: (1) the completion of the intangible assets is available for use or sale, and feasible in the technology. (2) the intention to complete the intangible assets and use or sale. (3) the method for the economic benefits produced by the intangible assets, including the evidence that shows there exists the market for the products generated from the intangible assets or the intangible assets have the market. The intangible assets are used internally which shows the serviceability. (4) there are sufficient technology, financial resources and other resources to support the completion of the development of the intangible assets, and there is ability to use or sell the intangible assets. (5) the expenditure belong to the development stage of the intangible assets can be reliably measured.

The specific criteria for the division of the internal research and development projects at the research stage and the

development stage of the company is as follows: (1) the investigation stage planned to obtain the new technology and knowledge, shall be recognized as the research stage, which has the features of planning and exploration. (2) before the commercial manufacture and use, the research results or other knowledge should be applied for the plan or design, in order to produce the new or improved stages with substantial materials, devices and products, which should be recognized as the development stage, and this stage has the features of pertinence and more possibility to create the achievement.

### 31.Long-term Assets Impairment

The company shall make judgment of the long-term assets including the long-term equity investment, the investment property measured by the cost mode, the fixed assets and the projects under construction if there is possible impairment on the balance sheet date. If there exists the evidence shows that the long-term assets have the impairment, the impairment test should be conducted, and the recoverable amount should be estimated. The impairment shall be confirmed if there exists after the comparison of the estimated recoverable amount of the assets and its book value, and if the assets impairment provision shall be withdrawn to recognize the corresponding impairment losses. The estimation of the recoverable amount of assets should be confirmed according to the higher one between the net amount of the fair value minus the disposal costs and the present value of the cash flow of assets expected in the future.

The company shall conduct the impairment test at least every year for the goodwill established by the business combination and the intangible assets with the indefinite service life whether there exists the impairment.

The impairment loss of long-term assets after recognized shouldn't be reversed in the future accounting period.

### 32.Long-term amortizable expenses

Deferred charges represent expenses incurred that should be borne and amortized over the current and subsequent period (together of more than one year).

The long-term unamortized expense shall be bookkept as per the actual amount occurred, and shall be averagely amortize within the benefit period or the specified period. If the long-term unamortized expense can't make the benefits for the future accounting period, the amortized value of the unamortized project shall all be transferred into the current profits and losses.

### 33.Contract liabilities

Contract liabilities refer to the obligation of the Company to transfer goods to customers for the received or receivable consideration from customers. If the customer has paid the contract consideration or the Company has obtained the unconditional collection right before the Company transfers the goods to the customer, the Company will list the received or receivable amount as the contract liability at the earlier of the actual payment made by the customer and the due date for payment. Contract assets and liabilities under the same contract are listed in net amount, while contract assets and liabilities under different contracts are not offset. 39. Income

### 34.Remuneration

#### 1. Accounting Treatment Method of Short-term Compensation

During the accounting period of service provision of staff, the company shall regard the actual short-term

compensation as the liability and record into the current profits and losses or the relevant assets cost as per the beneficiary. Of which, the non-monetary welfare shall be measured as per the fair value.

## 2. Accounting Treatment Method of Severance Benefit Plans

The severance benefit plans can be divided into the defined contribution plan and the defined benefit plan according to the risk and obligation borne.

### (1) The Defined Contribution Plan

The contribution deposits that paid to the individual subject for the services provided by the staffs on the balance sheet date during the accounting period, shall be recognized as the liability, and recorded into the current profits and losses or the relevant asset costs as per the beneficiary.

### (2) The Defined Benefit Plan

The defined benefit plan is the severance benefit plans with the exception of the defined contribution plans.

1) Based on the expected cumulative welfare unit method, the company shall adopt unbiased and mutually consistent actuarial assumptions to make evaluation of demographic variables and financial variables, measure and define the obligations arising from the benefit plan, and determine the period of the relevant obligations. The company shall discount all the defined benefit plan obligations, including the obligation within twelve months after the end of the annual report during the expected services provision of employee. The discount rate adopted in discounting shall be recognized according to the bonds matched with the defined benefit plan obligation term and the currency at the balance sheet date or the market return of high-quality corporate bonds in the active market.

2) If there exist the assets for the defined benefit plan, the deficit or surplus arising from the present value of the defined benefit plan obligations minus the fair value of the defined benefit plan assets are recognized as the net liability or the net assets of the defined benefit plan. If there exists the surplus of the defined benefit plan, the lower one between the surplus of the define benefit plan and the upper limit of assets shall be used to measure the net assets of the defined benefit plan. The upper limit of assets refers to the present value of economic benefits obtained from the refund of the defined benefit plans or the reduction of deposit funds of future defined benefit plans.

3) At the end of period, the employee's payroll costs arising from the defined benefit plan are recognized as the service costs, the net interests on the net liabilities or the net assets of the defined benefit plan, and the changes caused by the net liabilities and the net assets of the defined benefit plan that re-measured. Of which, the service costs and the net interests on the net liabilities or the net assets of the defined benefit plan shall be recorded into the current profits and losses or the relevant assets costs, the changes caused by the net liabilities and the net assets of the defined benefit plan that re-measured shall be recorded into other comprehensive incomes, which should not be switched back to the profits and losses during the subsequent accounting period, but the amount recognized from other comprehensive incomes can be transferred within the scope of the rights and interests.

4) The profit or loss of one settlement shall be recognized when settling the defined benefit plan.

## 3. Accounting Treatment Method of Demission Welfare

The employee compensation liabilities generated by the demission welfare shall be recognized on the early date and recorded into the current profits and losses: (1) when the company can't withdraw the demission welfare provided due to the rundown suggestion or the termination of labor relations plans. (2) when the company recognizes the costs or the expenses related to the reorganization of demission welfare payment.

The earlier one between when the company can't withdraw the rundown suggestion or the termination of labor

relations plans at its side and when the costs relevant to the recombination of dismissal welfare payment, shall be recognized as the liabilities arising from the compensation due to the termination of labor relations with staff and shall be recorded into the current profits and losses. Then company shall reasonably predict and recognize the payroll payable arising from the dismissal welfare. The dismissal welfare, which is expected to finish the payment within twelve months after the end of the annual report recognized, shall apply to the relevant provisions of short-term compensation. The dismissal welfare, which is expected to be unfinished for the payment within twelve months after the end of the annual report recognized, shall apply to the relevant provisions of short-term compensation, shall apply to the provisions related to other long-term employee benefits.

#### 4. Accounting Treatment Method of Other Long-term Employee Benefits

If other long-term employee benefits of employees provided by the company meet the conditions of the defined contribution plan, the accounting treatment shall be made in accordance with the defined contribution plan. Except for these, other long-term benefits shall be made the accounting treatment according to the defined benefit plan, but the changes arising from the re-measurement of net liabilities or net assets of other long-term employee benefits shall be recorded into the current profits and losses or the relevant assets costs.

#### 35. Lease liabilities

Not applicable

#### 36. Estimated Liabilities

##### 1. Recognition Criteria of Estimated Liabilities

The liabilities shall be recognized when external guarantee, pending litigation or arbitration, product quality assurance, staff reduction plan, loss contract, recombination obligation, disposal obligation of the fixed assets and other pertinent businesses all meet the following requirements:

- (1) The obligation is the current obligation borne by the company.
- (2) The implementation of the obligation may cause the economic benefits out of the enterprise.
- (3) The amount of the obligation can be measured reliably.

##### 2. Measurement Method of Estimated Liabilities

The estimated liabilities shall be made the initial measurement according to the best estimate of the expenditure required to settle the present obligation. There is the continuous scope for the required expenditure, and the best estimate with the same possibilities resulted from various outcomes within the scope shall be recognized as per the intermediate value. The best estimate should be recognize according to the following methods:

- (1) The best estimate shall be recognized as per the most possible amount if there are matters involved in the single item.
- (2) The best estimate shall be calculated and recognized as per the possible amount if there are matters involved in the multiple item.

If the company pays all the expenses for paying off the estimated liabilities, or partial estimates are compensated by the third party or other parties, the compensation amount should be separately recognized as the assets when the receipt of the compensation amount is basically determined. Meanwhile, the determined compensation amount

shall not exceed the book value of the estimated liabilities recognized.

The company shall make review of the book value of estimated liabilities at the balance sheet date. If there is conclusive evidence that the book value cannot really reflect the current best estimate, the adjustment shall be made for the book value in accordance with the current best estimate.

### 37. Share payment

#### 1.Accounting Treatment Methods of Share Payment

Share payment is a transaction which is for obtaining the service provided by employees or other parties, where thus the equity instrument is granted , or for bearing the liability confirmed basing on the equity instrument. Share payment is divided into the payment settled by equities and the payment settled by cash.

##### (1)Shared Payment settled by Equities

The share payment settled by equities, which is used for exchanging the service provided by employees, will be measured according to the fair value of the equity instrument granted to employees on date of grant. The amount of such fair value, under the situation that the rights can only be exercised after the service is finished and the set performance is achieved within the waiting period, and basing on the optimum estimation for the number of equity instrument which exercise rights within the waiting period, will be measured according to straight-line method and counted into relevant costs and expenses. When the rights can be exercised immediately after being granted, the payment will be counted into relevant costs and expenses, and the capital reserve will be increased correspondingly.

On each and every balance sheet date within the waiting period, the Company will make optimum estimations according to the newly-obtained subsequent information after the changes occurred in the number of employees who exercise rights so as to modify the predicted number of the equity instrument of exercising rights. The influence from above-mentioned estimations will be counted into relevant costs and expenses at the current period, and the corresponding adjustment will be made for the capital reserve.

If the fair value of the other parties' service can be reliably measured, the share-based payment settled by equities which is used for exchanging the service of other parties will be measured according to that fair value on date of acquisition. If not, but the fair value of the equity instrument can be reliably measured, the payment will be counted according to the fair value of the equity instrument on date of service acquisition, and it will be counted into relevant costs and expenses, and the equity of the shareholders will be increased correspondingly.

##### (2) Share Payment settled by Cash

The share payment settled by cash will be measured according to the fair value of the liability confirmed basing on the shares borne by the Company and other equity instruments. If the rights can be exercised immediately after being granted, the payment will be counted into relevant costs or expenses and the liability will be increased correspondingly. If the rights can only be exercised after the situation that service within the waiting period is completed and set performance is achieved, the service obtained at the current period, according to the fair value amount of the liability borne by the Company, and basing on the optimum estimation for the condition of exercising rights, will be counted into costs or expenses on each and every balance sheet date during the waiting period, and the liability will be increased correspondingly.

Each and every balance sheet date and settlement before relevant liability settlement, the fair value of liability will be remeasured, of which changes occurred will be counted into the current period.

#### 2.Relevant Accounting Treatment of Modification and Termination for Share-based Payment Plan

When the Company modifies the share payment plan, if the fair value of the equity instrument granted is increased after the modification, the increase in the service obtained will be correspondingly confirmed according to the increase in the fair value of equity instrument. The increase in the fair value of equity instrument means the

balance between the equity instrument before modification and the equity instrument after modification on modification date. If decrease occurred in the total fair value of the equity instrument after the modification or methods which are unbeneficial to employees are adopted in the modification, accounting treatment will still continue to be made for the service obtained, and such changes will be regarded as changes that have never occurred unless the Company has canceled partial or all equity instruments.

During the waiting period, if the granted equity instrument is cancelled, the company will treat the cancelled equity instrument as the accelerated exercise of power, and immediately include the balance that should be recognized in the remaining waiting period into the current profit and loss, and simultaneously confirm the capital reserve. If the employee or other party can choose to satisfy the non-exercisable condition but not satisfied in the waiting period, then the company will treat it as cancellation of the granted equity instrument.

3. Accounting treatment involving the share payment transaction between the Company and the shareholders or the actual controller of the Company

Where involves the share payment transaction between the Company and the shareholders or the actual controller of the Company and one of the parties of the settlement company and the service-accepting company is within the company and the other is not within the company, then the company performs the accounting treatment in the consolidated financial statements of the company according to the following provisions:

(1) If the settlement company settles in its own equity instrument, then it treats the equity payment transaction as the equity-settled equity payment; otherwise, it treats as the cash-settled equity payment.

If the settlement company is an investor to the service-accepting company, it shall be recognized as a long-term equity investment in the service-accepting company in accordance with the fair value of the equity instrument or the fair value of the liability it is assumed to bear on the grant date, and the capital reserve (other capital reserve) or liabilities shall be recognized at the same time.

(2) If the service-accepting company has no settlement obligation or confers its own equity tools on the employees of the company, then such equity payment transaction shall be treated as equity-settled equity payment; if the service-accepting company has the settlement obligation and confers the employees of the company with not its own equity instrument, then such equity payment transaction shall be treated as cash-settled equity payment;

In the case of the equity payment transaction occurs between the companies within the company, and the service-accepting company and the settlement company are not the same company, then the confirmation and measurement of the equity payment transaction shall be carried out respectively in the financial report of the service-accepting company and the settlement company, with the same analogy of the above-said principle.

38. Other financial instruments such as preferred stocks and perpetual bonds

Not applicable

39. Revenue

Accounting policies adopted for income recognition and measurement

When the contract between the company and the customer meets the following conditions at the same time, the income is recognized when the customer obtains the control right of the relevant goods: the parties to the contract have approved the contract and promised to fulfill their respective obligations; The contract clarifies the rights and obligations of the parties to the contract related to the transferred goods or services; The contract has clear payment terms related to the transferred goods; The contract is of commercial nature, that is, the performance of the contract will change the risk, time distribution or amount of the company's future cash flow; The consideration that the company is entitled to obtain due to the transfer of goods to customers is likely to be

recovered.

On the commencement date of the contract, the Company identifies each individual performance obligation in the contract, and distributes the transaction price to each individual performance obligation according to the relative proportion of the individual selling price of the goods promised by each individual performance obligation. In determining the transaction price, the influence of variable consideration, significant financing components in the contract, non-cash consideration, consideration payable to customers and other factors are considered.

If one of the following conditions is met, the performance obligation will be considered fulfilled within a certain period of time; otherwise, the performance obligation will be considered fulfilled at a certain time point:

(1) The customer obtains and consumes the economic benefits brought by the company's performance at the same time;

(2) Customers can control the goods under construction during the performance of the company;

(3) The goods produced during the performance of the Company have irreplaceable purposes, and the Company has the right to collect payment for the performed part accumulated so far during the whole contract period.

For the performance obligations performed within a certain period of time, the Company shall recognize the income according to the performance progress within that period of time, except that those with performance progress that cannot be reasonably determined. When the performance schedule cannot be reasonably determined, if the already incurred costs are expected to be compensated, the Company shall recognize the income according to the already incurred costs until the performance schedule can be reasonably determined.

For the performance obligation performed at a certain time, the Company recognizes the income when the customer obtains the control right of the relevant goods or services. When judging whether the customer has obtained the control of goods or services, the company considers the following signs:

(1) The Company has the right to collect money now for the goods or services, that is, customers have the obligation of immediate payment for the goods or services.

(2) The Company has transferred the legal ownership of the goods to the customer, that is, the customer has the legal ownership of the goods.

(3) The Company has transferred the goods in kind to the customer, that is, the customer has taken possession of the goods in kind.

(4) The Company has transferred the main risks and rewards of ownership of the goods to the customer, that is, the customer has obtained the main risks and rewards of ownership of the goods.

(5) The customer has accepted the goods or services.

The adoption of different business models in similar businesses leads to differences in accounting policies for income recognition

None

#### 40.Government subsidy

Government grants are monetary assets and non-monetary assets that the company has obtained free of charge from the government and are divided into government grants related to assets and government grants related to income. Asset-related government grants refer to government grants obtained by the company that are used to purchase or construct or otherwise form long-term assets. Income-related government subsidies refer to government subsidies other than government subsidies related to assets.

If there is evidence at the end of the period that the company is able to meet the relevant conditions stipulated

in the financial support policy and it is expected to receive financial support funds, the government subsidies shall be recognized according to the amount receivable. In addition, government grants are confirmed upon actual receipt.

Asset-related government grants are recognized as deferred income and are charged to profit or loss for the current period in a reasonable and systematic manner over the useful life of the relevant assets. Revenue-related government subsidies, which are used to compensate for the related costs or losses of the Company in the future period, are recognized as deferred income, and are recognized in the profits and losses of the current period in the period in which the relevant costs, expenses or losses are recognized. The relevant costs, expenses or losses that have been used to compensate the Company have been directly recorded in the current profits and losses. Government grants related to the company's daily activities are included in other income; those unrelated to the daily activities of the company are included in non-operating income.

For the policy-subsidized discounted loans obtained by the company, the accounting treatment is divided into the following two cases: when the finance allocates the interest-subsidy funds to the loan bank and the loan bank provides the company with a policy-based preferential interest rate, the company uses the actual amount of the loan received as the entry value of the loan, and calculates the relevant borrowing costs according to the loan principal and the preferential policy interest rate; if the finance allocates the interest-free funds directly to the company, the company will reduce the relevant borrowing costs by the corresponding discount interest.

#### 41.The Deferred Tax Assets / The deferred Tax Liabilities

##### 1. Temporary Difference

The temporary difference includes the difference of the book value of assets and liabilities and the tax basis, and the difference of the book value and the tax basis that no confirmation of assets and liabilities but able to confirm the tax basis as per the provisions of tax law. The temporary difference can be classified into the taxable temporary difference and the deductible temporary difference.

##### 2. Recognition Basis of Deferred Tax Assets

For the deductible temporary difference, the deductible loss and the tax payment offset, the company shall recognize the deferred tax assets arising from the future taxable income that obtained to deduce the deductible temporary difference, the deductible loss and the tax payment offset.

The deferred tax assets with the following features and arising from the initial recognition of assets or liabilities in the transaction shall not be recognized: (1) the transaction is not the business combination. (2) the transaction doesn't influence the accounting profits and the taxable incomes (or the deductible losses).

The company shall recognize the corresponding deferred tax assets for the deductible temporary difference related to the investment of subsidiaries, cooperative enterprises and joint ventures if the following requirements are simultaneously met: (1) the temporary difference is possible to be reversed in the foreseeable future. (2) the taxable income used to offset the deductible temporary difference is possible to be obtained in the future.

##### 3. Recognition Basis of Deferred Tax Liabilities

All the taxable temporary differences shall be recognized as the deferred tax liabilities.

But the company shall not recognize the taxable temporary differences arising from the following transactions as the deferred tax liabilities: (1) the initial recognition of goodwill. (2) the initial recognition of assets or liabilities arising from the transactions with the following features: this transaction is not the business combination, and the

transaction doesn't influence the accounting profits and the taxable incomes (or the deductible losses).

The company shall recognize the corresponding deferred tax liabilities for the taxable temporary difference related to the investment of subsidiaries, cooperative enterprises and joint ventures. Except that the following requirements are simultaneously met: (1) the investment enterprise can control the reversal time of the temporary difference. (2) the temporary difference is possible to not be reversed in the foreseeable future.

#### 4. Impairment of Deferred Tax Assets

The company shall review the book value of the deferred tax assets at the balance sheet date. If it is not possible to obtain sufficient taxable income for the reduction of the benefit of the deferred tax assets in the future, the book value of the deferred tax assets shall be deduced. Except that the deferred tax assets and the reduction amount are recorded into the owner's equity when the original recognition, others shall be recorded into the current income tax expense. The book value of the deferred tax assets reduced can be recovered when sufficient taxable income is possibly obtained.

#### 5. Income Tax Expense

The income tax expense should include the current income tax and the deferred income tax.

Other comprehensive income or the current income tax and the deferred income tax related to the transactions and items directly recorded into the stockholders' equity, shall be recorded into other comprehensive incomes or the stockholders' equity, and the book value of goodwill shall be adjusted by the deferred income tax arising from the business combination, but the rest of the current income tax and the deferred income tax expense or income shall be recorded into the current profits and losses.

### 42. Lease

#### 1. Accounting Treatment Method of Operating Lease

When the company is as the tenant, the rental within the lease term shall be recorded into the relevant assets cost or recognized as the current profits and losses as per the line method, and the initial direct expense occurred shall be directly recorded into the current profit and loss. The contingent rental shall be recorded into the current profit and loss once the actual occurrence.

When the company is as the leaser, the rental within the lease term shall be recognized as the current profits and losses as per the line method, and the initial direct expense occurred shall be directly recorded into the current profit and loss, except that the large amounts are capitalized and recorded into the profit and loss by stages. The contingent rental shall be recorded into the current profit and loss once the actual occurrence.

#### 2. Accounting Treatment Method of Finance Lease

When the company is as the tenant, the company shall recognize the less one between the fair value of leasing assets and the present value of minimum lease payment at the lease commencement date as the book value of rented assets, recognize the minimum lease payment as the book value of the long-term payables, and the undetermined fiancé expense of the difference and the initial direct costs occurred shall be recorded into the leasing asset value. During each lease period, the current financing charges shall be measured and recognized by the effective interest method.

When the company is as the leaser, the company shall recognize the sum of minimum lease receivables and initial

direct expense at the lease commencement date as the book value of finance lease receivables, and record the unguaranteed residual value. Meanwhile, the company shall recognize the difference between the sums of minimum lease receivables, minimum lease receivables and unguaranteed minus the sum of the present value as the unrealized financing income. During each lease period, the current financing charges shall be measured and recognized by the effective interest method.

#### 43. Other important accounting policies and accounting estimates

##### (1)Change of main accounting policies

Accounting policy changes caused by implementation of new financial instrument standards

##### (2) Changes in accounting estimates

No significant changes in accounting estimates have occurred in the current period.

#### 44.Change of main accounting policies and estimations

##### (1)Change of main accounting policies

Other note:

(1).According to the "Notice on National Development and Reform Commission to the General Office of the textile project management of the special funds" (Faigaiban [2006]2841), on December 2006, the Company received "Textile special" funds RMB 2,000,000.00 from Shenzhen Finance Bureau. The company will use 14 years as asset depreciation period for amortization with the corresponding equipment in current period. The amortization in accordance with the corresponding equipment, The other income in current period is RMB71, 428. 58, the ending balance of uncompleted amortization is RMB357, 142. 83 .

2. In accordance with the Notice of Forwarding the Reply of General Office of State Development and Reform Commission Regarding Special Plan for Strategic Transformation and Industrialization of Color TV Industry issued by Shenzhen Development and Reform Commission (Shen Fa Gai (2011) No. 823), State Development and Reform Commission approved including the project of industrialization of polarizer sheet for TFT-LCD of SAPO Photoelectric into the special plan for strategic transformation and industrialization of color TV industry in 2010 and appropriated national aid of RMB 10,000,000.00 to SAPO Photoelectric for the research and

development in the process of the project of industrialization and the purchase of required software and hardware equipment. On June 2012 and September 2013, the company received the national grants of RMB 10,000,000.00.. According to the Notice of Issuing the Governmental Investment Plan for 2011 Regarding Demonstration Project of High-tech Industrialization Including Specialized Services Such As Disaster Recovery of Financial Information System issued by Shenzhen Development and Reform Commission (Shen Fa Gai (2012) No. 3), the Company received subsidy of RMB 3,000,000.00 for the project of industrialization of polarizer sheet for TFT-LCD in April 2012. Our company will use 10 years as asset depreciation period for amortization in current period.The other income in current period is RMB649, 999. 98. and the balance amount of unfinished final amortization is RMB 2, 383, 333. 36.

3. According to the Notice about the Plan for Supporting the Second Group of Enterprises in Biological, Internet, New Energy and New Material Industries with Special Development Funds (Shen Fa Gai (2011) No. 1782), the Company received subsidy of RMB 5,000,000.00 for the narrow-width line (line 5) of phase-I project of polarizer sheet for TFT-LCD on February 2012. The Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The other income in current period is RMB250, 000. 02 and the balance amount of unfinished final amortization is RMB1, 249, 999. 98.

4. On October 2013, The company received the grants for the purchase of imported equipment and technology in 2012 of RMB 1,750,902.00, the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets.The other income in current period is RMB87, 545. 10 and the balance amount of unfinished final amortization is RMB414, 381. 48.

5. On December 2013 , The company received the funds for innovation and entrepreneurship of TFT-LCD polarizing project from Pingshan New District Development and Finance Bureau of RMB 500,000.00(matching funding category),the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The other income in current period is RMB25, 000. 02 and the balance amount of unfinished final amortization is RMB124, 999. 98 .

6. On December 2013 , The company received the funds for innovation and entrepreneurship of TFT-LCD polarizing project from Pingshan New District Development and Finance Bureau of RMB 500,000.00(matching funding category),the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The other income in current period is RMB25, 000. 02 and the balance amount of unfinished final amortization is RMB237, 499. 98 .

7. According to the Approval of Application of SAPO Photoelectric for Project Funds for Shenzhen Polarization Material and Technology Engineering Laboratory (Shen Fa Gai (2012) No. 1385), Shenzhen Polarization Material and Technology Engineering Laboratory was approved to be established on the strength of SAPO Photoelectric with total project investment of RMB 24,390,000.00. As approved by Shenzhen Municipal People's Government, this project was included in the plan for supporting the fourth group of enterprises with special fund for the development of strategic new industries in Shenzhen in 2012 (new material industry). According to the Notice of Issuing the Plan for Supporting the Fourth Group of Enterprises with Special Fund for Development of Strategic New Industries in Shenzhen in 2012 (Shen Fa Gai (2012) No. 1241), the Company received subsidy of RMB 5,000,000.00 on December 2012 for purchasing instruments and equipment and improving existing technological equipment and test conditions. The fund gap will be filled by the Company through raising funds by itself. the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The other income in current period is RMB250, 000. 02 and the balance amount of unfinished final amortization

is RMB2,374,999.98 .

8. According to the “Announcement on the Identification of Technology Centers of 24 Enterprises including Shenzhen Yuanwanggu Information Technology Joint Stock Company Limited as the Municipal Research and Development Centers (Technical Center)” (SJMXXJS [2013] No.137), the research and development center of SAPO has been regarded as 2012 annual municipal R&D center. In December 2013, the company has received the funding subsidy of RMB3 million for the construction of the technical center. the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The Other income in current period is RMB150,000.00 and the balance amount of unfinished final amortization is RMB1, 425,000.00.

9. On March 2014 the company received the introduction of advanced technology import subsidy funds of RMB 1 43,881.00 from Shenzhen Finance Committee, the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The other income in current period is RMB7,194.06 and the balance amount of unfinished final amortization is RMB35,970.25.

10. According to the "Shenzhen Municipal Development and Reform Commission Reply for SAPO application for local matching funds of TFT-LCD polarizing film II project (Line 6) " (Shenzhen DRC [2013]No. 1771), the company obtained TFT-LCD polarizing film II project (line 6) local matching funds of RMB 15,000,000.00 in April 2014. TFT-LCD polarizer Phase II project (Line 6) hit the expected available state and transferred to fixed assets in June 2018. Amortized by a period of 10 years in depreciation of relevant assets, The other income in current period is RMB750,000.00 and the balance amount of unfinished final amortization is RMB12,000,000.00.

11. In December 2014, the company received innovation venture capital (matching funding category) for Ping Shan District Development and Finance Bureau of TFT-LCD polarizing film II project (line 6) of RMB 500,000.00. TFT-LCD polarizer Phase II project (Line 6) hit the expected available state and transferred to fixed assets in June 2018. Amortized by a period of 10 years in depreciation of relevant assets, RMB 25,000.02 was included into other incomes in the current period and the ending outstanding balance was RMB399,999.98.

12. On Jan. 2015, the company received RMB 5 million of grants for key technology research and development projects of optical compensation film for polarizer from Shenzhen Scientific and Technological Innovation Committee. The company has reached the expected date of use of the assets., the Company planned to amortize the subsidy over 10 years according to the depreciation period of relevant assets. The other income in current period is RMB250,000.02 and the balance amount of unfinished final amortization is RMB3,374,999.98.

13. According to "National Development and Reform Commission issued on industrial transformation and upgrading projects (2<sup>nd</sup> industrial restructuring) notify the central budget for 2014 investment plan" (NDRC Investment [2014] No. 1280), the company obtained TFT- LCD polarizer II project (line 6) state grants of RMB 10,000,000.00 in December 2014. TFT-LCD polarizer Phase II project (Line 6) hit the expected available state and transferred to fixed assets in June 2018. Amortized by a period of 10 years in depreciation of relevant assets, RMB500,000.00 元 was included into other incomes in the current period and the ending outstanding balance was RMB8,000,000.00.

14. According to “Reply on Congregating Development in Emerging Industrial Area Strategic Pilot Implement Scheme of Guangdong Province ” (Reform and Development Office High-Tech [2013] No.2552, On December 2015, the Company received RMB20 million of the pilot project fund( period II project of TFT-LCD

polarizer).On October 2016, the Company received RMB 5 million of Shenzhen strategic emerging industries and the future development of industrial matching funds, TFT-LCD polarizer Phase II project (Line 6) hit the expected available state and transferred to fixed assets in June 2018. Amortized by a period of 10 years in depreciation of relevant assets, RMB1,250,000.04 was included into other incomes in the current period and the ending outstanding balance was RMB1,250,000.04.

15. According to Reform and Development Commission of Shenzhen Municipality sending the notice of “Reply of National Reform and Development Office on Investing in Petrification and Medicine Project within Central Budget of 2013 for Industry Structure Adjustment Special Project”(Reform and Development Commission of Shenzhen Municipality [2013]No.1449) , the Company received 30 million RMB of new production line of TFT-LCD polarizer project period II and equipment purchase subsidy in August 2015 ,December 2015 and September 2016. TFT-LCD polarizer Phase II project (Line 6) hit the expected available state and transferred to fixed assets in June 2018. Amortized by a period of 10 years in depreciation of relevant assets, RMB 1,499,999.99 was included into other incomes in the current period and the ending outstanding balance was RMB 24,000,000.01.

16. In 2015 and In 2016, the Company received the subsidy funds of 202,608.00 RMB and 34,535.45 RMB on energy-saving reconstruction, amortized by 8-year depreciation life of the relevant asset, the Other income was RMB0.00 at the current period, the ending balance without amortization was RMB56,815.63.

17. In 2017, the company received 1,218,640.00 yuan for the old elevator upgrade subsidy, the company received 160,800.00 yuan for the old elevator upgrade subsidy in 2018,which was apportioned according to the depreciation period of the relevant assets. The current period was included in other income of 115,760.00 yuan, and the unassessed balance at the end of the period was 986,836.67 yuan. Subsidiaries that run property management business were subsidized by RMB 164,580.00 for updating and transforming old and obsolete elevators this year and this subsidy was income-related; RMB55,877.85 was included into the operating income in the current period and the ending outstanding balance was RMB948,875.10.

18. According to the Notice of the Ministry of Industry and Information Technology of the National Development and Reform Commission for Releasing the Central Budgetary Investment Plan of the 2017 of the Technical Transformation of the Electronic Information Industry (NDRC Investment {2017} No. 1649), the company received oversize TV for use in November 2017. In November 2017, the company received an central budgetary investment of RMB 30,000,000.00 of the oversized TV polarizer industry project. The company shall transfer the deferred income to the current profit or loss for the period of depreciation from the date when the relevant assets are ready for their intended use.

19. In accordance with the development plans and policies of Shenzhen Municipality for Strategic emerging Industries, the Management Measures of Shenzhen City on Funds for Scientific and Technological Research and Development, the Management Measures of Shenzhen City on Science and Technology Plan Project and other relevant documents, Shenzhen Science and Technology Innovation Commission and SAPO Photoelectric completed the development of the key technology of the 20170535 ultra-thin polarizer used in IPS smart phone terminal in the Shenzhen Science and Technology Plan issued by SFG [2017] No. 1447 document. In February 2018, the company received funding from Shenzhen Science and Technology Innovation Commission of 2,000,000 yuan for R & D. The company will transfer the deferred income to the current profit and loss according to the depreciation period from the date when the relevant assets reach the expected usable status.

20. According to Measures for Management of Science and Technology Research & Development Funds in

Shenzhen, Measures for Management of Projects in Shenzhen Municipal Science and Technology Program and other documents concerned, SAPO Photoelectric Co., Ltd. and Shenzhen Science and Technology Innovation Committee entered into a Contract of Projects in Shenzhen Municipal Science and Technology Program through consultation to complete development of key techniques for high-performance polarizers for 2018N007 jumbo display panels in the program delivered in Shen Fa Gai [2018] No.324 document. The Company was granted with a financial subsidy of RMB 1,000,000.00 this year. The Company amortized and transferred the deferred income into the current profit and loss by period of depreciation after relevant assets hit the expected available state.

21. According to the Measures of Shenzhen Municipality on Subsidy for Improving Atmospheric Environmental Quality (2018-2020) (SRHG [2018] No.2), in December 2019, the Company received a subsidy of 1,033,507.00 yuan from Shenzhen Municipal Human Settlements Committee. The Company completed the transformation of the relevant assets into fixed assets in December 2019. The Company will allocate the relevant assets according to their depreciation years in January 2020, The Company was granted with a financial subsidy of RMB 1,000,000.00 this year. The current period is charged to the current profit and loss of 221465.76 yuan, the ending balance without amortization was RMB812,041.24.

22. According to the Shenzhen Action Plan on Implementing Technical Transformation Multiplication Plan to Expand Effective Industrial Investment (2017-2020)" (SFB [2017] No.22) and Shenzhen's Several Measures on Implementing Technical Transformation Multiplication Plan to Expand Effective Industrial Investment (SFBG [2017] No.9), in June 2020, the company received the first subsidy of 190,000.00 yuan for the special technical transformation investment project of technical transformation multiplication in 2020, which was allocated according to the depreciation period of related assets of 10 years. Other income of 1,583.33 yuan was included in the current period, and the undistributed balance at the end of the period was 188,416.67 yuan.

### **X. Risks Related to Financial Instruments**

The company has the main financial instruments, such as bank deposits, receivables and payables, investments, loans and so on. Please refer to the relevant disclosure in Notes for the details. The risks associated with these financial instruments mainly include credit risk, market risk and liquidity risk. The company's management shall manage and monitor these risks and ensure above risks to be controlled within certain scope.

#### (I) Credit Risk

The credit risk of the company is primarily attributable to bank deposits and receivables. Of which, the bank deposits are mainly deposited in the medium and large commercial banks with strength, high credibility. For the receivables, the company has developed the relevant policies to control the credit risk, and set up the corresponding debt and credit limit after the credit status of debtor is evaluated based on financial condition of debtor, credit history, external ratings, possibility of guarantee obtained from the third party. Meanwhile, the company shall regularly monitor the debtor's credit history. With regard to the bad credit record for the debtor, the company shall adopt the written reminder, shortening or cancel of credit period to ensure the overall credit risks within the controllable scope.

#### (II) Market risk

Market risk of financial instrument arises from changes in fair value or future cash flow of financial instruments affected by market price. Market risks includes foreign exchange risk and interest risk.

##### (1) Interest Rate Risk

The interest rate risk faced by the company is mainly from the bank borrowings. The company is faced the interest rate risk of the cash flow due to the financial liability of the floating interest rate, and faced the interest rate risk of the fair value due to the financial liability of the fixed interest rate. The company shall determine the relative proportion in the fixed and floating interest rate contracts.

##### (2) Foreign Exchange Risk

The foreign exchange risks faced by the company are mainly from the financial assets and liabilities based on the price of US dollar and JPY. The company matches the income and expenditure of foreign currency as far as possible in order to reduce the foreign exchange risk.

#### (III) Liquidity risk

Liquidity risk refers to fund shortage problems when fulfilling obligations settled in cash or other financial assets. The company shall guarantee to have the sufficient funds to repay the debts through monitoring the cash balance,

the marketable securities available to be cash and the rolling forecast for the future cash flow.

## XI. The disclosure of the fair value

### 1. Closing fair value of assets and liabilities calculated by fair value

In RMB

Items	Closing fair value			
	Fir value measurement items at level 1	Fir value measurement items at level 2	Fir value measurement items at level 3	Total
I. Consistent fair value measurement	--	--	--	--
(1) Transactional Financial Asset			779,000,000.00	779,000,000.00
1. Financial assets measured at fair value through profit or loss			779,000,000.00	779,000,000.00
(2) 1. Financial assets measured at fair value through profit or loss			779,000,000.00	779,000,000.00
(3) Other1. Financial assets measured at fair value through profit or loss	8,940,598.31		242,090,790.80	251,031,389.11
II Inconsistent fair value measurement	--	--	--	--

### 2. Market price recognition basis for consistent and inconsistent fair value measurement items at level 1

The fair value of the Fuao Stoke held by the Company at the end of the period is measured based on the closing price of Shenzhen Stock Exchange on June 30, 2020.

### 3. Items measured based on the continuous or uncontinuous level 2nd fair value, valuation technique as used, nature of important parameters and quantitative information

Not applicable

4. Items measured based on the continuous or uncontinuous level 3rd fair value, valuation technique as used, nature of important parameters and quantitative information

1. Financial assets measured at fair value and whose changes are included in the profits and losses of the current period are bank structured deposits held by the Company, which are measured at fair value based on the principal amount due to their short maturity;

2. Accounts receivable financing is a bank acceptance bill with a short face value and a face value close to the fair value, which is measured at the face value as the fair value;

3. Investment in other equity instruments is held by the Company Investment in non-tradable equity instruments is mainly valued and measured by market method, asset-based method and income method. Among them: Shenzhen Jiafeng Textile Industry Co., Ltd. and Jintian Industry (Group) Co., Ltd. faced with a operating environment and operating conditions and financial status, so the Company uses zero yuan as a reasonable estimate of fair value for measurement; Changxing Junying Equity Investment Partnership (Limited Partnership) has no significant changes in its operating environment, operating conditions and financial status, so the Company measures the investment cost as a reasonable estimate of fair value.

5. Continuous third-level fair value measurement items, adjustment information between initial and final book values and sensitivity analysis of un-observable parameters

Not applicable

6. Continuous fair value measurement items, the conversion between different levels in the current period, the reasons for the conversion and the policy for determining the conversion time

Not applicable

7. Change of valuation technique incurred in the current period and cause of such change

Not applicable

8. Fair value of financial assets and financial liabilities not measured at fair value

Not applicable

9.Other

None

Other note

On December 14, 2017, the company's 3rd Extraordinary General Meeting of Shareholders in 2017 passed the Proposal on 'Shenzhen Textile (Group) Co., Ltd. 2017 Restricted Stock Incentive Plan (Draft) and Abstract';

on December 14, 2017, the board of directors of the company reviewed and passed the Proposal on Adjusting the List of Incentive Objects of Restricted Stock Incentive Plans and the Number of Equity Granted of 2017, and the Proposal on Granting Restrictive Shares to Incentive Objects. On December 14, 2017, the company granted 4,752,300 restricted shares to the incentive object, the grant price was 5.73 yuan/share. Restrictions shall be lifted at the rate of 40%, 30%, and 30% respectively after 12 months, 24 months, and 36 months after the first transaction date of 24 months after the completion of the registration. The company's performance assessment for the restricted shares granted each period is as follows:

Restriction lifting period	Performance assessment goals
The first restriction lifting period	In 2018, the earnings per share shall be no less than 0.07 yuan, and shall not be lower than the 75 fractiles level of the comparable listed companies in the same industry; the growth rate of operating revenue in 2018 compared with 2016 is not less than 70%, and is not lower than the 75 fractiles level of comparable listed companies in the same industry; in 2018, the proportion of optical film business such as polarizers to operating revenue is no less than 70%.
The second restriction lifting period	In 2019, earnings per share shall be no less than 0.08 yuan, and shall not be lower than the 75 fractiles level of the comparable listed companies in the same industry; the growth rate of operating revenue in 2019 compared with 2016 is not less than 130%, and is not lower than the 75 fractiles level of comparable listed companies in the same industry; in 2019, the proportion of optical film business such as polarizers to operating revenue is not less than 75%.
The third restriction lifting period	In 2020, the earnings per share shall be no less than 0.20 yuan, and shall not be lower than the 75 fractiles level of comparable listed companies in the same industry; the growth rate of operating revenue in 2020 is not less than 200% compared to 2016, and is not lower than the 75 fractiles level of comparable listed companies in the same industry. In 2020, the proportion of optical film business such as polarizers to operating revenue will be no less than 80%.

Note: Earnings per share=net profit/total capital stock attributable to common shareholders of the Company upon deduction of non-recurring profit and loss.

On January 16, 2020, the Company convened the first extraordinary shareholders' meeting in 2020 to consider and pass the Proposal on Repurchase and Cancellation of Some Restricted Shares and agreed to repurchase and cancel 69,900 shares of restricted shares held by 3 original incentive objects who left the company for personal

reasons at a repurchase price of 5.73 yuan per share.

On March 12, 2020, according to the resolutions of the 27th meeting of the 7th Board of Directors and the 19th meeting of the 7th Board of Supervisors, the company repurchased and cancelled 1,313,340 restricted stocks that failed to meet the conditions for lifting the restricted sales in the second phase, and repurchased and cancelled 120,000 restricted stocks that had been granted to the 3 resigned incentive objectives but had not yet been released from sales restriction, and repurchased and cancelled 1,433,340 restricted stocks in total.

On June 8, 2020, according to the resolution of the 30th meeting of the 7th Board of Directors of the Company, the Company repurchased and cancelled 57,150 restricted stocks which had been granted but not released from sales restriction, and 5,760 restricted stocks held by one original incentive object who resigned due to retirement, totaling 62,910 restricted stocks. The industrial and commercial change registration and other related procedures for this capital reduction have not yet completed, and the ending share capital still includes 62,910 shares repurchased as mentioned above.

## 2. Equity-settled share-based payment

Applicable  Not applicable

In RMB

Determination method of the fair value of equity instruments on the grant date	The closing price of the company's stock on grant date - grant price
Determination basis of the number of vesting equity instruments	On each balance sheet date of the waiting period, it is determined based on the latest information such as the change in the number of people that can be released from restrictions and the completion of performance indicators
Equity-settled share-based payment is included in the accumulated amount of capital reserve	0.00
Total amount of fees confirmed by equity-settled share-based payments in the current period	0.00

### Other note

The earnings per share after deduction of non-recurring profit and loss was RMB -0.12/share in 2019, which was lower the performance assessment target in the second period of lifting restrictions on sales; besides, the Company's 2020 budget rolling operation plan show that the Company is not expected to complete the performance assessment targets in the second period of lifting restrictions on sales and third period of lifting restrictions. In the current period, Company's Unconfirmed Share Payment Fee in the former recognized share payment disbursement in interests from occupation of funds by the interest rate of 2.10% for two-year deposits set by the People's Bank of China for restricted stock investment sum.
